90TH MISSILE WING INSTRUCTION 32-301

Civil Engineering

EXCAVATION AUTHORIZATION PROCEDURES

COMPLIANCE WITH THIS PUBLICATION IS MANDATORY

ACCESSIBILITY: Publications and forms are available on the e-Publishing website at

www.e-Publishing.af.mil for downloading or ordering.

RELEASABILITY: There are no releasability restrictions on this publication.

OPR: 90 CES/CEOER Certified by: 90 CES/CC

(Lt Col Peter A Sabatowski)

Supersedes: 90 MWI 32-301, 26 February 2013 Pages: 10

This instruction establishes guidelines for protecting underground utilities, sensitive environments, historic and outlying facilities at Francis E. Warren Air Force Base, as well as those at geographically separated facilities. It applies to 90th Missile Wing, 20th Air Force, associated and tenant units assigned, attached, or supported by the 90th Missile Wing, Francis E. Warren Air Force Base. Ensure that all records created as a result of processes prescribed in this publication are maintained in accordance with AFI 33-322, *Records Management and Information Governance Program*, and are disposed of in accordance with the Air Force Information Management System (AFRIMS) Records Disposition Schedule (RDS) located at https://my.af.mil/afrims/afrims/afrims/rims.cfm. Comply with AFI 33-332, *Privacy Act Program*, for documents containing privacy act information. Comply with AFI 31-401, *Information Security Management* for documents containing For Official Use Only information. Refer recommended changes and questions about this publication to the office of primary responsibility (OPR) using the DAF Form 847, *Recommendation for Change of Publication*; route the DAF Form 847 from the field through major command (MAJCOM) publications/forms managers. See Attachment 1 for a glossary of references and supporting information.

SUMMARY OF CHANGES

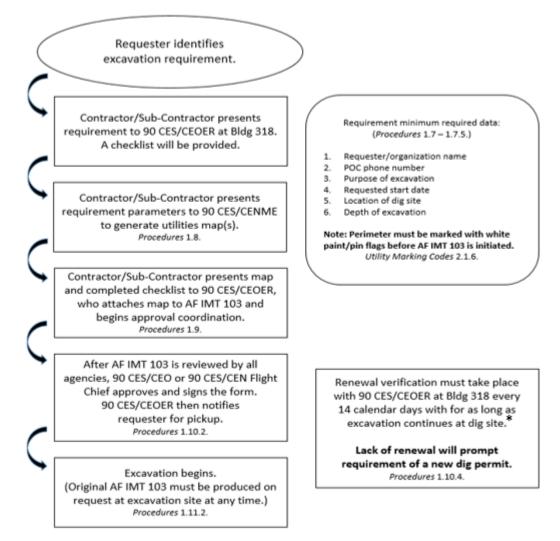

This publication includes numerous changes and must be completely reviewed to note revisions.

Chapter 1

PROCEDURES

- **1.1.** The combined underground location service (Wyoming One-Call) is the coordination focal point for commercial utility companies. All Wyoming One- Call requests will be made by the Base Civil Engineer's Requirements and Optimization section. Individuals/contractors must not call Wyoming One-Call to locate utilities (with the exception of associated missile sites). For associated missile sites, One-Call requests for the appropriate state will be made by the 90th Missile Maintenance Squadron's Cable Affairs section.
- **1.2. Requestors must identify dig area** with white paint or white pin flags prior to submitting dig requests in accordance with **Chapter 2**.
- **1.3. All requests for digging on F.E. Warren AFB** and the associated missile sites will be submitted to the Base Civil Engineer's Requirements and Optimization section, and will follow a standardized process. This process is outlined in the 90th Civil Engineer Squadron Facility Manager Handbook. The Handbook is the authoritative source on the dig permit process.
 - 1.3.1. Current procedures are outlined in **Figure 1.1**.

Figure 1.1. Coordination Process of AF IMT 103.

Note: * - Renewal verification mirrors Wyoming Statute 37-12-302 (c) timeline

- **1.4. When doing earthwork at missile sites**, it is the sole responsibility of the inspector/requester to contact local utility companies and arrange a meeting at the excavation site with the locator to verify the exact location of utilities.
- **1.5.** Coordinating AF IMT 103: (See Figure 1.2) The Base Civil Engineer's Requirements and Optimization section will contact all required base agencies for coordination and call Wyoming One-Call for the requester. Wyoming One-Call in-turn notifies the proper off-base agencies.

1.6. Agencies required for coordination /completion of AF IMT 103 are:

- 1.6.1. 90 CES utilities, pavements and equipment shops.
- 1.6.2. 90 CES Environmental.
- 1.6.3. Base Cable/Communications [includes Visual Imagery and Intrusion Detection Systems (VIDS) when locating for the WSA].
- 1.6.4. Wyoming One-Call.

