Phone: (210) 292-6283 DSN: 554-6283

- We plan, develop, implement, and coordinate current and new Patient Safety Program functions for the 59th Medical Wing. We also collaborate with the Process Improvement, Quality, and Risk Managers on a wide variety of Patient Safety related issues.
- We provide ongoing assessments of all events entered in the Patient Safety Reporting system.
- We provide ongoing and customized data analysis of reported events for use with process improvement initiatives and to support evidence-based practice guidelines. We also analyze processes proactively in order to ensure continuous positive and successful outcomes.
- We encourage reporting of patient safety concerns, good catches, and events which can be accomplished anonymously. Our focus is the education of staff and patients regarding Patient Safety and process improvement.
- We are located on the second floor in Rooms 2B36, 2B40 & 2B44.
