This mission directive prescribes the mission, organization, and responsibilities for Air Force Reserve Command (AFRC) Force Support Squadrons/Flights (FSS/FSF).

SUMMARY OF CHANGES

This revision changes units' assignment from support group to mission support group to comply with HQ USAF PAD 07-11, A1 Transformation. It directs installations to consolidate the resources of the MSS and SVS to form the Force Support Squadron/Flight (FSS/FSF).

1. Mission. The primary mission of the FSS/FSF is to operate and maintain applicable mission support functions and facilities at AFRC host bases and tenant locations. This mission is accomplished according to directives and policies of the commander of the group to which assigned and/or higher headquarters. The FSS/FSF provides a full range of capabilities to manage, develop, and sustain military and civilian Airmen and their families at home station and in deployed locations.

2. Command. FSS/FSF is a USAF-controlled AFRC units assigned to AFRC mission support groups. Their structure design maintains effective operations with the least expenditure of resources and minimizes organizational turbulence upon wartime mobilization. FSS/FSF is functionally aligned for structural compatibility with their active duty counterparts.

3. Responsibility. Established command channels apply. Communicate directly with the active duty advisory unit/active duty advisors on matters relating to training, inspection, and safety.

4. Special Instructions: Request changes to the organizational structure according to AFI 38-101, *Air Force Organization*, and submit to HQ AFRC/A1M.