- 1.6.5. US Grounds Maintenance Contractor (SKILS'KIN).
- **1.7. Requesters must provide** the following information, when submitting a digging permit. request:
 - 1.7.1. Name, phone number and organization/business of the requester.
 - 1.7.2. Purpose of the excavation.
 - 1.7.3. Date excavation is expected to commence.
 - 1.7.4. The location of the excavation area.
 - 1.7.5. Depth of excavation.
- 1.8. Requester will visit 90 CES/CEN Drafting section to acquire utility map.
- **1.9. 90 CES/CEOER** will attach associated documents and map(s) supplied by 90 CES/CEN Drafting section to AF IMT 103 and begin coordination process.
- **1.10. Each agency with utilities** in the area of excavation, will mark the area and annotate "marked" on the AF IMT 103 and sign in the appropriate block for that agency.
 - 1.10.1. Areas of excavation that are clear of utilities, will be annotated "clear" and signed in the appropriate block for that agency.
 - 1.10.2. Once all agencies have reviewed the AF IMT 103 and made the appropriate annotations, the 90 CES/CEO or 90 CES/CEN Flight Chief or delegated authority, will approve and sign the AF IMT 103. The Base Civil Engineer's Requirements and Optimization section will then notify the requester when the form is ready for pick up at Building 318.
 - 1.10.2.1. This signature authority will be delegated no lower than the Requirements and Optimization section.
- **1.11.** When signed by 90 CES/CEO or 90 CES/CEN Flight Chief or delegated authority, the form is valid for 14 calendar days and excavation may begin. The published timelines mirror Wyoming Statute 37-12-302 (c) for excavations.
 - 1.11.1. Original signed AF IMT 103 or a copy of the signed original must remain on site at all times during excavation.
- 1.12. Requester must maintain all markings throughout excavation project.
 - 1.12.1. If work is to exceed the initial 14 calendar days, the requester must renew digging permit for an additional 14 calendar days. The requester is required to bring their dig permit and all related documents to the 90 CES/CEOER office for the extension to take effect.
 - 1.12.2. If markings are maintained through the Base Civil Engineer's Requirements section, the project manager must also sign the permit, acknowledging all markings have been maintained.
- **1.13.** Normal processing time for routine requests is 10 to 14 duty days.
- **1.14. Emergency requests** required to correct conditions that are detrimental to the mission or reduce operational effectiveness are usually processed within a few hours. An emergency includes, but is not limited to, the total failure of the electrical, fire protection, telecommunications, heating

and air conditioning or security alarm systems and situations which would result in imminent or catastrophic damage to facilities and/or persons.

Chapter 2

UTILITY MARKING CODES

- **2.1. All utilities in the vicinity of the excavation** will be physically located and marked with fluorescent paint using the following underground utility color codes:
 - 2.1.1. WHITE Proposed excavation perimeter.
 - 2.1.2. RED Electric power lines, cables, conduits and lighting cables.
 - 2.1.3. ORANGE Communications, alarm/signal lines, cables/conduit and CATV.
 - 2.1.4. YELLOW Gas, oil, petroleum or gaseous materials.
 - 2.1.5. BLUE Water, irrigation or slurry lines.
 - 2.1.6. GREEN Sewer and drain lines.
 - 2.1.7. PINK Reserved for surveying purposes only.
 - 2.1.8. PURPLE Reclaimed water, irrigation.

Chapter 3

RESPONSIBILITIES

- **3.1. Requester must be the agency of primary responsibility** for any excavation. Any individual, agency, or contractor must comply with all directives from the Base Civil Engineer.
- **3.2. Excavators are required to maintain a minimum clearance** of 5 feet between the underground utility and the cutting edge or point of any power operated excavating or earthmoving equipment.
 - 3.2.1. If utility is found within 5 feet of located marks, immediately stop all work and notify 90 CES for shop/contractor assistance on locating/identifying lines.
- 3.3. If excavation is required within 5 feet horizontally of any marking, the excavation will be performed using hand tools or vacuum excavation with extreme care to prevent damage to any marked utility.
- **3.4. If, during the course of excavation,** a utility has been exposed, it is the excavator's responsibility to support these utilities. The excavator also must be certain the utilities have not been struck or damaged in any capacity, including being pulled or "kinked". If damage of any kind is discovered, if a utility is contacted, or if a previously unmarked utility is discovered, it is the excavator's responsibility to directly and immediately notify the Base Civil Engineer's Requirements and Optimization section at (307) 773-3175.
- **3.5.** Any excavation attempted without a proper approved digging permit may subject the excavating member to liability for reimbursement.
- **3.6. Focal Points. Focal Points** 90 CES/CEOER (Building 318, (307) 773-3175) is the focal point for processing all base and associated missile site dig permits in accordance with AF IMT 103, 19940801, V3, *Base Civil Engineer Work Clearance Request* (90 CES/CEOER).

CATHERINE V. BARRINGTON, Colonel, USAF Commander, 90th Missile Wing

Adopted Forms

DAF Form 847, Recommendation for Change of Publication, 22 September 2009 AF IMT 103, Base Civil Engineering Work Clearance Request, 11 March 2003

Terms

"EMERGENCY" defined by Wyoming State § 37-12-301—Means a sudden, unforeseen occurrence, including a loss of communications, which demands immediate action to protect the health, safety, and welfare of the public and to prevent loss of life, health, property or essential public services and advance notice to the Notification Center prior to excavation is impracticable under the circumstances. "Emergency" shall include ruptures and leakage of pipelines, explosions, fires, and similar instances where immediate action is necessary to prevent loss of life or significant damage to underground facilities or the environment.

"EXCAVATION" per § 37—12-301 - Means any operation in which earth, rock or other materials on or below the ground is moved or otherwise displaced by means of hand or power tools, power equipment or explosives or other means, and includes grading, trenching, digging, ditching, drilling, auguring, tunneling, boring, plowing-in, pulling-in, ripping, scraping and cable or pipe installing, except tilling of soil and gardening or agricultural purposes.

"Pre-Marking" is required by § 37-12-301—In order to ensure facility operators can identify *exactly* where the proposed excavation will take place, the excavator will mark the proposed excavation with white marks or white flags to show the location, route and boundary of the work area.
