# EDUCATION AND TRAINING SPECIALTY AFSC 3F2X1 CAREER FIELD EDUCATION AND TRAINING PLAN

## Part I

### *Preface*

1. This Career Field Education and Training Plan (CFETP) is a comprehensive education and training document that identifies life-cycle education and training requirements, training support resources, and minimum core task requirements for this specialty. The CFETP will provide personnel a clear career path to success and will instill rigor in all aspects of the career field training. **NOTE:** Civilians and additional duty training managers occupying associated positions may use Part II to support duty position qualification training.

2. The CFETP consists of two parts. Supervisors will use both parts to plan, manage, and control training within the specialty.

2.1. Part I provides information necessary for overall management of the specialty. Section A explains how to use the plan. Section B identifies career field progression information, duties and responsibilities, training strategies, and career field path. Section C associates each level with specialty qualifications (knowledge, education, experience, training, and other). Section D indicates resource constraints (i.e., funds, manpower, equipment, facilities). Section E identifies transition training plans for the 3F2X1 career field.

2.2. Part II is utilized to identify, plan, and conduct training commensurate with the overall goals of this plan. Section A identifies the Specialty Training Standard (STS) and includes duties, tasks, and technical references to support training, Air Education and Training Command (AETC) conducted training, core task, and correspondence course requirements. Section B identifies the course objective list. Section C identifies available support materials. Section D identifies a training course index supervisors can use to determine resources available to support training. Included here are both mandatory and optional courses. Section E identifies Major Command (MAJCOM) unique training requirements supervisors can use to determine additional training required for the associated qualification needs.

3. Using guidance provided in the CFETP will ensure individuals in this specialty receive effective and efficient training at the appropriate points in their career.

## ***ABBREVIATIONS/TERMS EXPLAINED***

**Advanced Distributed Learning (ADL)** – ADL is an evolution of distributive learning (distance learning) that emphasizes collaboration on standards-based versions of reusable objects, networks, and learning management systems, and may include some legacy methods and media.

**Advanced Training (AT)** – Formal course that provides individuals who are qualified in one or more positions of their Air Force Specialty (AFS) with additional skills and knowledge to enhance their expertise in the career field. AT is for selected career Airmen at the advanced level of the AFS.

**Air Force Career Field Manager (AFCFM)** – The Air Force focal point for the designated career field within a functional community. Serves as the primary advocate for the career field, addressing issues and coordinating functional concerns across various staffs. Responsible for career field policy and guidance.

**Air Force Automated Education Management System (AFAEMS)** – The official system of record for Air Force Voluntary Education data. Each Education Center uses AFAEMS to manage military members' education record.

**Air Force Enlisted Classification Directory (AFECD)** – The official directory for all military enlisted classification descriptions, codes, and identifiers. The specialty descriptions and codes will be used to identify each Air Force specialty (valid requirements) and describes the minimum mandatory qualifications of personnel to fill these positions. The updated AFECD is available on the myPers website.

**Air Force Job Qualification Standard (AFJQS)** – A comprehensive task list common to all persons serving in the duty position, which describes a particular job type or duty position.

**Air Force Specialty (AFS)** – A group of positions (with the same title and code) that require common qualifications.

**Air Force Specialty Code (AFSC)** – A five-digit alphanumeric code with potential prefixes and suffixes added to identify each career field within the Air Force.

**Air Reserve Component (ARC)** – This term is used as an overarching term when referring to both the Air National Guard and Air Force Reserve Component together.

**Career Field Education and Training Plan (CFETP)** – A comprehensive core training document that identifies life-cycle education and training requirements, training support resources, and minimum core task requirements for a specialty. The CFETP aims to give personnel a clear path. It is the formal training contract between the AFCFM and AETC for formal accession and life-cycle skills training.

**Behavior** - An activity performed to achieve objectives of the job. Involves observable (physical) components and unobservable (mental) components. Behaviors consist of the performance of one or more tasks.

**Coaching** - Relationship where an uncertified or certified professional coach provides technical support focusing on development of mentees based on their identified performance need.

**Competencies** - Observable, measurable pattern of knowledge, skills, abilities, behaviors, and other characteristics needed to perform institutional or occupational functions successfully.

**Competency Model** - A collection of competencies that together defines successful performance in a particular work setting. Competency models are the foundation for important human resource functions such as recruitment and hiring, training and development, and retention. Competency models may be developed for specific jobs, job groups, organizations, occupations, or missions. Some competency models include information about the levels of competence, mastery, or proficiency required at different occupational levels.

**Computer Based Training (CBT)** – The use of computers to aid in the delivery and management of instruction.

**Core Task** – Tasks identified by the AFCFM as minimum qualification requirements for everyone within an AFSC.

**Course Objective List (COL)** – A publication derived from initial and advanced skills course training standard, identifying the tasks and knowledge requirements, and respective standards provided to achieve a 3, 5, or 7-skill level in this career field. Supervisors use the COL to assist in conducting graduate evaluations in accordance with *DAFMAN 36-2689, Training Program*.

**Critical Task** – A task that requires specific training and certification above and beyond other tasks. Tasks may be defined as critical either through DAFI, Technical Orders, higher headquarters, or at any level in the unit.

**Deployment Task** – Any tasks identified by higher headquarters for personnel to perform during deployments, contingencies, or wartime. Deployment tasks may be specified for a particular skill level or in general across the AFSC. Guidance for using deployment tasks can be found in the applicable CFETP narrative.

**Distance Learning (DL)** – Includes video tele-seminar, interactive video tele-training, video tele-training, Career Development Courses (CDCs), internet-based instruction (IBI), and CBT. Includes formal courses that a training wing or a contractor develops for export to a field location (in place of resident training) for trainees to complete without on-site support of a formal training instructor.

**Distributed Training** – Formal courses that a training wing or a contractor develops for export to a field location (in place of resident training for trainees to complete without the on-site support of a formal training instructor).

**Duty Position Tasks** – Tasks assigned to an individual to be considered qualified for the position currently held. At a minimum these shall include all core tasks that correspond to the duty position as directed by the AFCFM and tasks assigned by the supervisor.

**Education and Training Course Announcements (ETCA)** – Contains specific MAJCOM procedures, fund citations, reporting instructions, and listings for those formal courses conducted or managed by MAJCOMs or field operating agencies.

