

# ***COMMANDER'S SAFETY VISION***

***“Mission First, Safety Always!”***

***Safety preserves our resources, both human and material. Every day the 442 FW trains for, or executes, some of the most demanding missions in the Air Force. Any loss due to a mishap is just as costly as a loss in combat. I rely on you; maintainers, operators, support personnel and commanders to be my safety staff. I expect each of you to integrate the principles of risk management in every activity we do, at work as well as at home. Risk management is as simple as ABCD: Assess the risk, Balance controls, Communicate with others, and Decide on control actions. Risk management will enable us to eliminate unnecessary risks and successfully accomplish our mission. I am obligated and dedicated to providing our Airmen a safe and healthy working environment. I challenge each of you to join me in achieving that goal.***

**BRIAN K. BORGEN, Col, USAF  
Commander**
