Pages: 51

This publication implements Air Force Instruction (AFI) 11-200, Aircrew Training, Standardization/Evaluation, and General Operations Structure and is consistent with Air Force Manual (AFMAN) 11-202V1, Aircrew Training. This publication establishes Air Force (AF) standards for basic qualification, mission qualification, and continuation training for personnel performing aircrew duties in HH-60G aircraft. This publication applies to all civilian employees and uniformed members of the Regular Air Force (RegAF), Air Force Reserve (AFR), and Air National Guard (ANG) operating HH-60G aircraft. This publication does not apply to the United States Space Force. This manual requires the collection and or maintenance of information protected by the Privacy Act of 1974 authorized by Title 37 United States Code 301a, Incentive Pay: aviation career; Public Law 92-204, Appropriations Act for 1973; Section 715 Public Law 93-570, Appropriations Act for 1974; Public Law 93-294, Aviation Career Incentive Act of 1974; DoD Instruction 7730.67, Aviation Incentive Pays and Bonus Program; and E.O. 9397, Numbering System for Federal Accounts Relating to Individual Persons, as amended. The applicable System of Records Notice F011 AF XO A, Aviation Resource Management System (ARMS) is available at: http://dpclo.defense.gov/Privacy/SORNs.aspx. Ensure that all records generated as a result of processes prescribed in this publication adhere to Air Force Instruction 33-322, Records Management and Information Governance Program, and are disposed of in accordance with the Air Force Records Disposition Schedule, which is located in the Air Force Records Information Management System. Refer recommended changes and questions about this publication to the office of primary responsibility (OPR) using the Department of the Air Force (DAF) Form 847, Recommendation for Change of Publication; route DAF Forms 847 from the field through the appropriate functional chain of command. This publication may be supplemented at any level, but
all supplements that directly implement this publication must be routed to the OPR of this publication for coordination prior to certification and approval. The authorities to waive wing/unit level requirements in this publication are identified with a Tier (“T-0, T-1, T-2, T-3”) number following the compliance statement. See DAFMAN 90-161, *Publishing Processes and Procedures*, for a description of the authorities associated with the Tier numbers. Submit requests for waivers through the chain of command to the appropriate Tier waiver approval authority, or alternately, to the requestor’s commander for non-tiered compliance items. The use of the name or mark of any specific manufacturer, commercial product, commodity, or service in this publication does not imply endorsement by the Air Force. Compliance with attachments in this publication is mandatory.

**SUMMARY OF CHANGES**

This AFMAN replaces AFI 11-2HH-60V1 dated 16 April 2020, significantly reformatting publication to mirror AFMAN 11-2HH-60WV1, *HH-60W Aircrew Training*. A thorough review should be accomplished.

Attachment 2—CSAR VERIFICATION OUTLINE

Attachment 3—SAMPLE SMT APPROVAL FORMAT
Chapter 1

GENERAL GUIDANCE

1.1. **Purpose.** This volume establishes training management of HH-60G aircrew members in order to achieve the highest degree of combat readiness consistent with flight safety and resource availability.

1.2. **Abbreviations, Acronyms, and Terms.** See Attachment 1.

1.3. **Key Words Explained.**

   1.3.1. “Will” and “shall” indicate a mandatory requirement.

   1.3.2. “Should” is normally used to indicate a preferred, but not mandatory, method of accomplishment.

   1.3.3. “May” indicates an acceptable or suggested means of accomplishment.

   1.3.4. “Note” indicates operating procedures, techniques, etc., which are considered essential to emphasize.

1.4. **Training Plan and Syllabus of Instruction (SOI) Amendments.** Send proposals for amending training plans or SOI to Air Combat Command, Personnel Recovery (PR) and Joint Integration Division (ACC/A3J) (ACC units); United States Air Forces Europe, Operations Support Division (USAFE/A3A) (USAFE units); Pacific Air Forces, Operations Support Division (PACAF/A3) (PACAF units); 19th Air Force, Personnel Recovery and Special Operations Forces (SOF) Formal Training Division (19 AF/A3M) (Air Education and Training Command [AETC] units); Air Force Reserve Command, Personnel Recovery and Special Operations Division (AFRC/A3J) (AFRC units); or Air National Guard, Personnel Recovery and Special Operations Division (ANG/A3J) (ANG units).

1.5. **Roles and Responsibilities.**

   1.5.1. ACC, Director of Air and Space Operations (ACC/A3) is designated as the responsible agency for this volume in accordance with Department of the Air Force Policy Directive (DAFPD) 10-9, *Lead Command/Lead Agent Designation and Responsibilities for United States Air Force Weapon Systems, Non-Weapon Systems, and Activities*. As the lead command, ACC/A3 will chair ACC realistic training review boards (RTRB) to review ground and flying training requirements and programs for combat air forces (CAF) units. RTRB participants will include applicable ACC active and reserve component representatives. ACC will invite major command (MAJCOM) A3s, with major weapons systems which ACC is lead command, to send representatives and/or inputs.

   1.5.2. MAJCOMs responsibilities:

      1.5.2.1. Determine MAJCOM specific training requirements as required to fulfill primary and secondary designed operational capability (DOC) statement missions and unit taskings. Using MAJCOMs may adopt lead MAJCOM guidance such as training plans and syllabi as outlined in this manual.

      1.5.2.2. Review subordinate unit supplemental guidance and training programs as directed by MAJCOM guidance.
1.5.2.3. Publish a ready aircrew program (RAP) tasking memorandum (RTM) that establishes continuation training (CT) requirements for combat mission ready (CMR), mission ready (MR), and basic mission capable (BMC) aircrew. Using MAJCOMs may adopt and implement the lead MAJCOM developed RTM. However, using MAJCOMs retain the responsibility for adding any MAJCOM specific requirements and disseminating RTM guidance to units under their control.

1.5.3. Wing and Group responsibilities:

1.5.3.1. Develop programs to meet training objectives and provide necessary staff support to assist subordinate units in the management of training programs.

1.5.3.2. Ensure RTM guidance implementation to include ARMS training profile updates and squadron dissemination.

1.5.3.3. Determine annual formal aircrew training quota requirements; submit quota requests to ACC/A3J, USAFE/A3A, PACAF/A31, 19AF/A3M, AFRC/A3J, or ANG/A3J as required.

1.5.3.4. Attach aircrew position indicator (API)-6/8/B/D flyers to a flying squadron.

1.5.4. Squadron/Unit Responsibilities:

1.5.4.1. Assist the wing or group in developing unit-training programs.

1.5.4.2. Manage unit-training programs to ensure compliance with this manual and applicable Air Force guidance on the training of aircrew members. Ensure adequate training continuity and supervision of assigned and attached crewmembers. As necessary, assign additional requirements based on individual crewmembers’ experience and proficiency.

1.5.4.3. Review training and evaluation records of newly assigned crewmembers and those completing formal training in order to determine requirements for designation of appropriate aircrew status and ensure provisions of this manual are met.

1.5.4.4. Submit waivers as outlined in this manual.

1.5.4.5. Fill allocated training quotas through appropriate channels. Submit nominees or return quotas to ACC/A3J, USAFE/A3A, PACAF/A31, 19AF/A3M, AFRC/A3J, or ANG/A3J as required no later than 30 days prior to class start date.

1.5.4.6. Determine missions/events in which individual crewmembers will maintain qualification/certification versus familiarization.

1.5.4.7. If not specifically directed, identify the level of supervision required to accomplish required training.

1.5.4.8. Track and monitor CT currencies and requirements for all assigned/attached aircrew members.

1.5.4.9. Review qualifications and monitor training requirements for unit-assigned flight surgeons.

1.5.4.10. Determine how many and which aircrew will carry specialized training certifications and qualifications identified in Chapter 5.
1.5.4.11. Ensure crewmembers participate in sorties, events and tasks only when adequately prepared and trained.

1.5.4.12. Submit a training report to ACC/A3J, USAFE/A3A, PACAF/A31, 19AF/A3M, AFRC/A3J, or ANG/A3J as directed by the RTM. Submit an out-of-cycle report anytime MAJCOM assistance is required to prepare for DOC or global force management (GFM) tasking. Units will adhere to guidance set forth by applicable MAJCOM RTM for submitting training health reports, shortfalls, limiting factors and deviations. (T-2)

1.5.4.13. Initiate, track, review and close out aircrew training folders and forms in accordance with Chapter 6.

1.5.5. Instructor Responsibilities:

1.5.5.1. Be highly knowledgeable in HH-60G tactics, techniques, procedures and governing AFIs to provide timely instruction to any crew position concerning weapon system employment and regulatory guidance.