**Experiential Learning** – Formal and informal experiences (e.g., field exercises, internships, or simulations), which enhance and expand an individual's competencies. This type of learning activity provides challenging environments, broadens perspectives, encourages reflective thinking, introduces new or enhances existing competencies, and allows for the observation of a learner's real-time actions.

**Foundational Competencies** – A set of accepted and valued competencies (e.g., Airman's Foundational Competencies), which enable success across a wide-array of DAF missions, roles, functions, and duties. Taken from AFH 36-2647, Competency Modeling.

**Functional Manager (FM)** – Senior leaders, designated by the appropriate functional authority, who provide day-to-day management responsibility over specific functional communities at the MAJCOM, Field Operating Agency (FOA), Direct Reporting Unit (DRU), Base Level, or ARC level. FMs are responsible for ensuring their specialties are equipped, developed, and sustained, as well as encouraging force development opportunities to meet future needs of the Department of the Air Force's mission.

**Initial Skills Training (IST)** – A formal training course that results in an AFSC 3-skill level award for enlisted personnel.

**Learning Management System (LMS)** – A software application for the administration, documentation, tracking, reporting, automation, and delivery of educational courses, training programs, materials or learning and development programs.

**Master Task List (MTL)** – A comprehensive list (100%) of all tasks performed within a work center and consists of the current CFETP or AFJQS and locally developed AF Form 797 (at a minimum). Additionally, it includes tasks required for deployment and/or Unit Type Code (UTC) requirements.

**myFSS** – An enterprise solution to support the Air Force's goal of providing a centralized place available for all Airmen & Guardians to proactively manage their career, benefits, services, and family care—from hire to retire.

**Occupational Competencies** – A set of competencies required of all Airmen within a specific workforce category (a group of functions requiring similar work, i.e., Engineering). They describe technical/functional skills, knowledge, abilities, behaviors, and other characteristics needed to perform that function’s mission successfully (taken from 1

**Occupational Survey Report (OSR)** – A detailed report showing the results of an occupational survey of tasks performed within a particular AFS.

**On-The-Job Training (OJT)** – Hands-on, “over-the-shoulder” training conducted to certify personnel in both upgrade (skill level award and job qualification) and position certification training.

**Proficiency Training** – Additional training, either in-residence or exportable advanced training courses, or on-the-job training, provided to personnel to increase their skills and knowledge beyond the minimum required for upgrade.

**Qualification Training (QT)** – Hands-on performance training designed to qualify personnel in a specific position.

**Qualification Training Package (QTP)** – A training aid used to provide step-by-step procedures toward task completion. Supervisors/trainers must use these and document training in the 623A during OJT (if available).

**Representative Sites** – Typical organizational units having similar missions, weapon systems or equipment, or a set of jobs, used as a basis for estimating average training capacities and costs.

**Resource Constraints** – Resource deficiencies, such as money, facilities, time, manpower, and equipment that preclude desired training from being delivered.

**Specialty Training** – The total training process used to qualify Airmen in their assigned specialty.

**Specialty Training Requirements Team (STRT)** – Forum to determine education and training requirements by bringing together the expertise to establish the most effective mix of formal and OJT training for each AFS skill level.

**Specialty Training Standard (STS)** – An Air Force publication (typically inserted as Part II of the CFETP) that describes an AFS in terms of tasks and identifies knowledge that an Airman in that specialty may be expected to perform or to know on the job. Also identifies the training provided to achieve a 3, 5, 7, or 9-skill level within an enlisted AFS. It further serves as a contract between AETC and the functional user to show which of the overall training requirements for an AFSC are taught in formal schools and correspondence courses.

**Standard** – A predetermined quality or quantity against which performance skills and knowledge are measured. An exact value, a physical entity, or an abstract concept, the appropriate authority, custom, or common consent sets up and defines to serve as a reference,

model, or rule in measuring quantities or qualities, developing practices or procedures, or evaluating results.

**Total Force** – All collective Air Force components (RegAF, reserve, guard, and civilian elements) of the United States Air Force.

**Training Capability** – The ability of a unit or base to provide training. Authorities consider the availability of equipment, qualified trainers, and study reference materials in determining a unit's training capability.

**Training Capacity** – The capability of a training setting to provide training on specified requirements, based on the availability of resources.

**Training Planning Team (TPT)** – Comprised of subject matter experts (SMEs) who are intimately involved in training development. The range of issues surpasses those covered during the Utilization and Training Workshop (U&TW).

**Training Requirements Analysis** – A detailed analysis of tasks for a particular AFS to be included in the training decision process.

**Task Qualification Training (TQT)** – Training conducted after chemical, biological, radiological, nuclear, and high-yield explosive defense classroom training in which individuals perform wartime mission essential tasks in a simulated wartime environment while wearing full ground crew individual protective equipment or aircrew individual protective equipment. Headquarters AF, MAJCOM and local functional area managers identify wartime mission essential tasks. See AFI 10-2501, *Emergency Management Program* and DAFI 10-2602, *Countering Weapons of Mass Destruction Enterprise* for additional information/ requirements.

**Upgrade Training (UGT)** – Mandatory training which leads to attainment of a higher skill level of proficiency.

**Utilization and Training Workshop (U&TW)** – A forum of the AFCFM, FMs, SMEs and AETC training personnel to determine career progression training requirements.

**Wartime Course** – Comprised of those tasks that must be taught when courses are accelerated in a wartime environment.

**Wartime Tasks** – Tasks to be taught in the 3-skill level awarding course when the wartime courses have been activated. In response to a wartime scenario, these tasks will be taught in the 3-skill level awarding course in a streamlined training environment. These tasks are only for those career fields that require them to be applied to their technical training center tasks.

## *Section A — General Information*

**1. Purpose.** This CFETP provides the information necessary for AFCFMs, MAJCOM FMs, commanders, training managers, supervisors, and trainers to plan, develop, manage, and conduct an effective and efficient career field training program. The plan outlines the training individuals in this AFS should receive in order to develop and progress throughout their career. This plan identifies initial skills, upgrade, qualification, advanced and proficiency training. The CFETP has several purposes—some are:

**1.1.** Serves as a management tool to plan, manage, conduct, and evaluate a career field training program. It is also used to help supervisors identify training, at the appropriate point, in an individual's career.

