This publication implements Air Force Policy Directive (AFPD) 14-2, *Intelligence Rules and Procedures*, and is consistent with Air Force Instruction (AFI) 14-202, Volume 1, *Intelligence Training*, AFI 14-202, Volume 2, *Intelligence Standardization/Evaluation Program*, and AFI 14-202, Volume 3, *General Intelligence Rules*. This publication establishes the minimum Air Force standards for training personnel performing intelligence duties in F-15E units. This publication applies to Regular Air Force (RegAF), Reserve and Air National Guard (ANG) intelligence personnel supporting F-15E operations. The National Guard Bureau will be considered functionally as a major command (MAJCOM) for the purposes of this publication. Ensure that all records created as a result of processes prescribed in this publication are maintained in accordance with (IAW) Air Force Manual (AFMAN) 33-363, *Management of Records*, and disposed of IAW Air Force Records Disposition Schedule (RDS) located in the Air Force Records Information Management System (AFRIMS). This AFI may be supplemented, but all supplements must be coordinated with the Office of Primary Responsibility (OPR) prior to certification and approval. Refer recommended changes to the OPR using the AF Form 847, *Recommendation for Change of Publication*. Route AF Forms 847 through the appropriate functional chain of command. The authorities to waive wing/unit level requirements in this publication are identified with a tier ("T-0, T-1, T-2, T-3") number following the compliance statement. See AFI 33-360, *Publications and Forms Management*, for a description of the authorities associated with the tier numbers. Submit requests for waivers through the chain of command to the appropriate tier waiver approval authority, or alternately, to the publication OPR for non-tiered compliance items.

SUMMARY OF CHANGES

This interim change adds risk factors, known as “tiers” to tasks assigned to organizations below major command (MAJCOM) level to depict the assessed risk of non-compliance. A margin bar (|) indicates newly revised material.

INTRODUCTION

1.1. General.

1.1.1. Scope. This volume outlines the procedures applicable to F-15E intelligence operations. With the complementary references cited, this volume prescribes standard operational procedures to be used by all F-15E intelligence personnel. These operational procedures are the minimum and can be supplemented by additional unit-level written guidance. Unit-level written guidance may expand upon these basic procedures, but in no case will it be less restrictive.

1.1.2. References. The primary references for F-15E intelligence operations are AFI 14-2F-15E, Volume 1, *F-15E Unit Intelligence Training*; AFI 14-2F-15E, Volume 2, *F-15E Unit Intelligence Evaluation Criteria*; Air Force Tactics, Techniques, and Procedures (AFTTP) 3-1.General Planning, *General Planning and Employment Considerations*; AFTTP 3-1.Threat Guide, *Threat Reference Guide and Countertactics Manual*; AFTTP 3-1.F-15E, *Tactical Employment—F-15E*; AFTTP 3-3.F-15E, *Combat Aircraft Fundamentals—F-15E* and this instruction.

1.2. Waivers. MAJCOM/A2 is the waiver authority for specific intelligence procedural requirements outlined in this instruction. MAJCOM/A2s will courtesy-copy Air Combat Command (ACC)/A2 regarding all waiver requests and responses. ACC/A2 will notify AF/A2DF of any significant trends in waiver correspondence that may indicate a concern with policy and guidance.

Chapter 3

EXTERNAL INTELLIGENCE TRAINING

3.1. Introduction. There are two types of EIT: Aircrew Intelligence Training (AIT) and Force Protection Intelligence Training (FPIT). AIT will be coordinated with the wing/group tactics flight or officer. FPIT will be coordinated with force protection (FP) organizations (e.g., Security Forces (SF), Air Force Office of Special Investigations (AFOSI)) as defined in AFI 14-119, *Intelligence Support to Force Protection (FP)*. (T-2)

3.2. SIO Responsibilities. The SIO will:

3.2.1. Establish an EIT program tailored to the unit's mission, weapons systems, projected wartime/Air and Space Expeditionary Force tasking and base/deployment location(s). (T-2)

3.2.2. Appoint in writing an EIT program manager to oversee program execution. (T-3)

3.2.3. Assign only qualified trainers to conduct unsupervised EIT events. Specialized training requirements and evaluation criteria for EIT trainers are identified in AFI 14-2F-15E, Volumes 1 and 2. (T-3)

3.2.4. Develop written guidance outlining procedures for conducting, documenting, testing, evaluating, monitoring and reporting EIT. List specific training objectives for each major area of intelligence training and the training method and resources used to satisfy each objective. (T-3)

3.2.5. Coordinate EIT written instructions with all applicable commanders. Written guidance will be coordinated with any agency that assists intelligence personnel in providing training, as well as, any agency for which intelligence training is provided on a regularly scheduled basis. (T-3)

3.2.6. Determine if other unit personnel require EIT and modify training requirements as appropriate. (T-3)

3.3. EIT Program Manager. The EIT program manager will:

3.3.1. Build an effective training program, including training plans, with input from operational squadrons, tactics representatives, aircrew flight equipment (AFE) personnel, SF personnel, AFOSI, and Survival, Evasion, Resistance and Escape (SERE) specialists, as appropriate. (T-2)

3.3.1.1. Effective training methods will be used and can include, but are not limited to: briefings, demonstration-performance, formal and informal lectures, and academic training sessions.