1.5.5.2. Be thoroughly familiar with all courseware, training plans, syllabi and applicable guidance of this manual for qualification, upgrade, and specialized training they are required to administer.

1.5.5.3. Review student-training records prior to performing each flight or training session.

1.5.5.4. Conduct preflight briefings and post flight critiques.

1.5.5.5. Ensure required upgrade training items are completed and signed off only after the student demonstrates the required proficiency level. Complete and sign off all required training items prior to recommending a student for an evaluation or certifying the student in an event.

1.5.5.6. Complete student grade sheets and narratives prior to the next sortie/event (unless flown with the same instructor on the same day), but in no case later than 24 hours following the mission.

1.5.5.7. Each instructor aircrew member is responsible for the safe execution of the duties of their respective crew position.

1.5.6. Individual aircrew members:

1.5.6.1. If applicable, hand carry required training records to assist the gaining unit in assessing qualifications and training requirements.

1.5.6.2. Complete training requirements and currencies within the guidelines of this manual and the RTM to adequately prepare for and maintain proficiency in assigned flight-related activities.

1.5.6.3. Participate only in sorties, events and tasks in which they are current and qualified, unless under direct supervision.

1.6. Aircrew Training Purpose. Training programs are designed to progress aircrew from initial and mission qualification training (IQT/MQT) at a formal training course, to local mission qualification training (LMQT) at the operational unit and finally to CT, upgrades, and specialized training. Additional information for each training program is in Chapters 2-5 of this publication.
1.7. **Ready Aircrew Program.** RAP is the CT program that defines the required mix of annual sorties, simulator missions, and training events aircrew shall accomplish to sustain mission readiness in order to meet tasked requirements. RAP training requirements will be implemented via the MAJCOM published RTM. (T-2) **Note:** If there are inconsistencies between the RTM and this publication, the RTM takes precedence.

1.7.1. Basic Mission Capable. A status that denotes a crewmember is receiving the minimum training required to be familiar with all missions, but only required to be qualified/certified and proficient in some of the primary DOC mission requirements of their assigned or attached unit.

1.7.1.1. The following aircrew are designated BMC:

1.7.1.1.1. Non-CMR (N-CMR) aircrew member positions above the squadron level (RegAF). (T-3)

1.7.1.1.2. Aircrew members who have a primary job performing wing supervision or staff functions that directly support flying operations. (T-3)

1.7.1.1.3. Aircrew members assigned to the United States Air Force Weapons School (USAFWS), and operational or developmental test and evaluation units. (T-3)

1.7.1.2. BMC crewmembers shall be able to attain proficiency and, if required, certification/qualification, in 30 days or less for those missions and events in which they maintain familiarization only. (T-3)

1.7.1.3. BMC aircrew will maintain all flight and ground currencies and accomplish all RAP designated training, which affects BMC status. Failure to accomplish this training results in regression to non-BMC status (N-BMC). (T-2)

1.7.1.4. BMC aircrew members may deploy and participate in missions that they are proficient and qualified without additional training, as determined by the squadron commander (SQ/CC).

1.7.2. Combat Mission Ready. A status that denotes a crewmember is receiving the training required to be certified, current and proficient in the DOC mission requirements of their assigned flying unit.

1.7.2.1. The following aircrew will be designated as CMR:

1.7.2.1.1. Combat unit active-duty API-1/A positions, flying SQ/CC and squadron operations officers (SQ/DO). (T-2) If a unit is over-manned, the SQ/CC will train the front line of their unit manpower document API-1/A positions to CMR and may elect to designate the overage as BMC. (T-2)

1.7.2.1.2. API-6/B positions not assigned to the flying squadron may be designated as CMR by operations group commanders (OG/CCs). **Note:** Any Air Reserve Component (ARC) aircrew member may be designated CMR/BMC at OG/CC discretion.

1.7.2.2. CMR aircrew members will maintain flight and ground currencies and accomplish all designated training that affects CMR status. Failure to complete training or maintain currencies will result in regression to N-CMR status. (T-2)
1.8. RAP Guidance and Management. RAP is executed in accordance with this manual and the current MAJCOM RTM. The RTM takes precedence over this manual and may contain updated mission and event requirements not yet incorporated in this manual.

1.8.1. RAP Training Cycle. The training cycle is defined by the RTM.

1.8.2. RAP Tasking Memorandum. The RTM identifies aircrew training requirements by establishing a minimum number of sorties, events and special capabilities that shall be completed based on aircrew experience levels. Specific sorties and events listed in the RTM may not be identified in this volume, in which case, RTM guidance takes precedence.

1.8.2.1. Sorties and events defined by the RTM are minimums and will not be reduced except by proration, waiver, or situations as stipulated by this manual and the RTM. (T-2)

1.8.2.2. Each RAP sortie will accomplish the minimum requirements as outlined in the sortie descriptions of this manual and the RTM that support the unit’s mission to receive credit as an effective RAP sortie. (T-3)

1.8.2.3. Units will follow guidelines for RAP sorties and events with minor variances authorized. (T-2) SQ/CCs may use variations in sortie types as a basis for end-of cycle regression.

1.8.3. RAP Training Development. Units will design a training program to achieve capability in tasked missions, maintain aircrew proficiency, and enhance mission accomplishment and safety. (T-2) Use of procedures and actions applicable to combat scenarios are desired (e.g., appropriate use of code words, authentication procedures, combat tactics, safe recovery procedures, tactical deception, in-flight reports, threat reactions, and intelligence briefing/debriefing). Tactical training should include use of inert and live ordnance, threat simulators, countermeasures and dissimilar aircraft to the maximum extent possible.

1.8.4. RAP Training Reports. Guidance on submitting RAP training reports is provided in the MAJCOM RTM.

1.9. Experienced Aircrew Requirements. Aircrew members require a minimum number of flight hours to be considered experienced in the aircraft in accordance with AFI 11-412, Aircrew Management. Aircrew will be designated as experienced upon meeting the primary assigned aircraft (PAA) hour requirements in Table 1.1. (T-1) Aircrew members that do not meet the PAA hours threshold are defined as inexperienced. Previously qualified HH-60W personnel still require HH-60G specific flight time in order to be considered experienced.

Table 1.1. Experienced Aircrew.

<table>

Special Mission Aviator (SMA) (First Flight Engineer (FF)/Mission Flight Engineer (MF)) 200 100 100

Notes:
1. All hours towards experienced designation occur after attaining the applicable qualification.
2. All previously qualified HH-60W aircrew that were designated Experienced, only require 50 hours total HH-60G time to be designated Experienced.

1.10. Aircrew Utilization and Management. See AFI 11-412.

1.11. Sortie Allocation Guidance.

1.11.1. Combat Units (CC-coded units). The SQ/CC’s first priority shall be to train all designated aircrew to CMR. (T-2) Priorities for sortie allocations are as follows: CMR API-1/2/A, LMQT API-1/2/A, LMQT API-6/B, BMC, API-5 flight surgeons, and then all others. (T-3) Inexperienced API-1/2/A aircrew members should receive sortie allocation priority over experienced aircrew members.

1.11.2. Formal Training Units and USAFWS (TF-coded units). The execution of formal syllabus training within MAJCOM programmed flying training timelines should be the SQ/CC’s priority. Other sortie types should be scheduled at SQ/CC’s discretion.

1.11.3. Test Evaluation Squadron Units (CB-coded units). Test units will prioritize sortie allocation in the following order: requirements directed by MAJCOM, training required to prepare for assigned projects or tasking, BMC training requirements that cannot be accomplished on primary missions, API-5 Flight Surgeons. (T-3)

1.11.4. API-6/8/B/D flyers. Units should provide attached API-6/8/B/D flyers adequate resources to maintain minimum training requirements. However, API-6/8/B/D flyer support will not come at the expense of the flying squadron's primary mission. Guidance for requesting relief for attached flyer requirements is found in DAFMAN 11-401, Aviation Management, as supplemented. Units requiring flying hour adjustments for attached API-6/8/B/D flyers shall request program changes in accordance with MAJCOM directives. (T-2)

1.11.4.1. For formal training unit (FTU) only wings, API-6/B crewmembers will maintain instructor status (optional for wing and group commanders, functional check flight (FCF) crewmembers). (T-3) These wings will fly API-1/6/A/B crewmembers as required by program flying training. (T-3)

1.11.4.2. Guidance for API-8/D (above wing level) rated personnel flying authorizations and test unit crewmembers is provided in DAFMAN 11-401 and MAJCOM guidance.