**1.2.** Identifies task and knowledge requirements for each skill level in the specialty and recommends education and training throughout each phase of an individual's career.

**1.3.** Lists training courses available in the specialty, identifies sources of training, and the training delivery method.

**1.4.** Identifies major resource constraints that impact full implementation of the desired career field training process.

**2. Usage.** The plan will be used by MAJCOM FMs, Base Training Managers (BTMs), Base Functional Managers (BFMs), and supervisors at all levels to ensure comprehensive and cohesive training programs are available for each individual in the specialty.

**2.1.** AETC training personnel will develop or revise formal resident, nonresident, field, and exportable training based on requirements established by the users and documented in Part II of the CFETP. They will also work with the AFCFM to develop acquisition strategies for obtaining resources needed to provide identified training.

**2.2.** MAJCOM FMs will ensure their training programs complement the CFETP mandatory initial, upgrade, and proficiency requirements. OJT, resident training, contract training, or exportable courses can satisfy identified requirements. MAJCOM-developed training to support this AFSC must be identified for inclusion into this CFETP.

**2.3.** Each individual will complete the mandatory training requirements specified in this CFETP. The list of courses in Part II will be used as a reference to support training.

**3. Coordination and Approval.** The AFCFM is the approval authority. The AFCFM will initiate an annual review of this document to ensure currency and accuracy. MAJCOM representatives and AETC training personnel will identify and coordinate on the career field training requirements.

## ***Section B - Career Progression and Information***

### **4. Specialty Description.**

**4.1. Specialty Summary.** Conducts Education and Training (E&T) tasks for maintenance, operations, and support training; performs education services, curriculum development, and instructor activities. Develops, delivers, and evaluates Education and Training programs and oversees Education and Training activities. Related DoD Occupational Subgroup: 157000.

### **4.2 Duties and Responsibilities.**

**4.2.1.** Develops, delivers, and evaluates Education and Training programs. Applies instructional systems development (ISD). Compares individual knowledge and skills with job standards and identifies Education and Training requirements. Determines adequacy of existing courses and programs. Screens and validates formal Education and Training requirements. Determines most cost-effective method to deliver Education and Training. Sequences objectives; selects instructional design, method, and media; and identifies resource needs. Creates materials to support objectives. Develops test and standards to measure individual abilities. Evaluates Education and Training programs, recommends actions to correct deficiencies, and oversees evaluations and surveys. Conducts, validates, and revises programs and instruction. Coordinates user feedback with career field managers and Education and Training providers and monitors corrective actions. Proctors exams. Maintains and controls testing materials.

**4.2.2.** Administers Education and Training programs. Serves as Education and Training program manager. Consults on ISD process and CFETPs. Advises on Education and Training materials and services. Conducts work center visits and organizes programs to develop and conduct job site training. Advises on unit and individual Education and Training progress. Identifies Education and Training providers, capabilities, and resources, and ensures availability of materials. Recommends revisions to Education and Training programs and CFETPs. Helps obtain and analyze history of Education and Training achievements, establish goals, and enroll in classes, courses, and programs. Prepares and maintains records, files, and materials. Maintains liaison with activities conducting, scheduling, or supporting Education and Training requirements. Coordinates and schedules events and facility use. Requests course quotas; monitors formal Education and Training process; and maintains records of course attendance, withdrawals, completions, and costs. Manages automated systems and products, measurement tools, multimedia and maintenance qualification training programs, and the extension course program. Coordinates contingency task training.

**4.2.3.** Oversees Education and Training activities. Organizes Education and Training programs to achieve educational goals and mission requirements. Prepares directives to manage and control Education and Training programs. Implements policies and coordinates changes. Develops and manages reporting procedures. Maintains Education and Training data and provides statistical reports on programs and operations. Monitors progress, identifies problem areas, determines causes, recommends corrective action, and provides

counsel. Organizes and controls facilities, supplies, and equipment to support Education and Training needs. Forecasts Education and Training requirements, determines validity, and assesses cost. Participates in STRTs, utilization and training workshops, training planning teams, and training planning groups.

**5. Competencies.** The Air Force defines competencies as an observable, measurable pattern of knowledge, skills, abilities, behaviors, and other characteristics needed to perform institutional or occupational functions successfully. The Education and Training community has rebuilt the entire training platform by using competencies to identify the behaviors that are needed to be successful on the job. This has been accomplished by identifying and integrating the 3F2X1, Education and Training, occupational competencies and leveraging the Air Force’s foundational competencies in a manner that provides all Airmen with transparent and unbiased pathways towards their own successful development.

**5.1. Foundational Competencies.** The foundational competencies are a set of accepted and valued competencies, which enable success across a wide array of DAF missions, roles, functions, and duties. These competencies are the core of Airmen development and enable Airmen with tools, pathways, and capabilities to improve their performance in any job, specialty, or situation. The foundational competencies are grouped into different categories of Developing Self, Developing Others, Developing Ideas, and Developing Organization. Airmen can go to MyVector (accessible via AF Portal) to complete a self-assessment, which will have them evaluate themselves on the 24 Airmen’s foundational competencies or a 360-degree assessment, where subordinates, peers, and leaders can also provide feedback. The assessment tools will provide Airmen with immediate feedback on personal strengths and areas for improvement. Additionally, a personal improvement plan with targeted resources (videos, reading content, developmental opportunities) are provided for continued self-development.

<b>What is a competency?</b>			
The combination of: <b>Knowledge, Skills, Abilities,</b> and <b>Other Characteristics</b> that manifest in an observable, measureable pattern of <b>Behaviors</b>			
<b>What is a foundational competency?</b>			
Competency universally applicable to all Airmen (Officer, Enlisted, Civilian). Competencies in <b>bold</b> in the list above are particularly important for the future.			

**5.2. Occupational Competencies.** Occupational competencies are a set of competencies required of all Airmen within a specific workforce category. These competencies provide a framework that describe the technical/functional skills, knowledge, abilities, behaviors and other characteristics needed to perform that function’s mission successfully.