3.3.1.2. Training resources can include, but are not limited to: threat briefings, current intelligence briefings, theater orientation briefings, CDs/DVDs or web-based training materials, and weapons system videos.

3.3.2. Review training objectives for currency prior to the beginning of the training cycle. (T-3)

3.3.3. Actively solicit feedback to ensure training objectives are meeting training requirements. (T-3)

3.3.4. Conduct trend analysis following each training cycle; document lessons learned and apply those lessons during subsequent cycles. (T-3)

3.3.5. Provide a written evaluation of the wing/group EIT program to the appropriate commander(s) at the end of each training cycle. The written evaluation will include at a minimum: the percent or number of personnel trained; trend analysis (e.g., high miss questions, weak areas); and corrective actions taken. Incorporate feedback as applicable. (T-3)

3.4. Aircrew Intelligence Training. AIT is EIT provided to the units assigned and attached aircrew. The assigned Intelligence Weapons Instructor Course (IWIC) or Intelligence Sensor and Weapons Instructors Course (ISWIC) graduate will be directly responsible for the management of the AIT program. When an IWIC or ISWIC graduate is not assigned, the SIO will manage the AIT program.

3.4.1. Flying squadron intelligence personnel provide input to and execute the AIT program. (T-2) They will provide questions and answers specific to the squadron's mission for the unit master question file (MQF), administer AIT tests to aircrew at the end of each training cycle, and document AIT provided. Documentation of AIT will include the names of personnel receiving training, date training was accomplished, the topic taught, and the name of the trainer conducting the training. In addition, they will provide a written evaluation of the squadron's AIT program to the squadron commander and the EIT program manager (see Attachment 5). (T-3)

3.4.2. The AIT plan will be specifically tailored to meet unit/mission requirements. Each item in the AIT training plan will be taught at least once during the training cycle. The plan will ensure the objectives for each AIT category outlined in the below paragraphs are evaluated with a test. All aircrew covered by the training plan will pass each test with a minimum score of 85% correctable to 100% via a review of the missed test items with a qualified trainer. (T-3)

3.4.3. Prorate training based on unit contingency operations tempo IAW AFI 11-2F-15E, Volume 1. Details of the prorating schedule must be outlined in the AIT Plan and/or other written instructions. (T-3)

3.4.4. Aircrew intelligence training categories include threat knowledge, visual recognition (VR), personnel recovery (PR), and collection and reporting. Additional categories can be added based on the unit's operational mission. (T-2)

3.4.4.1. Threat Knowledge Training. Develop specific threat knowledge training objectives tailored to the F-15E, unit mission, local area, deployment base(s) and forward operating locations. Concentrate on threats in selected countries with the potential for direct unit involvement. The minimum standards for F-15E AIT threat briefings are in attachment 3. The references listed at the beginning of this instruction can be supplemented with other classified and unclassified publications such as National Air and Space Intelligence Center products, Tactics Bulletins, Tactics Analysis Reports, Country Studies, etc. when developing threat knowledge training materials.

3.4.4.2. Visual Recognition Training. Develop specific VR training objectives tailored to the F-15E, unit mission, base and forward operating locations. Include enemy/adversary, friendly or neutral weapon systems that may be encountered in the

operational environment, based on unit mission and operations plan/concept of operations plan (OPLAN/CONPLAN) tasking. Identify key differences between friendly weapons systems and threat weapon system look-alikes. Incorporate all aspects/angles, theater specific paint schemes, national markings and various configurations. Include examples of weapons employment to illustrate to aircrew how threats might appear when employed (e.g., muzzle flashes, smoke plumes, burst patterns). Training should teach aircrew how to describe threats they encounter to assist intelligence personnel in positive identification.

3.4.4.3. Personnel Recovery Operational Support Training. When assigned, a SERE specialist will conduct PR operational support training. The SERE specialist will coordinate PR operations support training requirements with intelligence and AFE personnel and document these requirements in a memorandum of agreement (MOA). Units without SERE personnel will coordinate an MOA with AFE and operations. This category will be omitted if intelligence personnel do not provide any PR operational support training to aircrew. If intelligence personnel do provide PR operational support training, address as a minimum: PR materials (e.g., Isolated Personnel Report (ISOPREP) maintenance and review, evasion plan of action (EPA) preparation) and theater combat recovery procedures.