1.12. Formal Training Conducted in Unit (Secondary Method Training [SMT]). When attendance at a formal school course is not practical or no quotas exist, units may request approval to conduct training in-unit using formal school syllabus and courseware. Any aircrew member who has previously failed to complete a formal course for substandard performance will not be issued an SMT approval for the same course. (T-2)
1.12.1. SMT Approval Authority. Owning OG/CC. Submit approval requests through local channels to ACC/A3J, USAFE/A3A, PACAF/A31, AFRC/A3J, or ANG/A3J as required for tracking and requesting appropriate courseware from the FTU. (T-2) Reference Attachment 3 for approval format.

1.12.1.1. Sequence of training waivers for SMT ground, simulator, and flying events may be approved on a case-by-case basis by the unit operations officer. ACC/A3J, USAFE/A3A, PACAF/A31, 19AF/A3M, AFRC/A3J, or ANG/A3J, as required, will approve all other modifications to formal school products. (T-2)

1.12.1.2. Units will maintain a copy of approved waivers in the individual's training records. (T-3)

1.12.2. Formal School Courseware Requests. When accomplishing FTU courses in-unit, the SMT waiver, see Figure A3.1, must include names of the instructors conducting the training to enable unit access to the courseware owned by the FTU. MAJCOM staff will contact 19AF/A3M and the FTU for courseware access once approved waiver is received. Courseware includes but is not limited to: the course SOI, briefings, computer-based training modules, instructor guides, training guides and student grade sheets. This information may be web-based or available through other digital mediums. The unit training office will verify currency of the courseware obtained. (T-2) If the course includes an end of course exam, substitute a locally developed exam with a minimum passing score of 85 percent. (T-2)

1.12.3. When a formal school course is authorized to be conducted in-unit, the unit assumes responsibility for providing this training locally. The following applies to SMT:

1.12.3.1. Units will ensure training is completed within 120 days from the first flight. (T-3) Notify ACC/A3J, USAFE/A3A, PACAF/A31, 19AF/A3M, AFRC/A3J, or ANG/A3J, as required, of any failures to complete within the specified time limit. Include individual’s name, rank, reason for delay, planned actions and estimated completion date. (T-3)

1.12.3.2. Simulator training mission event prerequisites will be in accordance with the formal course SOI. (T-2) Reference the training media substitution section of the SOI for guidance on conducting training in different media (i.e., aircraft vs. simulator). Items that cannot be completed safely in the aircraft may be covered during table-talk discussion.

1.13. Active Duty Service Commitments. Guidance on formal training and incurring an active duty service commitment is provided in AFMAN 36-2100, Military Utilization and Classification. Units will ensure crewmembers who are directed to attend an education or formal training course, whether via permanent change of station (PCS), temporary duty (TDY) or permanent change of assignment (PCA), process through the Military Personnel Flight for counseling and completion of the AF Form 63, Active Duty Service Commitment (ADSC) Acknowledgement Statement or other required ADSC acknowledgment before entering an ADSC-incurring event. (T-2)

1.14. Training Records and Reports. Units will maintain a permanent training folder for each crewmember. (T-2) Folders will be forwarded to gaining units when individuals PCS. (T-2) In accordance with Career Field Education and Training Plans, personnel in Air Force Specialty Code (AFSC) 1AXXX are exempt from maintaining an DAF Form 623, Individual Training Record Folder. Training will be documented as outlined in this manual. (T-2)

1.14.1. Maintain individual training records in accordance with Chapter 6 and the following:
1.14.1.2. AFMAN 11-202V2, Aircrew Standardization and Evaluation Program.
1.14.1.5. MAJCOM directives.

1.14.2. Career Enlisted Aviator (CEA) Training Documentation. CEA qualifications are separate from skill level qualification. When an AF Form 8, Certificate of Aircrew Qualification, is completed for the applicable flight evaluation, that crewmember is qualified to perform all duties assigned to that crew qualification regardless of skill level. Additionally, instructor qualification and flight examiner certification are separate and distinct from on-the-job trainer or certifier designation and are reflected in the AFSC by use of “K” prefix (aircrew instructor), “T” prefix (formal training instructor) and “Q” prefix (aircrew flight examiner).

1.14.3. Unit Tracking of Training Requirements. Units will track the following information for all crewmembers (as applicable):
   1.14.3.1. Ground training requirements and accomplishments. (T-2)
   1.14.3.2. Requirements and accomplishment of individual sorties, RAP sorties, sortie types and events cumulatively for the training cycle. (T-2)
   1.14.3.3. Total RAP sorties for determining RTM-defined lookback requirements. (T-2)
   1.14.3.4. Ground and flight training currencies. (T-2)

1.14.4. Units will update ARMS “No Date” with either the date of the last FTU or USAFWS-equivalent training accomplished, or the unit mission certification date. (T-2)

1.15. In-Flight Supervision. If mission objectives include introductory tasks or instruction to correct discrepancies, direct supervision by a qualified instructor is required. (T-1) Supervision may be reduced as identified in the RTM. To qualify as a flying supervisor, individuals will meet experienced requirements of Table 1.1, will be selected by the SQ/CC, and will be identified on the Letter of Certifications (Letter of X’s) as a flying supervisor. (T-3)

1.16. Aircrew Training While Duties Not Including Flying (DNIF). If the member’s physical condition allows, aircrew who are DNIF may log ground training events, including simulator training. Consult the flight surgeon initiating the DD Form 2992, Medical Recommendation for Flying or Special Operational Duty, to determine if the DNIF status includes ground training limitations.

1.17. Intra Command and Inter Command Transfer of Aircrews. Losing units will screen individual flight and ground training records during unit out-processing to correct discrepancies prior to PCS. (T-3)
   1.17.1. Personnel selected to fill an HH-60 flying position short tour requirement will be scheduled by the losing organization for simulator refresher, physiological, and other training to prevent unnecessary TDYs from short tour areas. (T-3) This guidance does not apply to personnel tasked to support a non-HH-60 mission design series (MDS) short tour or extended temporary duty tasking; follow line remarks for these taskings.
1.17.2. Specialized training and certifications identified in Table 5.2 may be accepted at the discretion of the gaining unit commander.

1.18. Waiver Authority and Routing. Units route an DAF Form 679, Department of the Air Force Publication Compliance Item Waiver Request/Approval, for any waivers to this publication. See DAFMAN 90-161 for a description of the authorities associated with the tier numbers. Unless otherwise directed or annotated by a specific tier level, waiver authority for contents of this publication is the requestor’s commander for non-tiered compliance items.

1.18.1. The OG/CC may:

1.18.1.1. Extend the MDS-specific ground training periods listed in the RTM and Chapter 4 by 60 calendar days, on an individual basis. Non-MDS specific training waivers will be in accordance with reference directives.

1.18.1.2. Extend the flying training currencies listed in this AFMAN and the RTM by 60 calendar days unless otherwise noted (delegable no lower than SQ/CC).

1.18.1.3. Waive 10 percent of the night-vision goggle (NVG) hours, and PAA hours required for upgrade in all crew positions, on an individual basis only (delegable no lower than SQ/CC). File a copy of the experience waiver in the individual’s training record. Students will bring waiver letters to the formal school for insertion into their training record. (T-2)

1.18.2. Units will maintain a copy of approved waivers and track the following information:

1.18.2.1. Waiver type. (T-2)

1.18.2.2. Approval authority. (T-2)

1.18.2.3. Approval date. (T-2)

1.18.2.4. Waiver number. (T-2)

1.18.2.5. Waiver expiration date. (T-2)

1.18.3. Units will notify ACC/A3J, as well as USAFE/A3A, PACAF/A31, 19AF/A3M, AFRC/A3J, or ANG/A3J, as required, by email when waivers to this volume are issued. (T-2)

1.18.4. For aircrew attending FTU courses, units will utilize the AETC Form 6, Waiver Request, to request FTU course overages, FTU SOI waivers, or senior officer course (SOC) or key staff course requests. (T-2) Route FTU waiver requests to ACC/A3J, USAFE/A3A, PACAF/A31, 19AF/A3M, AFRC/A3J, or ANG/A3J, as required. MAJCOMs will forward the request to 19AF for approval. File a copy of approved waivers in the trainee’s aircrew training folder. Students will hand-carry a hard copy of approved waivers to the FTU course. (T-2)

1.18.5. Units will forward waiver requests for pilots non-current for shipboard operations to ACC/A3J, USAFE/A3A, PACAF/A31, 19AF/A3M, AFRC/A3J, or ANG/A3J, as required. (T-2). The MAJCOM will then forward the request as outlined in Air Force Tactics, Techniques, and Procedures (AFTTP) 3-2.4, Multi-Service Tactics, Techniques, and Procedures for Shipboard Helicopter and Tiltrotor Aircraft Operations, and the waiver format will be in accordance with Appendix C. (T-0)
Chapter 2

INITIAL QUALIFICATION, UNIQUE, AND KEY STAFF TRAINING

2.1. General. This chapter specifies minimum training requirements for IQT, differences training, and SOC.

2.2. Initial Qualification Training. IQT provides aircrew the basic training necessary to initially qualify in flying duties without regard to a specific unit's mission. Upon completion, aircrew members attain basic aircraft qualification (BAQ) status. BAQ is a prerequisite for all follow-on training.