**5.2.1. Occupational Competency Model.** A career field’s competencies can be viewed in a competency model, which is an organized collection of competencies pertinent to the career field. The occupational competency model provides a framework to effectively assess, maintain, and monitor the competencies required for mission success for Airmen within the Education and Training community. The occupational competency model follows a distinct process with continued involvement from the career field and allows Airmen to see how their task lists, OJT, formal courses, and other training, education, and experiences are aligned to the career field’s strategic objectives.

**5.2.2.** Career fields work with trained competency experts to identify and develop their competency model, which consists of the competencies, sub-competencies, and definitions. Occupational competency models will be different for each career field. The model focuses on integrating not just the technical components, but also leadership, management, combat, joint, all-domain, and social mastery competencies required for Airmen to succeed in their career field.

Competency	Sub-Competency	Description
Organizational Management	Personnel Management	The development and enhancement of an individual's capability in support of the assigned organization's mission.
	Coaching	Guiding others to achieve specific personal or professional goals by maximizing an individual's potential.
	Resource Management	Identifying and acquiring personnel, equipment, tools, funds, assets, supplies, facilities etc. to achieve an objective.
Communication	Communication	Presenting clear, concise, and meticulous verbal and written information through active listening and clear messaging, to achieve mission goals, improve processes, and eliminate errors.
Training Management	Program Management	Managing programs mapped to mission priorities or objectives that improve organizational performance.
	Upgrade and Qualification Training Management	Focused execution of an individual's career progression in their skills, knowledge, abilities, and other characteristics manifested in behaviors to accomplish the mission within their specific functional community.
	Course Management	Deliberate administration of formal and informal programs to comply with the needs and standards of the individual's continuum of learning.
	Testing Management	Enforcing academic integrity by executing testing processes.
Instructional Systems Design (ISD)	Curriculum Management	Designing and implementing instructional materials that meet mission objectives.
	Instruction	Delivering prescribed curriculum designed to develop an individual's skills, knowledge, abilities, and other characteristics manifested in behaviors.
Program Effectiveness	Data Analytics	Discovering, interpreting, and communicating significant trends.
	Assessments and Inspections	Providing objective and impartial appraisal regarding the condition of a program to continuously improve mission readiness.
Education Services	Education Services	Assisting and advising on educational opportunities and professional development programs.

Figure 2 provides an example of a competency model for the 3F2X1 career field.

Figure 2. 3F2X1, Education and Training, Occupational Competency Model.

**5.2.3. Occupational Competency Rubric.** After a model is developed, a team of subject matter experts begin building competency rubrics, which consists of the competency, a description of the competency, proficiency levels, and measurable and observable behaviors. The competency rubrics will help Airmen learn which behaviors are aligned to the career field’s strategic direction, the professional developmental expectations, and the criteria for success. Figure 3 provides an example of a competency rubric for 3F2X1 career field.

Figure 3. 3F2X1, Education and Training, Occupational Competency Rubric for Outbound Operations.

Competency	Proficiency Levels	Observable Behaviors
Training Management	<b>Expert</b> Consistency of Application: Able to innovate and formulate strategies; able to model/guide/teach other the competency of how to apply the competency	- Develops and updates training policies and procedures to improve training effectiveness - Consults with stakeholders to develop innovative solutions to enhance the organization’s training program
<b>Sub-Competency</b>	<b>Advanced</b> Consistency of Application: Sustained application of competency over time in complex situations	- Forecasts education and training requirements to determine validity and attainability - Interprets and communicates strategic vision and training guidance to enable customers in meeting requirements
Upgrade and Qualification Training Management		
<b>Description</b>	<b>Intermediate</b> Consistency of Application: Sustained application of competency over time in variety of situations	- Assess work center priorities to help create accurate training plans - Advises and assists assigned personnel in completing their responsibilities to meet training requirements - Coordinates training for assigned personnel and collaborates with training providers to support mission readiness
Focused execution of an individual’s career progression in their skills, knowledge, abilities, and other characteristics manifested in behaviors to accomplish the mission within their specific functional community.		
<b>Supporting Competencies</b>	<b>Basic</b> Consistency of Application: Sustained application of competency over time	- Conducts interviews to identify training needs to meet training requirements - Tracks training requirements for assigned personnel to ensure qualifications are met - Manages and updates applicable training systems to ensure information accuracy - Reports training data to enable senior leaders to make informed decision and provide corrective actions

**5.2.4.** To better understand how to read and utilize the competency rubric, a breakdown of each component is explained below in figure 4a-c.

Figure 4a. Competency Rubric Section 1.

<b>Competency</b>	←	The competency section states the competency group.
Training Management		

<b>Sub-Competency</b>	←	The sub-competency section states the narrower category that forms part of the competency group.
Upgrade and Qualification Training Management		<b>Note:</b> Some models may only consist of a competency and not include a sub-competency.
<b>Description</b>	←	The description section provides a statement that gives details about the sub-competency, enabling career field members to better understand how sub-competency relates to the AFS.
Focused execution of an individual's career progression in their skills, knowledge, abilities, and other characteristics manifested in behaviors to accomplish the mission within their specific functional community.		
<b>Supporting Competencies</b>	←	The supporting competencies section are supported-level competencies that are linked to the success of the sub-competency. These competencies lend themselves more toward areas like values, traits, and attitudes. These competencies were included as part of a larger survey that went out to the entire AFS; respondents were asked to rate the top supporting competencies they believe will attribute to higher successful performance within the sub-competency.
Develops People Organizational Awareness Accountability Information Seeking		

Figure 4b. Competency Rubric Section 2.

<b>Proficiency Levels</b>	←	The proficiency levels are broken into four parts: basic, intermediate, advanced, and expert.
<i>Expert</i>		Under each proficiency level are predetermined criteria selected by a group of SMEs from your career field and validated by the career field. The criteria were used as the basis to develop the observable behaviors. These criteria provide concrete parameters for the behaviors, which are consistent but progressive in nature as a member moves up the scale from basic to expert.
<i>Advanced</i>		Some of the criteria (e.g., depth of knowledge, consistency of application/complexity, and thinking challenge) allows an individual to become an expert through the experience gained in a particular job and over a period of time. For example, the person can quickly move up different proficiency levels while they are serving as a technician at a flight; they move quickly because they are exposed to a variety of situations.
<i>Intermediate</i>		While other criteria (e.g., scope, impact, and reach of influence) requires more of a hierarchical approach to gain the

<b>Basic</b>		experience needed to progress through the competency levels. Moving through the proficiency levels may be difficult to do in certain jobs. For example, if scope at the expert level requires job integration with the AF-level, then the individual may have to be in a position where they can gain that experience (i.e., at HHQ, Wing, or an organization with far reaching capabilities).
<b>Consistency of Application:</b> Sustained application of competency over time		

Figure 4c. Competency Section 3.