3.4.4.4. Collection and Reporting Training. Collection and reporting training will focus on items necessary to enable aircrew to initiate aircrew-originated reports (e.g., In-flight Report (INFLTREP)) and familiarize them with the information requirements of the intelligence-generated Mission Report (MISREP) and other intelligence reports. A critical component of this training will be the unit's essential elements of information (EEIs). Training will identify and describe theater-specific and peacetime reporting requirements.

3.5. Force Protection Intelligence Training. FPIT is EIT provided by the host unit intelligence function to the unit's SF and other FP support agencies (e.g., AFOSI, Civil Engineering). FPIT will be conducted IAW AFI 14-119 and supporting documents. When possible, a Force Protection IFTU graduate will be responsible for the management of the FPIT program. If the intelligence function is not part of the host unit, the tenant unit responsibilities in AFI 14-119 will be adhered to.

3.5.1. The FPIT plan will ensure FPIT is conducted in accordance with AFI 14-119 and will be specifically tailored to meet unit/mission FP requirements. Each item in the FPIT training plan will be taught IAW the FP customers objectives. (T-3)

3.5.2. All FPIT will be documented to include the names of personnel receiving training, date training was accomplished, the topic taught, and the name of the trainer conducting the training. In addition, provide a written evaluation of the FPIT program to the appropriate unit commander and the EIT program manager. (T-3)

3.5.3. FPIT categories include intelligence roles and responsibilities, area of responsibility (AOR) hotspots, hostile forces, ground threat, landmines and improvised explosive devices. Additional categories can be added based on the unit's operational mission. FPIT will meet the standards found in attachment 4. (T-3)

Terms

Changeover Briefing—A briefing to provide incoming personnel a synopsis of events and issues to prepare them for their shift. Include issues needing immediate attention, pending tasks, personnel and equipment problems, work center status and briefing times.

Debriefing—The process to convert mission information into intelligence for dissemination to affected parties. The intelligence specialist will extract relevant mission intelligence from aircrew, ask amplifying questions relevant to the mission, identify time-sensitive information and disseminate appropriately and expeditiously.

Deployment Briefing—A briefing to provide intelligence information to aircrew, key staff, and deploying personnel prior to deployment. Intelligence information is tailored to the unit's specific mission, roles and combat profiles in accordance with the unit OPLAN/OPORD tasking. It includes a synopsis of the military and political situation generating the deployment, enemy activity and force disposition (e.g., air, ground and naval) in the AOR and along deployment route, enemy tactics and employment strategies, potential and or anticipated enemy reactions to the deployment, possible en-route hazards to flight, bailout or alternate landing issues for hostile, friendly and neutral areas, known threats (e.g., terrorist or regular military forces) in vicinity of bed down location, reporting instructions and EEI and additional items as dictated by the local situation.

External Intelligence Training—Intelligence training given by intelligence personnel to aircrew or other non-intelligence AFSC personnel.

External Intelligence Training Trainer—Current and qualified (e.g., CMR, BMC) intelligence personnel who have completed the EIT specialized training and maintain currency as an EIT trainer. Only qualified and current trainers may conduct unsupervised intelligence training for aircrew or other personnel in non-intelligence AFSC.

Initial Situation Briefing—The briefing conducted at the outset of a crisis that outlines the initial situation to the commander and staff. It includes the current situation, including major events leading to the crisis, any national decisions, enemy force disposition, current situation at deployment location, local area situation (e.g., terrorist activity, subversion threats), anticipated enemy reactions, possible en-route flight hazards for previously scheduled and transient flights.

Intelligence Personnel Training Program Manager—The IPTPM is appointed by the SIO to oversee the execution of the Intelligence Personnel Training Program.

Intelligence Preparation of the Operational Environment—An analytical methodology employed to reduce uncertainties concerning the enemy, environment, and terrain for all types of operations. Intelligence preparation of the operational environment builds and extensive data base for each potential area in which a unit may be required to operate. The database is then analyzed in detail to determine the impact of the enemy, environment, and terrain on operations and presents it in graphic form. Intelligence preparation of the operational environment is a continuing process.

Intelligence Reports—Reports generated by intelligence personnel to provide information to higher headquarters (e.g., MISREPs and INTREPs).

Internal Training Program—The internal intelligence training program is a unit-developed and maintained program. It is intended to facilitate all personnel in maintaining their qualifications and currencies. This volume provides a basic starting point for F-15E intelligence units and may be modified by the SIO based on the unit's requirements.