2.2.1. IQT Methods. The primary method of completion is to attend the appropriate formal training course listed in the Education and Training Course Announcements (ETCA). When attendance is not practical or no quotas exist, units will request a waiver using DAF Form 679 to conduct SMT. (T-2) See Attachment 3.

2.2.2. Prerequisites. Reference the current SOI. The AETC Bookstore (https://trss3.randolph.af.mil/bookstore/home/homePage.aspx) is the primary source for all formal syllabi.

2.3. Unique Training. With OG/CC and service-equivalent approval, and when specifically authorized by DAFMAN 11-401, H-60 series qualified crew members of US military services may temporarily occupy a crew position on the HH-60G to reestablish currency. They may also do this to establish a pyramid of instructors in order to initiate necessary unique training where no unit instructor(s) exist in the required crew position(s). Examples include, but are not limited to shipboard operations, sling load, etc. As a minimum, a current (in all pertinent areas but in the event in which the crew is receiving training) and qualified USAF HH-60G instructor pilot (IP) will occupy a pilot's seat. (T-2) Exception: Units who attend the High-Altitude Army National Guard Aviation Training Site course and fly on USAF aircraft are not required to have an USAF HH-60G IP at a set of controls when authorized by the unit commander in accordance with DAFMAN 11-401.

2.3.1. The following familiarization training will be taught by a current and qualified Air Force HH-60G instructor before flight operations are conducted:

2.3.1.1. Hands-on egress training. (T-2)

2.3.1.2. Flight manual procedures review with emphasis on limitations and emergency procedures. (T-2)

2.3.1.3. Series-specific instrument procedures. (T-2)

2.3.1.4. Cockpit familiarization. (T-2)

2.3.1.5. Air Force crew resource management (CRM) and checklist procedures. (T-2)

2.3.2. Document training completion on a memorandum for record (MFR) or AF Form 1522, ARMS Additional Training Accomplishment Report, and retain locally until the applicable training is complete. (T-3)
2.4. **Senior Officer Courses.** Senior officers whose position requires operational flying in the HH-60G will complete the appropriate formal training course. *(T-2)* Guidance on requirements can be found in AFMAN 11-202V1 and MAJCOM supplements.

2.4.1. HH-60G Key Staff Course. This course provides basic orientation to senior officers who supervise/oversee flying operations for aircraft in which they are not qualified. Completion of this course does not establish a qualification or currency requirement, and graduates will fly with an IP on all sorties. *(T-2)*

2.4.1.1. Prerequisites. Reference the current SOI.

2.4.2. Non-rated Senior officers who supervise or oversee flying operations of the HH-60G may receive in-unit familiarization training and will observe operations from the cabin. *(T-2)*
Chapter 3

MISSION QUALIFICATION TRAINING, LOCAL MISSION QUALIFICATION TRAINING AND MISSION CERTIFICATION

3.1. Mission Qualification Training. MQT begins at the FTU and provides the training necessary to initially qualify or re-qualify aircrew members to perform the aircraft mission. Upon completion, aircrew members attain BMC or MR status.

3.1.1. Method. The primary method of completion is to attend the appropriate formal training course listed in the ETCA. When attendance is not practical or no quotas exist, units may request an approval to conduct SMT in accordance with Attachment 3. Note: Ensure initial NVG ground training is conducted in accordance with AFMAN 11-202V1.

3.1.2. MQT Prerequisites. Reference the current SOI.

3.2. Local Mission Qualification Training. LMQT integrates first assignment HH-60G crewmembers into their first operational assignment and bridges the gap between MQT conducted at the FTU and what is required of a CMR Airman. LMQT also provides those experienced crewmembers that PCS from another unit an introduction into daily flying operations and familiarization of the local flying area at the new unit. See paragraph 3.2.5 for personnel that PCS as a CMR or BMC aircrew member.

3.2.1. Method: In-unit using MAJCOM approved training plans and SOI. Approved non-FTU training plans and SOI are posted on the ACC/A3JO website (https://usaf.dps.mil/sites/ACC-A3/A3J-PR/A3JO/SitePages/Home.aspx). An instructor will conduct all LMQT instruction in the respective crew position unless otherwise noted in the training plan or SOI. (T-2)

3.2.2. Prerequisites: Qualified HH-60G crewmember.

3.2.3. Restrictions: Aircrew will not fly unsupervised until LMQT is complete. (T-2) Exception: SQ/CCs may authorize limited flights provided members are current and specific LMQT training required for the sortie is complete.

3.2.3.1. Aircrew in units north of 60° North latitude who are scheduled to complete LMQT during the summer months (April through September) have until 31 October to complete the required night or NVG training events. The unit commander may approve crewmembers that are not LMQT complete for night or NVG events as MR for local area flight training only. Note: Members will gain night or NVG currency if assigned TDY or deployed south of 60° North latitude. (T-3)

3.2.3.2. Aircrew assigned to units that have landing time restrictions defined in their Aeronautical Information Publication are automatically granted a 60-day extension for the completion of LMQT. The extension is granted if the aircrew are scheduled to complete LMQT during the months where a 2.0 hour NVG sortie is unattainable due to period of darkness and foreign defined night landing time conflicts.

3.2.3.3. Complete LMQT no later than 90 calendar days after the crewmember’s first training day at the gaining operational unit (ARC: no later than 180 days from date of the first flight). LMQT training will start on the first training workday after completing base in-processing and/or permissive TDY. (T-3) First Term Airman Center training time does not count against the 90-day LMQT requirement. (T-3)
3.2.4. Aircrew will maintain BMC status upon arrival from the FTU or requalification until completing LMQT. (T-3)

3.2.5. Personnel that PCS as a CMR or BMC aircrew member maintain CMR or BMC status upon arrival at their next duty station. For these personnel, LMQT is used to train to unit specific tasks but will not affect CMR or BMC status.

3.3. TDY Aircrew Members. Unit commanders will establish familiarization requirements for higher headquarters supervisory personnel and standardization & evaluations personnel. (T-2) Similar requirements should be established for TDY aircrew members required to conduct specific operational missions or administer training or evaluation flights. These crewmembers will familiarize themselves with the local environment to the maximum extent practical before their first flight. (T-3)

3.4. Mission Certification. CAF SQ/CCs will certify crewmembers as BMC or CMR upon completion of training requirements. (T-2)

3.4.1. Basic Mission Capable Certification. Certification as BMC requires the following:

3.4.1.1. Completion of all BMC-related ground training in accordance with the RTM. (T-2) Training missions may be flown before completing all items listed, provided grounding events are accomplished.

3.4.1.2. Completion of all BMC-related flying training in accordance with the RTM. (T-2) SQ/CCs may allow crewmembers to fly unsupervised before all ground training is complete provided remaining ground training does not mandate supervision and will not affect mission accomplishment.

3.4.2. Combat Mission Ready Certification. Certification as CMR requires the following:

3.4.2.1. Completion of all CMR-related ground training in accordance with the RTM. (T-2) Individual will be current for all events which affect CMR status. (T-2)

3.4.2.2. Completion of all CMR-related flying training in accordance with the RTM. (T-2) Individual will be current for all events which affect CMR status. (T-2)

3.4.2.3. Qualification or certification in any specialized training required for CMR status. (T-2)

3.4.2.4. Meet 1-month or 3-month lookback at the CMR sortie rate. (T-2)
Chapter 4

CONTINUATION TRAINING

4.1. General. This chapter, combined with the MAJCOM RTM defines minimum ground and flying training requirements for crewmembers. CT provides aircrew the training necessary to maintain flying proficiency and consists of two aspects. The first involves training in the basic flying skills necessary to ensure the safe operation of the aircraft (non-RAP). The second consists of specific mission-related training required to be proficient in the unit's assigned missions (RAP).