Observable Behaviors	←	
<ul style="list-style-type: none"> <li>– Develops and updates training policies and procedures to improve training effectiveness</li> <li>– Consults with stakeholders to develop innovative solutions to enhance the organization’s training program</li> </ul>		<p>The observable behaviors are statements of what can be observed from an individual manifesting the competency at the respective competency level.</p> <p>They provide objective evidence that the individual possesses the competency level and shows what effective performance looks like.</p> <p>The behaviors are written to be specific enough so they can be observable and lend themselves towards measurement.</p>
<ul style="list-style-type: none"> <li>– Forecasts education and training requirements to determine validity and attainability</li> <li>– Interprets and communicates strategic vision and training guidance to enable customers in meeting requirements</li> </ul>		
<ul style="list-style-type: none"> <li>– Assesses work center priorities to help create accurate training plans</li> <li>– Advises and assists assigned personnel in completing their responsibilities to meet training requirements</li> <li>– Coordinates training for assigned personnel and collaborates with training providers to support mission readiness</li> </ul>		
<ul style="list-style-type: none"> <li>– Conducts interviews to identify training needs to meet training requirements</li> <li>– Tracks training requirements for assigned personnel to ensure qualifications are met</li> <li>– Manages and updates applicable training systems to ensure information accuracy</li> <li>– Reports training data to enable senior leaders to make informed decision and provide corrective actions</li> </ul>		

**5.2.5** Another key component within the rubric is the supporting competencies section at the bottom left-hand corner. These are the top four supporting competencies that can help members excel and be successful in that particular sub-competency. Some of these supporting competencies are tied directly to the Airmen’s Foundational Competencies, while others may be unique to the career field. Having these supporting competencies identified and linked to a career field’s competency model can cultivate those underlying characteristics needed to succeed on the job. Leaders, supervisors, trainers, instructors, or mentors can now set members up for greater success by building these supporting competencies and placing their Airmen in situations where they can apply those strategies. All these elements come together to ensure we can develop Airmen who are better prepared, present, future mission-focused, and ready to succeed in any situation. Additionally, AFH 36-2643, *Air Force Mentoring Program*, has information on how competencies can be used when an established mentoring strategy is put into effect to foster and develop Airmen.

**5.2.6. Competency Development.** The intent of moving towards a competency-based system is to sharpen our Airmen’s tactical expertise, operational competence, strategic vision, and joint proficiency to lead and execute the full spectrum of USAF missions. This occurs not in a classroom but on the job by combining education, training, and experiences to provide Airmen with a better developmental pathway as they move along their careers. Airmen are still required to complete specific training courses, core tasks, and other training requirements in order to

attain a 3-, 5-, and 7-skill levels. Competency development allows Airmen to move beyond the minimum career field requirements and begin addressing developmental gaps and strengthening their capabilities. The competency model provides information that enables Education and Training community members to assess their professional growth and development by comparing their strengths and weaknesses to the clear and objective behaviors outlined in the model.

**5.2.7.** Below are the competency rubrics for the 3F2X1, Education and Training, career field.

Competency	Proficiency Levels	Observable Behaviors
Organizational Management	<b>Expert</b> Reach of Influence: MAJCOM/AF-Level/Industry	- Vectors personnel for career broadening opportunities and assignments to support mission requirements and personnel development - Develops human capital strategies for support of mission priorities
<b>Sub-Competency</b>	<b>Advanced</b> Reach of Influence: Wing/Institutional	- Identifies and capitalizes on opportunities for members to participate in experiential learning to foster multi-capable Amn strategies - Encourages collaboration by fostering a team environment to generate new ideas for programs and process improvement - Employs personnel to meet mission training requirements
Personnel Management		
<b>Description</b>	<b>Intermediate</b> Reach of Influence: Unit/ Groups	- Leads personnel within a section and provide feedback, internal training, and development opportunity for subordinates - Manages and advocates for readiness of personnel to meet local in-garrison and UTC requirements
The development and enhancement of an individual's capability in support of the assigned organization's mission.

**6. Training Decisions.** The CFETP has undergone a considerable revision towards building a competency-based training and development platform for the Education and Training career field. A significant change has been to shift the focus from task-based training to one that is more centered on outcomes-based learning. A task is a unit of work activity or operation which forms a significant part of a duty. These are singular in nature and are usually accomplished in one continuous action, which also can occur independently of other tasks. Conversely, outcomes are learning goals that typically consist of a multitude of tasks. These outcomes are actions and performances that embody and reflect the learner’s competence in using content, information, ideas, and tools successfully. Focusing on learning outcomes allow organizations, leaders, supervisors, and trainers to incorporate foundational competencies and underlying characteristics (values, traits, attitudes) into learning, which is necessary for developing Airmen with the competencies needed for future challenges. The following decisions were made as a result of close coordination between HQ AETC, 2AF Technical Training, schoolhouse instructors and staff, field SMEs, functional managers and the AFCFM. The final training requirements are then approved by the Career Field Manager.

**6.1.** A planning meeting/STRT was held from 26-30 September 2022 at Keesler AFB, MS. Members of the planning meeting/STRT sought to develop the learning outcomes. This was accomplished by reverse engineering the behaviors found in the Education and Training occupational competency model and then by asking what does an Airman need to know and do in order to master a specific behavior. The intent of the learning outcomes is to identify all factors needed to succeed in attaining the behavior. During the planning meeting, members decided (approved at STRT portion) to remove the qualitative proficiency code key and use a behavioral statement coding system for the STS.

As a result, each line item will consist of a verb and the coding system for formal training will only use P (performance), K (knowledge), and pk (performance-knowledge).

**6.2.** The CFETP uses a building block approach (simple to complex) to encompass the entire spectrum of training requirements for the 3F2X1 career field. The spectrum includes a strategy for when, where, and how to meet the training requirements. The strategy must be apparent and affordable to reduce duplication of training and eliminate a disjointed approach to training. The training decisions were made during the STRT held 26-30 September 2022 and utilizing the ISD process as implemented by 335TRS/UOB during training planning and course development.

