

# OSAN AIR BASE CONTAMINATED OBJECT MARKING

## INITIAL PHASE

- Place CBRN Marking Sign on contaminated object
- Annotate date/time of contamination & type of agent
- Use black ink pen, black permanent marker, or black grease pencil for marking
- Use only the approved CBRN Marking Sign shown above

## FOLLOW-ON PHASE

- Contaminated object will be in Follow-On Phase once directed by the Emergency Operations Center (EOC)
- Place a diagonal line through the sign with tape or pencil
- Use black ink pen, permanent marker, or grease pencil to mark date/time of new phase above or on the tape
- Ensure original date, time & agent type are still visible