4.2. Ground Training. Ground training will be accomplished in accordance with the RTM, ancillary training requirements, and this manual. (T-2) The RTM establishes event frequency, identifies grounding events, and reflects if mission status is affected.

4.2.1. Units may credit ground training accomplished during IQT and LMQT toward CT requirements for the training cycle in which it was accomplished. Note: SQ/CCs will determine mobility ground training requirements for aircrew members assigned to training and test coded units or API-8/D positions. (T-3)

4.2.2. Event descriptions and amplifying guidance are listed in the RTM.

4.3. Flying Training. Aircrew will accomplish flying training requirements applicable to their individual crew position as specified in the RTM. (T-2) BAQ-only aircrew will maintain currency in applicable events noted as BAQ in flying training tables. (T-2) Failure to accomplish flying requirements may affect aircrew status and require additional training.

4.3.1. Crewmembers assigned/attached to training or test-coded units will accomplish the requirements as shown in the RTM for those events that they are qualified and certified as required. (T-3) Failure to accomplish requirements will not affect instructor status but will require training as determined by the SQ/CC. Additionally, the SQ/CC will determine which requirements listed in the RTM will be maintained by assigned/attached aircrew members. (T-3)

4.3.2. Event descriptions and requirements are listed in the RTM.

4.3.3. Logging Flying Currency in Simulators. Pilots and SMAs may log events in the simulator as allowed per the RTM.

4.3.4. Regaining Currency in a Simulator. Pilots and SMAs may log events in the simulator as allowed per the RTM. Minimum supervision required is defined in the RTM.

4.3.5. Simulator Crew Complement. Simulator crews will consist of the standard crew complement for the type of mission being flown to credit RAP events or sorties. (T-3) SQ/CC or DO will establish crew complement guidance for crews to conduct proficiency training not intended to accomplish RAP. (T-3)

4.4. Special Categories.

4.4.1. Flight Surgeon.

4.4.1.1. Flight surgeons whose primary assigned aircraft is the HH-60G will complete the following ground training requirements:

4.4.1.1.1. Aircrew Flight Equipment Familiarization. (T-2)
4.4.1.2. Emergency Egress Training, Non-Ejection. (T-2)

4.4.1.3. Aircrew Flight Equipment Training. (T-2)

4.4.1.4. Underwater Egress Training and Helicopter Emergency Escape Device (N/A AETC). (T-2)

4.4.1.2. Flight Training. Units will ensure flight surgeons receive adequate supervision and instruction when flying on unit assigned aircraft. (T-3) A flight surgeon’s initial HH-60G flight will include a briefing emphasizing crew coordination, communications and the location/use of aircraft emergency equipment. (T-3)

4.4.1.3. Flight surgeon flying rates and requirements guidance is provided in AFMAN 11-202V1.

4.4.2. MAJCOM/Numbered Air Force API-8/D aircrew. Guidance on attaching higher headquarters (HHQ) aircrew to a flying unit is provided in DAFMAN 11-401. Those HHQ aircrew maintaining BMC status are exempt from specialized training programs within authorized mission areas and are not required to meet monthly lookback sortie requirements in accordance with the RTM.

4.4.3. RegAF Crewmembers Flying with ANG and AFR Units. RegAF crewmembers other than assigned advisors are authorized to fly with reserve component units under restrictions identified in DAFMAN 11-401. Each crewmember will present documentation summarizing currencies and qualifications to the unit where flying is performed. (T-2)

4.5. HH-60 Certifications. Aircrew may be certified in the HH-60G if qualified in the HH-60W, provided the following:

4.5.1. Aircrew will be current and qualified in the HH-60G before attaining HH-60W qualification. (T-2) Exception: After receiving HH-60W qualification, ARC may use MAJCOM approved difference training syllabus to attain HH-60G certification.

4.5.2. Aircrew successfully complete HH-60W qualification syllabus.

4.5.3. SQ/CCs will document HH-60G certification on AF Form 4348, USAF Aircrew Certifications. (T-2)

4.5.4. Aircrew will maintain currency in both series as outlined in applicable MDS Vol 1 and RTMs. (T-2) Failure to maintain qualification in the HH-60W will cause loss of certification in the HH-60G. (T-2) Loss of currency in the HH-60G may be regained in accordance with paragraph 4.6.

4.5.5. Certifications attained in the HH-60G may be carried forward to the HH-60W at the SQ/CC discretion.

4.6. Re-Currency Training. Training required whenever an aircrew member does not meet a currency requirement of this manual.

4.6.1. Loss of Currency (up to 6 months). Failure to maintain currency as outlined in the RTM, results in a loss of currency for that sortie or event. The sortie or event may not be performed except for the purpose of regaining currency.

4.6.1.1. Unless specifically noted otherwise, crewmembers are non-current the day after event currency expires.
4.6.1.2. To regain currency, delinquent events will be demonstrated to the satisfaction of an instructor or flying supervisor current in the event. *(T-3)* The SQ/CC may direct additional training as required. Supervision requirements are defined in the RTM.

4.6.1.3. When an entire squadron has lost currency in an event, SQ/CCs may authorize two non-current instructors to perform the event.

4.6.1.3.1. The two instructors must have previously been qualified or certified in the event and have gone non-current.

4.6.1.3.2. SQ/CCs should consider individual instructor experience, as well as other associated risk factors.

4.6.2. Loss of Currency (exceeding 6 months).

4.6.2.1. Loss of currency for events identified in the RTM in excess of 6 months results in the loss of qualification/certification. *(T-1)* Notify squadron standardization & evaluations of affected personnel immediately.

4.6.2.2. Loss of currency exceeding 6 months but less than 36 months for instructor certified events results in loss of certification. Crewmembers will accomplish training as directed by the SQ/CC and re-certification by an instructor. *(T-3)*

4.6.2.3. Loss of currency exceeding 36 months for instructor certified events results in loss of certification. Crewmembers will accomplish training as outlined in the training plan SOI followed by recertification. *(T-2)*

4.6.3. Currency for Training North of 60° North Latitude. Aircrew members assigned to units north of the 60° parallel will handle night/NVG currency as follows:

4.6.3.1. Only day sortie and event currencies from 1 April to 30 September need to be maintained. Consider all experienced crewmembers current for night sorties and events on 1 October providing day currencies have been maintained. Inexperienced aircrew members will regain night currency by demonstrating proficiency in delinquent sorties and events to an instructor. *(T-3)*

4.6.3.2. NVG currency will be regained by 31 October. *(T-3)* To regain currency, the most appropriate instructors, as selected by the SQ/CC, will fly an NVG route. *(T-3)* Other non-current crewmembers will regain currency by demonstrating proficiency to an instructor. *(T-3)*

4.6.4. For locations outside the continental United States (OCONUS) during months where local night flying restrictions prevent NVG sorties of suitable duration or quality, SQ/CCs may grant a 60-day extension to NVG currencies.

4.7. N-BMC and N-CMR Regression. Aircrew may be regressed to N-BMC or N-CMR for one or more of the reasons listed in the following paragraphs.

4.7.1. While N-BMC or N-CMR, the SQ/CC will determine the type of missions aircrew may perform and supervision required. *(T-3)*
4.7.2. Units will track regression of all aircrew using the unit certification document or approved unit developed product. *(T-3)*

4.7.3. Regression for Loss of Currency. Currency status for the purpose of tracking and reporting regression will be determined by units on the first duty day of each month. *(T-3)*

4.7.3.1. Aircrew delinquent for a ground training event affecting BMC or CMR status will be regressed to N-BMC or N-CMR. *(T-3)* Crewmembers will accomplish the required ground training in accordance with governing directives prior to recertification. *(T-3)*

4.7.3.2. Loss of Flying Training Currency. Loss of currency in a flight training sortie or event affecting BMC or CMR status will result in regression to N-BMC or N-CMR. *(T-3)* Crewmembers will regain currency in the delinquent sortie or event prior to being recertified as CMR. *(T-3)* Note: N-BMC and N-CMR crewmembers may fly unsupervised on continental United States (CONUS) and OCONUS missions if delinquent events are not flown and are not required for mission accomplishment. OG/CC approval is required for other than local, routine or non-contingency missions.

4.7.4. Regression for Failure to Meet RAP Lookback. The 1-month and 3-month RAP lookback sortie requirements (rates) will be defined in the RTM. Both 1-month and 3-month sortie lookback totals will be calculated on the first duty day of each month for both BMC and CMR aircrew. Only designated RAP sorties and contingency operations sorties may be used to determine lookback.