**6.3. Skill and Career Progression.** Adequate training and timely progression from the apprentice to the superintendent level play an important role in the Air Force's ability to accomplish its mission. It is essential that everyone involved in training do their part to plan, manage, and conduct an effective training program. The guidance provided in this part of the CFETP will ensure each individual receives viable training at appropriate points in their career.

**6.3.1. Apprentice (3) Level.** The initial skills course, E3ALR3F231 01AC Education and Training Apprentice, must be completed for the award of AFSC 3F231. Initial skills training requirements were identified during the 3F2X1 STRT.

**6.3.2. Journeyman (5) Level.** Qualification in and possession of AFSC 3F231 and completion of UGT consisting of completing: (1) CDCs (if available); (2) all core tasks identified with "5"; (3) meet time in training requirements as identified by the AFCFM on myFSS "Time in Training Requirements"; (4) recommended by supervisor and approved by their commander for the award of AFSC 3F251.

**6.3.3. Craftsman (7) Level.** Qualification in and possession of AFSC 3F251. Begin UGT to the 7-skill level upon selection to SSgt or DOR for ARC. UGT consists of completing: (1) all core tasks identified with a number "7"; (2) meet time in training requirements as identified by the AFCFM on myFSS "Time in Training Requirements"; (3) recommended by supervisor and approved by their commander for the award of AFSC 3F271. Core tasks identified with "7/R" are mandatory for RegAF but optional for ANG and AFRC.

**6.3.4. Superintendent (9) Level.** Qualification in and possession of AFSC 3F271. Must be at least a Senior Master Sergeant (SMSgt) and meet mandatory requirements listed in the AFECD, have completed SNCOA or sister-service equivalent, and be recommended by their supervisor and approved by their commander for award of the 9-skill level.

**6.4. 3-Skill Level Training.** The initial skills course, E3ALR3F231 01AC, has been revised by 335 TRS/UOB at Keesler AFB to provide training needed to prepare graduates for education and training related positions.

**6.5. 5-Skill Level Upgrade Training.** There is no advanced 5-level course at this time.

**6.6. 7-Skill Level Advanced Training.** There is no advanced 7-level course at this time.

7. The CFETP Part II identifies thirteen (13) sub-competencies. Each competency is further broken down into the following proficiency levels: basic, intermediate, advanced, and expert. The proficiency levels are not tied to a specific rank or position. Additionally, each occupational competency has supporting competencies tied to them. The supporting competencies allow Airmen to intentionally develop those transferrable underlying characteristics that will translate to mission capabilities, mission readiness, and mission success for the agile, future thinking Airmen. Airmen, supervisors, trainers, mentors, and leaders should look for opportunities to integrate the supporting competencies into every facet of an Airman's development as they seek to gain and increase proficiency within the Education and Training competencies.

**8. Community College of the Air Force (CCAF).** Enrollment in CCAF occurs automatically upon completion of basic military training and assignment to an Air Force career field. CCAF provides the opportunity to obtain an Associate of Applied Sciences Degree. Exception: AFSC 3F2X1 personnel must request enrollment into the new degree program through their Education Service Office. In addition to its associate degree program, CCAF offers the following:

### **8.1. Certifications**

**8.1.1. CCAF Instructor Certification (CIC) Program.** This program is for qualified instructors who teach CCAF collegiate-level credit awarding courses at a CCAF affiliated school. The CIC is a professional credential that recognizes the instructor's extensive faculty development training, education and qualification required to teach a CCAF course, and formally acknowledges the instructor's practical teaching experience. Qualified officer, enlisted, civilian and other service instructors are eligible for this certification.

**8.1.2. CCAF Instructional Systems Development Certification.** CCAF offers the Instructional Systems Development (ISD) Certification for qualified individuals who develop CCAF courses/curriculum at CCAF affiliated schools. The purpose of the certification is to recognize the training and education required for individuals to be qualified to develop and manage CCAF collegiate courses. The certification also recognizes the individual's ISD qualification and experience in planning, developing, implementing, and managing instructional systems. Qualified officer, enlisted, civilian, and other service curriculum writers/developers are eligible for this certification.

**8.1.3. AF Credentialing Opportunities On-Line (AF COOL).** The AF COOL is a Total Force Enlisted program. It includes all enlisted AFSCs for RegAF, AFR, ANG, and USSF. Members of the ARC MUST be on Title 10 or 32 active orders for the duration of the AF COOL process (FDO: upload member's AD orders in AFAEMS). This program assists Airmen in navigating through the various civilian credentialing opportunities that are available for their control/duty AFSCs. AF COOL provides a one-stop-shop for Airmen to explore credentials recognized by the civilian community that can enhance an Airman's current performance in their AF specialty as well help prepare for civilian employment. Please review all the tabs as each has important information for successful completion of an AFSC-related credential.

**8.2. Degree Requirements.** Prior to completing an associate degree, the 5-skill level must be awarded, and the following requirements must be met:

Semester Hours

Technical Core/Elective Education	24
Leadership, Management, and Military Studies	6
General Education	15
Oral Communication, Written Communication, Mathematics Social Science and Humanities	
Program Elective	15
Technical Education; Leadership, Management, and Military Studies; or General Education	
Total	60

**8.2.1. Technical Education (24 Semester Hours):** A minimum of 9 semester hours of technical core subjects/courses must be applied and the remaining semester hours applied from Technical Core or Technical Elective subjects and courses. Specific requirements can be found in the latest CCAF catalog located at <https://www.airuniversity.af.edu/Barnes/CCAF/>.

**8.2.2. Leadership, Management, and Military Studies (6 Semester Hours):** Professional military education and/or civilian management courses.

**8.2.3. General Education (15 Semester Hours):** Applicable courses must meet the criteria for application of courses to the General Education Requirements (GER) and be in agreement with the definitions of applicable General Education subjects/courses as provided in the CCAF General Catalog.

**8.2.4. Program Elective (15 Semester Hours):** Satisfied with applicable Technical Education; Leadership, Management, and Military Studies; or General Education subjects and courses, including natural science courses meeting GER application criteria. Nine semester hours of CCAF degree applicable technical credit otherwise not applicable to this program may be applied. See the CCAF General Catalog for details regarding the Associate of Applied Science degree for this specialty.