Mission Briefing—A briefing to provide unit operators with the latest intelligence affecting the mission. Accurate and timely intelligence information should be provided on the general situation since the last briefing, mission information, general situation in the CAP/objective area, en route and mission area threats (e.g., SAMs, ADA/AAA, air, naval, DEW) and other factors essential to mission success.

Mission Package Construction—The mission package provides the operator with the intelligence materials necessary to accomplish the mission. The mission package includes route maps, threat information and other local mission package requirements.

Mission Planning—The planning accomplished by intelligence personnel to support the operational mission. Mission planning provides operators with the intelligence materials necessary to accomplish the mission and may include route maps, imagery, and other local mission folder requirements. Aircrew should receive the latest intelligence and most accurate information available on routes, CAP area, targets of strikers being supported, threats, evasion and recovery and other factors essential to planning the mission.

Mission Tracking—Maintaining situational awareness of ongoing missions by monitoring mission execution and communicating with other mission related agencies and coordination centers.

Personnel Recovery—The aggregation of military, civil, and political efforts to obtain the release or recovery of personnel from uncertain or hostile environments and denied areas whether they are captured, missing, or isolated.

Senior Intelligence Officer—The SIO is the highest-ranking Air Force officer holding the 14N3 or 14N4 AFSC or Series 0132 Civilian serving in an Air Force intelligence position. The SIO's authority extends to all directly subordinate units. Installations with intelligence activities in different chains of command will have separate SIOs. In this capacity, the SIO provides senior guidance on all policy development, interpretations, and applications.

Situation Briefing—The briefing which provides the latest intelligence to assist commanders, staff and aircrew in their decision making. It incorporates significant military and or political events, enemy force disposition (e.g., ground, air and air defense, naval), indications of

impending enemy attack, enemy tactics and or employment strategies, potential course of enemy action, local area situation (e.g., terrorism, sabotage, subversion threats).

Step Briefing—A briefing given to aircrew immediately prior to departure for tasked mission. The step briefing provides the aircrew with last minute intelligence affecting their mission and highlights changes in the intelligence situation since the mission briefing.

Tier 2 (T-2)—Non-compliance has the potential to create moderate risk of mission or program degradation or failure, injury, legal jeopardy or unacceptable fraud, waste or abuse. Waivers may be granted at the MAJCOM/CC level, but may not be delegated lower than MAJCOM Director.

Tier 3 (T-3)—Non-compliance has a relatively remote potential to create risk of mission or program degradation or failure, injury, legal jeopardy or unacceptable fraud, waste or abuse. Waivers may be granted at the Wing/DRU/FOA/CC level.

AIRCREW INTELLIGENCE TRAINING REPORT

MEMORANDUM FOR XX SQ/CC

FROM: [UNIT]

SUBJECT: Summary of Squadron Aircrew Intelligence Training (AIT)

1. Of the 25 combat mission ready (CMR) aircrew assigned to the xx Fighter Squadron, 78 percent have received all of their required intelligence training topics for this training cycle. The status of intelligence training is listed below:

XX FS Training Summary	
Total aircrew	25
Avg. complete:	78%
Most common topics not completed:	SA-2 MiG-25

2. IAW the AIT Plan, all aircrew are required to be trained on each training item at least once each training cycle. At the completion of the training cycle, the following aircrew members have not completed the annotated training items:

Name	Intelligence Training Item
John A. Doe	SA-2, MiG-25, Su-27
Susan L. Smith	MiG-25
Zane G. Thomas	SA-2/3/8, MiG-25
Ed. D. Tyler	PR, ISOPREP

3. The annual Intelligence MQF test was administered on [DATE]. All CMR aircrew have taken the 100 question test (50 questions and 50 visual recognition slides). While not all aircrew obtained the minimum passing score of 85 percent the first time around, all tests have been corrected to 100 percent. A total of 25 aircrew took the test. The initial average test score for the squadron was 95 percent.

XX FS Intelligence Test Results	
Total # aircrew to take test	25
# of questions	100
Knowledge questions	50
Knowledge questions—average score	92%
Knowledge questions—most commonly missed	5 (SA-2) 8 (SA-6) 13 (MiG-29) 14 (Collection) 21 (Reporting)
Visual Recognition Slides	50
Visual Recognition —average score	98%
Visual Recognition —most commonly missed	MiG-21

4. The most commonly missed questions were #5, 8, 13, 14 and 21. After further review of questions 14 and 21, it is likely these questions were missed because they were poorly worded

and difficult to understand. Questions 5, 8, and 13 focused on the SA-2, SA-6, and MiG-29 respectively. The squadron intelligence section will increase emphasis on these threat systems during the next training cycle. Attached is a breakout of the test questions and how many times each question was missed.