4.7.4.1. Lookback computations for new aircrew members begin following completion of LMQT. New aircrew members who have been mission certified for less than 3 months will meet 1-month lookback to maintain status until a 3-month lookback is established. *(T-3)* SQ/CCs may apply probation rules if a new aircrew member fails to meet 1-month lookback while establishing 3-month lookback.

4.7.4.2. Failure to Meet 1-Month or 3-Month Lookback. If a BMC or CMR aircrew member does not meet 1-month RAP lookback requirements, a review will be made of their 3-month RAP lookback requirements. *(T-3)* If the 3-month lookback has been met, aircrew may, at SQ/CC discretion, remain in BMC or CMR status. If an aircrew member fails to meet the 3-month lookback requirement, SQ/CCs may either place the crewmember in probation status for one month or regress the crewmember to N-CMR or N-BMC. Reference Figure 4.1.

4.7.4.3. Probation. If SQ/CC chooses probation, the aircrew member will reestablish a 1-month RAP lookback at the end of the probation period to remain BMC or CMR. *(T-3)* Failure to establish a 1-month RAP lookback at the end of the probation period will result in regression to N-BMC or N-CMR. *(T-3)*

4.7.5. CMR and BMC crewmembers regressed to N-CMR or N-BMC will complete a SQ/CC approved recertification program. *(T-3)* Upon completion of the program, crewmembers will meet 1-month RAP lookback prior to recertification as CMR or BMC. *(T-3)* Missions and events accomplished during the recertification program apply toward monthly and training-cycle RAP requirements.

4.7.6. For aircrew members who do not meet lookback requirements throughout the training cycle, the SQ/CC may elect to initiate the following actions:
4.7.6.1. Remove the aircrew member from active flying status.

4.7.6.2. Remove the aircrew member from a CMR manning position.

4.7.6.3. Place aircrew member in a commander directed training program to regain CMR status.

**Figure 4.1. RAP Lookback Flow.**

4.7.7. Regression for Failure of a Periodic Evaluation. Aircrew members who fail a periodic evaluation will regress to N-CMR or N-BMC, as applicable. (T-3) BMC or CMR will be regained upon successful re-accomplishment of evaluation unless additional training is deemed appropriate by the SQ/CC or SQ/DO. (T-3)

4.8. **End-of-Cycle Requirements.** Aircrew who fail to complete RTM-defined, end-of-cycle sortie and/or event requirements may require additional training depending on the type and magnitude of the deficiency. Guidance for reporting training shortfalls is found within the RTM. End-of-cycle training requirements are based on the aircrew members experience level on the last day of the current training cycle.

4.8.1. Failure to Meet End-of-Cycle Total RAP Sortie Requirements. Aircrew failing to meet end-of-cycle total RAP sortie requirements may continue at CMR or BMC if both 1- and 3-
month RAP lookback requirements are met and sortie deficiencies are deemed insignificant by the SQ/CC. If the SQ/CC determines the sortie deficiency is significant and lookback is not met, the crewmember will regress to N-CMR or N-BMC. (T-3) To regain CMR or BMC status, aircrew will complete a SQ/CC approved recertification program. (T-3)

4.8.2. Failure to Meet End-of-Cycle RAP Event Requirements. Aircrew failing to meet end-of-cycle RAP event requirements (with authorized proration) will regress to N-BMC or N-CMR. (T-3) Prior to CMR or BMC recertification, aircrew will complete all deficient events and any additional training as determined by the SQ/CC or SQ/DO. (T-3) Remedial events may count towards total requirements for the new training cycle.

4.8.3. Failure to Meet End-of-Cycle Special Capabilities and Qualifications. The SQ/CC will determine if shortfalls warrant loss of special capability certification and regression to N-CMR/N-BMC. (T-3)

4.9. Proration of End-of-Cycle Training Requirements. The SQ/CC may prorate training requirements for crewmembers when DNIF, emergency leave, non-flying TDYs, or non-flying exercises preclude training for a portion of the training cycle. Additionally, ARC members may be allowed proration when training interferes with a member’s mandatory training for civilian employment. Do not prorate until the end of the training cycle. Ordinary leave will not be considered as non-availability. (T-2) Extended bad weather or other environmental factors that preclude the unit from flying for more than 15 consecutive days may be considered as non-availability. Commanders will not prorate for time deployed for contingency operations unless the individual(s) were assigned to non-flying positions or if flight was denied during contingency operations. (T-2)

4.9.1. Proration is based on cumulative days of non-availability for flying during the training cycle. Add separate cumulative non-availability events together for the total approved proration. Use Table 4.1 to determine the number of months to be prorated based on cumulative calendar days of non-availability.

4.9.2. If IQT is completed after the start of the training cycle, prorate training requirements for availability following completion of formal training.

4.9.3. Prorated numbers resulting in fractions of less than 0.5 will be rounded to the next lower whole number, but no requirement may be prorated below one. (T-2)

4.9.4. Newly assigned or converted crewmembers achieving CMR or BMC after the 15th of the month are in CT on the first day of the following month for proration purposes. The prorated share of RAP sorties will be completed in CT.

4.9.5. NVG and Helicopter Air-to-Air Refueling accomplished during IQT may be credited toward prorated CT requirements if accomplished during the cycle in which the crewmember was declared CMR or BMC, unless specified otherwise by the MAJCOM.

4.9.6. An aircrew member’s last month on station prior to departing PCS may be prorated provided 1-month’s proration is not exceeded. For reporting purposes, individuals departing PCS may maintain their previous aircrew status during a period of 60 days from the date of last flight, or until loss of currency, port call date, or sign in at new duty station.

4.9.7. CMR crewmembers who attend FTU or USAFWS courses in TDY status or who participate in flying contingency operations may be reported throughout the TDY as CMR.
Upon return, apply proration rules to determine any remaining training cycle requirements (see Table 4.1.).

4.9.8. Contingency Operations. All flying activity will be documented in ARMS if the event meets requirements of this manual and the RTM regardless of the location flown. (T-2) Aircrew should not log a mission flown or event accomplished during contingency operations toward RAP if it does not meet the requirements outlined in this manual and the RTM. Missions and events will be tracked in accordance with RTM guidance.

Table 4.1. Proration Allowance.

Example: An aircrew member was granted 19 days of emergency leave in January and attended NCOA in residence from March through April for 57 consecutive calendar days. The SQ/CC authorized a total of 3 months proration from the training cycle (1 month for emergency leave and 2 months for NCOA).
Chapter 5

UPGRADE AND SPECIALIZED TRAINING

5.1. General. This chapter specifies minimum training requirements for upgrade and specialized training. Currency requirements for specialized events are identified in the RTM.

5.1.1. Squadron commanders may convene or delegate convention of an upgrade board in order to identify aircrew members for instructor, MP, flight lead (FL), and other upgrades. If convened, the board will consider the upgrade candidates following qualities: judgment, technical knowledge, flying proficiency, flying experience and personal qualities (patience, tact, understanding, and a desire to instruct others). (T-3)

5.1.2. Upgrade and specialized training listed in this chapter will follow a MAJCOM approved training plan and SOI. ACC approved training plans and SOIs are posted on the ACC/A3JO website (https://usaf.dps.mil/sites/ACC-A3/A3J-PR/A3JO/SitePages/Home.aspx). When MAJCOM approved training plans or SOIs do not exist, units may develop products. Submit these products to ACC/A3J, USAFE/A3A, PACAF/A31, 19AF/A3M, AFRC/A3J, or ANG/A3J, as required, for approval prior to implementation. (T-2)

5.1.3. Break-In-Training. Reference the training plan or SOI for specific guidance regarding a break-in-training. In the absence of training plan or SOI guidance, use the following: If students experience extended periods without flying (at least 7 calendar days or 35 for ARC) the SQ/DO or designated representative may approve up to two more non-graded sorties. SQ/CCs may approve up to two more non-graded sorties. ARC units may require additional training resources from their MAJCOM to complete required training by extending current set of orders.

5.2. Basic Aircraft Commander (BAC) Certification. Enables SQ/CCs to certify FPs to command an aircraft and crew in a day or night non-tactical environment.