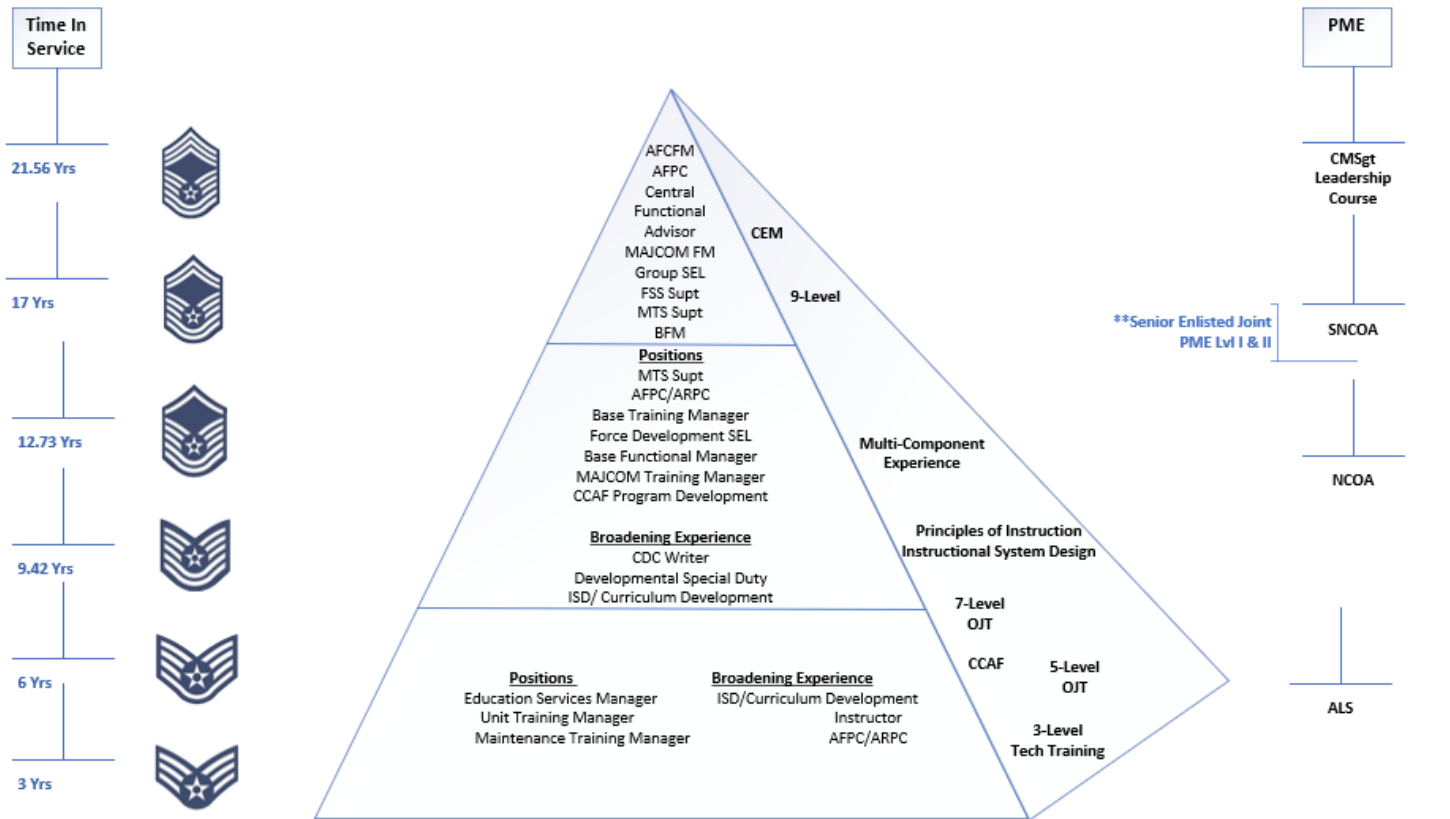

**8.3. Off-duty Education.** While additional off-duty education is a personal choice and is encouraged for all, the 3F2X1 AFCFM strongly advocates it for all Education & Training Managers.

### ***Section C - Skill Level Training Requirements***

**10. Purpose.** Skill level training requirements in this specialty are defined in terms of task and knowledge requirements. This section outlines the specialty qualification requirements for each skill level in broad, general terms and establishes the mandatory requirements for entry, award and retention of each skill level. The specific task and knowledge training requirements are identified in Part II of this CFETP.

**11. Specialty Qualification:** The initial skills course, E3ALR3F231 01AC Education and Training Apprentice, must be completed for the award of AFSC 3F231. Initial skills training requirements were identified during the 3F2X1 STRT, held 26-30 September 2022.

#### **11.1. Apprentice Level Training**

##### **11.1.1. Specialty Qualification.**

**11.1.1.1. Knowledge.** Comprehension of: principles, policies, and procedures of Air Force Education and Training programs; interviewing and counseling techniques; training techniques and instruction methods; task analysis procedures, learning process, curriculum development, training evaluations, and Education and Training systems and products; effective writing skills; editing practices; instructional media application, training reporting, program and curriculum validation, and implementation procedures; training program management; scheduling training events and facilities; conducting assistance visits and training meetings; work center and individual job qualification standard development; education institution registration requirements; military personnel classification system and policies; application of communicative interpersonal skills; and distance learning concepts.

**11.1.1.2. Education.** Completion of high school is mandatory for entry into this specialty. Academic courses in English grammar and composition, speech, psychology, guidance, and sociology are desirable.

**11.1.1.3. Training.** Completion of the following is mandatory (unless waived by the AFCFM): course E3ALR3F231 01AC, Education and Training Apprentice. Completion of the following courses are desirable: instructor-training course, technical writing course, curriculum development course, academic counseling course, instructional system designer course, and principles of instruction course. Completion of the Instructional System Designer course is mandatory for personnel performing curriculum designer functions. Completion of an accredited instructor-training course is mandatory for individuals assigned to instructor positions.

#### **11.1.1.4. Experience.** N/A

**11.1.1.5. Other.** Prior qualifications in any AFSC at the 5-skill level or higher (3-skill level, if no 5-skill level exists), (SrA or higher) and the ability to speak clearly and distinctly are mandatory for entry into and retention of this specialty. Ability to use word processing software is desirable. Must have a mandatory ASVAB Admin score of 62. Retraining interviews are mandatory for entry into this career field. The AFSC 3F2X1 base functional manager conducts the interview. For RegAF, retraining applicants must shadow a 3F2 for 5 duty days with a current 5-7 level 3F2 appointed by the Base Functional Manager. The days a member shadows do not need to happen consecutively, but all 5 days must be completed before the BFM endorses the interview/recommendation letter. Note, members who have fulfilled ADUTM additional duty within the last year are exempt (documented on BFM recommendation letter). Shadowing topics will include: OJT rosters, TPM briefing, training systems updates, CDCs, workcenter visits, Microsoft office applications.

**11.1.2. Training Sources and Resources.** Successful completion of course E3ALR3F231 01AC, Education and Training Apprentice (PDS Code 472), satisfies the knowledge and training requirements specified in the specialty qualification section (above) for award of the 3-skill level.

### **11.2. Journeyman Level Training.**

**11.2.1. Specialty Qualification:** Enter 5-skill level UGT after completion of the 3-skill level course.

**11.2.1.1. Knowledge.** Comprehension of: principles, policies, and procedures of Air Force Education and Training programs; interviewing and counseling techniques; training techniques and instruction methods; task analysis procedures, learning process, curriculum development, training evaluations, and Education and Training systems and products; effective writing skills; editing practices; instructional media application, training reporting, program and curriculum validation, and implementation procedures; training program management; scheduling training events and facilities; conducting staff assistance visits and training meetings; work center and individual job qualification standard development; education institution registration requirements; military personnel classification system and policies; application of communicative interpersonal skills; and distance learning concepts.

#### ***Section D - Resource Constraints***

**12. Purpose.** This section identifies known resource constraints that preclude optimal and desired training from being developed or conducted, including information such as cost and manpower. Resource constraints will be, at a minimum, reviewed and updated annually.

**13. Apprentice Level Training:** E3ALR3F231 01AC, Education and Training Apprentice Course.

**13.1. Constraints.** Required lead-time for development of resident training to meet added and changed training requirements specified in this CFETP.

**13.1.1. Impact.** Training to support this CFETP will be implemented with the class beginning 1 Oct 23.

**13.1.2. Resources Required.** Manpower resources are available to complete required course revisions by the specified target completion date. Command assistance may be necessary to supplement job experience and subject matter expertise of the assigned instructor staff.

**13.1.3. Action Required.** Complete a revision of the 3-level course to meet all training requirements and behavioral statement coding identified in this CFETP.

**13.2. OPR/Target Completion Date.** 335TRS/UOB will implement revised training with the class beginning 1 Oct 23.

**14. Journeyman Training:** CDC 3F251, Education and Training Manager Journeyman ACTIVATED.

**14.1. Constraints.** Supervisors and trainers will meet added and changed training requirements specified in this CFETP via On-the-Job training.

**14.1.1. Impact.** N/A

**14.1.2. Resources Required.** Manpower resources are available to complete required course revisions by the specified target completion date. Command assistance may be necessary to supplement job experience and subject matter expertise of the assigned instructor staff.

**14.1.3. Action Required.** On-the Job training conducted by supervisors and/or trainers to meet all training requirements identified in this CFETP.

**14.2. OPR/Target Completion Date.** 335TRS/UOB will revise methodology and medium of new formal course, *Education and Training Manager Journeyman*.

**15. Craftsman Training:** N/A

## Part II

### *Section A – Specialty Training Standard (STS)*

**1. Implementation.** The STS will be used for technical training provided by AETC for the 3-skill level Education and Training Apprentice.

**2. Purpose.** As prescribed in DAFMAN 36-2689, this STS:

**2.1.** Is used to document task completion when placed in the AF Form 623, Individual Training Record, and used according to DAFMAN 36-2689. CFETP documentation shall be IAW DAFMAN 36-2689 or any subsequent messages.

**2.2. Attachment 1. Qualitative Requirements.** Contains the behavioral statement coding used to indicate the level of training and knowledge provided by resident training and career development courses.

**2.3.** Lists in column 1 the most common competencies/learning outcomes, knowledge, and Technical References (TR) necessary for Airmen to perform their duties in the 3-, 5-, and 7-skill level.

**2.4.** Column 2 lists the “behavior match” as outlined in the competency header for required behaviors.

**2.5.** Identifies, in column 3 column, core tasks by the number of skill level it is required for (“5”, “7” or “9”) and column 4 deployment tasks by a diamond, (\*), TQT tasks by a ♦. Core tasks identified with “7/R” are optional for ANG and AFRC. Base level 3F2 functional manager will schedule training for personnel tasked to fill a deployed training position with the base education office."

**2.6.** Provides certification for OJT. Columns 5-9 are used to record completion of tasks and knowledge training requirements. Use automated training management systems to document technician qualifications, if available.

**2.7.** Shows formal training and correspondence course requirements. Columns 10-13 shows the proficiency to be demonstrated on the job by the graduate as a result of training on the task and the career knowledge provided by the corresponding course.

**2.8.** Is a guide for development of promotion tests used in the Weighted Airman Promotion System (WAPS). SNCOs with extensive practical experience in their career fields develop the Specialty Knowledge Tests (SKTs) at the AETC SAS/OA. The tests sample knowledge of STS subject matter areas judged by test development team members as most appropriate for promotion to higher grades. Questions are based upon study references listed in the Enlisted Promotion References and Requirements Catalog (EPRRC). Individual responsibilities are in DAFMAN 36-2664, *Personnel Assessment Program*.

**3. Third Party Certification.** Core tasks identified in this CFETP do not require third- party certification.

**4. Recommendations.** Comments and recommendations are invited concerning the quality of AETC training. A Customer Service Information Line (CSIL) has been installed for the supervisors' convenience. For a quick response to concerns, call our CSIL at DSN 597-4566, or e-mail us at [81trg.tge@us.af.mil](mailto:81trg.tge@us.af.mil). Reference this STS and identify the specific area of concern (paragraph, training standard element, etc.).