5.2.1. Method: SQ/CC certifies upon completion in accordance with the approved training plan and SOI. Document certification via an AF Form 4324, Aircraft Assignment/Aircrew Qualification Worksheet, as outlined in paragraph 6.9. Squadron commanders will review each candidate’s progression through the training program and base BAC certification on demonstrated knowledge, judgment, maturity, crew interaction, mission management and professionalism. (T-3) Do not accept flying hours alone as criteria for any one or all qualities. (T-3)

5.2.2. Prerequisites: SQ/CC approval.

5.2.3. Restrictions: BAC pilots are authorized to act as the aircraft commander (AC) during the following events: non-tactical day, night, NVG ferry, cross-country flights, contact operations, remote sortie, non-live day water operations if certified, instrument sortie, and hot refuel operations. (T-1)

5.3. Mission Pilot Upgrade. In-unit upgrade program to qualify MCs as MPs.

5.3.1. Method: Completion of MAJCOM approved training plan and SOI followed by an evaluation in accordance with AFMAN 11-2HH-60GV2. SQ/CCs will review each candidate’s progression through the training program and base selection on demonstrated knowledge, judgment, maturity, crew interaction, mission management and professionalism. (T-3) Do not accept flying hours alone as criteria for any one or all qualities. (T-3)
5.3.2. Prerequisites: HH-60G MC Mission (MSN) qualification and flying time requirements identified in Table 5.1 are required prior to entering MP upgrade. (T-3)

Table 5.1. MP Upgrade Flying Time Requirements.

<table>
<thead>
<tr>
<th>HH-60 Time</th>
<th>Total NVG Time</th>
</tr>
</thead>
<tbody>
<tr>
<td>200 Hours</td>
<td>100 Hours</td>
</tr>
</tbody>
</table>

Notes:
1. Does not include “Other” time.
2. Any H-60 variant counts toward HH-60 time.
3. Time accrued at the FTU counts toward HH-60 time.

5.4. Aircrew Instructor Upgrade.

5.4.1. SQ/CCs will review each instructor candidate’s qualifications and select instructors based on their background, experience, maturity, and potential to instruct. (T-3) Note: HH-60W qualified instructors completing HH-60G conversion may complete their HH-60G Initial Instructor (INIT INSTR) evaluations in conjunction with their Initial Qualification (INIT QUAL), Instrument (INSTM), and MSN evaluations with SQ/CC approval.

5.4.2. Method: Formal course attendance listed in the ETCA. When attendance is not practical or no quotas exist, units may request an SMT approval to conduct in-unit qualification training. See paragraph 1.12.

5.4.3. Prerequisites: Initial instructor upgrade candidates will meet prerequisites listed in formal school syllabus and flying hour requirements established below. (T-2)

5.4.3.1. Mission IP Candidates. IP candidates will have accrued 100 hours of total primary or secondary time as an MP, of which 50 hours shall be primary time in design series aircraft and be Flight Lead certified. (T-3) The FTU SQ/CC will determine the minimum flight hours required for upgrade of FTU permanent-party exchange officer instructor candidates. (T-2)

5.4.3.2. Instrument/Qualification IP Upgrade (INSTM/QUAL IP). Also known as a “dash 1 IP”. IP candidates must have 75 hours primary/secondary time as an MP, of which 30 hours shall be primary time in design and series aircraft. (T-3) Exception: Previously helicopter qualified pilots (including foreign exchange officers) may be selected for upgrade once meeting experienced requirements for FP from Table 1.1. Upon qualification, the IP may instruct BAQ items identified in the RTM. Additionally, if certified, INSTM/QUAL IPs may instruct bambi bucket, sling load, day water operations, and FCF procedures. A syllabus waiver is required to execute the applicable portion of the FTU’s IP upgrade qualification SOI. (T-2) Note: An SMT approval is required if accomplishing an FTU SOI in-unit. See paragraph 1.12.

5.4.3.3. Instructor Special Mission Aviator Candidates. Minimum of 100 hours in an HH-60 and 300 hours total helicopter time, to include 100 hours total career vertical lift NVG time. Instructor candidates will be qualified in the mission, event and maneuver before instructing in the same mission, event and maneuver. (T-2)

5.5. Specialized Training and Certifications. SQ/CCs will select qualified crewmembers to maintain special certifications in order to meet DOC statement or unique mission requirements.
(T-3) Training is normally conducted in-unit after completion of LMQT and requires certification by a qualified instructor. Certifications carry over when upgraded to a higher qualification or level of responsibility. Recertification is not required when upgraded in the same crew position. **Exception:** Night water operations certification will not carry over when a pilot upgrades to instructor. Certification as a night water IP is required. (T-2)

5.6. **Certifications and Specialized Training Events.** The following section identifies certifications and specialized training events. Document certification via an AF Form 4348 in accordance with paragraph 6.9. The crew position in parenthesis after each event title lists who the certification is applicable to. “All” indicates that all crew positions are eligible.

5.6.1. **Additional Weapon System (GAU-2, GAU-18, or M-240) (SMA).** Certifies crewmembers on the operation and employment of a subsequent weapon system in accordance with T.O. 1H-60(H)G-1, *USAF Series HH-60G Helicopters*, and AFTTPs.

   5.6.1.1. Method: MAJCOM approved training plan or SOI. (T-2)

   5.6.1.2. Prerequisite: Current and qualified on an HH-60G weapon system. (T-2)

5.6.2. **Bambi Bucket (All).** Certifies crewmembers to operate the bambi bucket system in accordance with applicable AFIs, AFMANs, AFTTPs, and technical orders.

   5.6.2.1. Method: MAJCOM approved training plan or SOI. (T-2)

   5.6.2.2. Prerequisite: Sling load and day water operations certification. (T-2)

5.6.3. **Basic Helicopter Maneuvering (BHM) (All).** BHM certifies crewmembers to participate in air-to-air training against an HH-60. This is a one-time certification without an associated currency requirement.

   5.6.3.1. Method: Use USAFWS SOI. Training will be conducted by a certified IP for pilots and a certified instructor flight engineer (IF) for SMAs. (T-2)

   5.6.3.2. Prerequisite: None.

5.6.4. **Helicopter Air Combat Maneuvering (ACM) (All).** ACM certifies crewmembers to participate in air-to-air training against both fixed wing and rotary wing threats. This is a one-time certification without an associated currency requirement.

   5.6.4.1. Method: Use USAFWS SOI. Training will be conducted by a certified IP for pilots and a certified IF for SMAs. (T-2)

   5.6.4.2. Prerequisite: BHM certification.

5.6.5. **Day Water Operations (All).** Certifies crewmembers to perform water deployment and recovery of personnel using a variety of techniques/devices during day conditions in accordance with applicable AFIs, AFMANs, AFTTPs, and technical orders.

   5.6.5.1. Method: MAJCOM approved training plan and SOI. (T-2)

   5.6.5.2. Prerequisite: None.

5.6.6. **Engine Run (SMA).** Certifies SMAs to occupy a seat with controls and perform duties during engine ground runs with a current and qualified pilot in the opposite seat. This event is a one-time certification without an associated currency requirement.

   5.6.6.1. Method: MAJCOM approved training plan and SOI. (T-2)
5.6.6.2. Prerequisite: None.

5.6.7. **Fast Rope Insertion/Extraction System (FRIES)** (All). Certifies crewmembers to perform FRIES operations. This event is a one-time certification without an associated currency requirement.

5.6.7.1. Method: MAJCOM approved training plan and SOI. (T-2)

5.6.7.2. Prerequisite: None.

5.6.8. **Fixed Forward Fire** (All). Certifies crewmembers to perform fixed forward fire operations in accordance with current HH-60G AFTTPs.

5.6.8.1. Method: MAJCOM approved training plan and SOI and the following:

5.6.8.2. Prerequisite (SMA): Certified and current on the HH-60G aircraft mounted weapon to be employed.

5.6.9. **Flight Lead Upgrade (FLUG)** (MP). Certifies current and qualified MPs to command a formation of two or more aircraft. **Note:** IPs are authorized to instruct FLUG from another aircraft in the formation.

5.6.9.1. Method: MAJCOM approved training plan and SOI. (T-2)

5.6.9.2. Prerequisite: Candidates will have at least 50 flying hours of primary/secondary time since certification as an MP prior to entering the FL upgrade. (T-3)

5.6.10.1. Method: MAJCOM approved training plan and SOI. (T-2)

5.6.10.2. Prerequisite: None.

5.6.11. **Instructor Pilot NVG Water Operations.** Certifies IPs to instruct water deployment and recovery of personnel using a variety of techniques and devices under NVG conditions.

5.6.11.1. Method: MAJCOM approved training plan and SOI. (T-2)

5.6.11.2. Prerequisite: IP certified in night water operations. (T-2)

5.6.12. **Live Alternate Insertion/Extraction (AIE)** (SMA). Certifies crewmembers that were not certified on Live AIEs at the FTU to deploy or recover personnel using the hoist, fast rope, rappel, rope ladder will accomplish a one-time certification (per device). (T-1)

**Exception:** Aircrew members previously certified for “live” AIE operations in other USAF rotary wing aircraft do not require live certification in the HH-60G.

5.6.12.1. Method: In-unit training conducted by a qualified instructor. Training will consist of ground-training covering hand signals, limitations and restrictions, hazards, day and night operations, and cabin and AIE preparation using: flight manual, AFMAN 11-2HH-60GV3, *HH-60G Operations Procedures*, and AFTTP 3-3.HH-60G, *Combat Aircraft Fundamentals*. Flight training will consist of actual deployment or recovery of qualified personnel utilizing each device in either day or night operations. (T-2)

5.6.12.2. Prerequisite: Qualified on specific AIE device. (T-2)
5.6.13. **NVG Water Operations (All)**. Certifies crewmembers to perform water deployment and recovery of personnel using a variety of techniques/devices under NVG conditions.

5.6.13.1. Method: MAJCOM approved training plan or SOI. (T-2)

5.6.13.2. Prerequisite: Day water operations certified. (T-2)

5.6.14. **Personnel/Equipment Delivery (SMA)**. Certifies crewmembers to deploy parachute operations from the HH-60G. This event is a one-time certification without an associated currency requirement. Training will be completed under the supervision of a current and qualified jumpmaster or IF. (T-2)

5.6.14.1. Method: MAJCOM approved training plan or SOI. (T-2)

5.6.14.2. Prerequisite: None.

5.6.15. **PR Functional Team Lead (P)**. Certifies flight leads to lead a Personnel Recovery Task Force in Combat Search and Rescue (CSAR) mission planning and execution.

5.6.15.1. Method: MAJCOM approved training plan and SOI. (T-3)

5.6.15.2. Prerequisite: FLUG complete.

5.6.16. **Shipboard Operations (All): Day Single Spot, Day Multi Spot, NVG Single Spot, NVG Multi Spot**. Certifies crewmembers to perform day and NVG landings on capable ships/vessels. This event is a one-time certification without an associated currency requirement for SMAs.

5.6.16.1. Method: MAJCOM approved training plan or SOI and in accordance with the relevant memorandums of understanding (MOU), Army/Air Force Deck Landing Qualification and US Army Simulators Authorized for use with the Army/Air Force Deck Landing Qualification between the USAF, United States Army, and United States Navy. (T-0) Note: Field deck landing patterns can be accomplished to any area that suitably replicates shipboard deck markings.

5.6.16.2. Prerequisite: None.

5.6.17. **Sling Load Operations (All)**. Certifies crewmembers to conduct sling operations in accordance with applicable AFIs, AFMANs, AFTTPs and technical orders.

5.6.17.1. Method: MAJCOM approved training plan or SOI. (T-2)

5.6.17.2. Prerequisite: None.

5.6.18. **Tethered Duck (T-Duck) (SMA)**. Certifies crewmembers to perform deployment of a deflated and rolled combat rubber raiding craft and motor along with personnel from the cabin of an HH-60G. This event is a one-time certification without an associated currency requirement.

5.6.18.1. Method: MAJCOM approved training plan or SOI. (T-2)

5.6.18.2. Prerequisite: Day water operations certified or night water operations certified if performed at night. (T-2)

5.7. Pre-Deployment Spin-up Training. Training conducted prior to deployments or contingency operations (if time permits) designed to ensure crewmembers can conduct missions in support of the expected tasking. Units are responsible for contacting the appropriate command or agency to determine expected mission requirements (e.g., 561st Weapons Squadron, unit prep message, DOC statement, component-numbered Air Force priorities, etc.). Training will be tailored to meet tasking requirements and emphasis will be placed on tasks, procedures, and equipment not accomplished or utilized during daily operations. (T-2) When training is required for a system not available to crewmembers, the unit commander will use all available resources (e.g., FTU courseware, computer-based training, etc.) to accomplish required training. Consideration should be given to a “bundled” academic and flying training program incorporating refresher weapons and tactics training, aircrew intelligence training, verification planning exercise (reference Attachment 2 for a briefing outline), and a personnel recovery mission appropriate to the unit tasking.

5.7.1. Training plan and SOIs will be designed by the unit and approved by the OG/CC. (T-3) Units will develop a process to document individual training completion prior to deployment
or contingency operations. (T-3) SQ/CCs will ensure participating aircrew are ready to deploy and are able to conduct all missions in support of expected tasks. (T-3)

5.7.2. If a crewmember is not assigned to the supported squadron, the deploying SQ/CC will determine the amount of spin-up training required for each attached and augmenting member based on the level of proficiency, currency, qualification and experience. (T-3) The augmentee's SQ/CC is responsible for ensuring the spin-up training is accomplished prior to the member’s deployment. (T-3)

5.7.3. Ground Training. Accomplish ground training in accordance with ground training requirements table located in the current RTM. Units may credit ground training accomplished during IQT toward CT requirements for the training cycle in which it was accomplished.

5.7.4. Flying Training. Training will be tailored to ensure deploying crewmembers are current, qualified, and proficient in expected mission’s tasks. (T-3) This training should be executed utilizing current planning, briefing, and employment procedures for the deployed area of responsibility.
Chapter 6

AIRCREW TRAINING RECORDS

6.1. General. This chapter specifies procedures for the management of aircrew training records and the documentation of in-unit training. MAJCOMs may direct the use of different training documentation systems, forms and standards. Units executing AETC SOI via SMT will utilize forms directed by the syllabus. (T-2) In this case, the guidance in this chapter does not imply the need for duplicate training documentation and MAJCOM-specific guidance takes precedence.

6.2. Career Training Folder. Units will maintain a career-training folder for all assigned and attached crewmembers. (T-2) The use of MAJCOM-approved electronic career-training folders is authorized. For hardcopy career training folders, maintain in a secure area within the unit training office. (T-3) They will consist of the following:

6.2.1. Hardback binder with the member’s name clearly posted on the front and spine. (T-2)

6.2.2. Divide the folder into the following sections:

6.2.2.1. Section I, Table of Contents. Clearly list each item contained within the binder and the section or tab of the item’s location. (T-2)

6.2.2.2. Section II, Record of Annual Review. Develop a record to track annual review of the folder and its contents. (T-3) At a minimum the record will contain the following:

6.2.2.2.1. Date of review. (T-2)

6.2.2.2.2. Name and office symbol of the reviewing official. (T-2)

6.2.2.2.3. Comments or discrepancies noted during the review process. (T-2)

6.2.2.3. Section III, Archived Training Records. Maintain a copy of all completed/closed-out FTU and in-unit training records (e.g., qualifications, certifications, specialized mission training). (T-2)

6.2.2.3.1. All graduate-level training records completed after 1 July 04 will be on file.

6.2.2.3.2. A separate numbered tab will be used to distinguish each record. (T-2) File each record in chronological order with the most recent on the bottom.

6.2.3. During formal inspections, career-training folders may be inspected to ensure compliance with this manual.

6.2.4. Annual Review. Career-training folders will be reviewed annually by the training section and document review completion in Section II. (T-2) Comments or discrepancies that require an expanded explanation will be documented on an MFR signed by the unit training officer. (T-2) File MFRs behind the record of annual review in chronological order with the most recent on the bottom. (T-2)

6.2.5. Career Training Folder Disposition.

6.2.5.1. PCS to active flying unit: The training section will make a paper or electronic copy of Sections I and II, seal the career training folder in an envelope and return it to the member for delivery to the next duty station. Exception: If electronic transmission to
gaining unit is feasible, hand-carry delivery is not necessary. Maintain the copies of Section I and II for six months and then destroy. (T-2)

6.2.5.2. PCS to a non-flying position: The training section will make a paper or electronic copy of Sections I and II, seal the career training folder in an envelope and return it to the member. (T-2) Maintain the copies of Section I and II until arrival at the next flying assignment or five years (whichever occurs first). (T-2)

6.2.5.3. Retirement or Separation. Return the career training folder to the individual. (T-2) When individuals are not available to receive their records or choose not to receive them, retain for six months from the service termination date and then destroy. (T-2)

6.3. **Active Training Records.** Units will maintain a training folder for each member in an active training program that leads to a qualification, certification, or corrects deficiencies identified during an evaluation. (T-2) The unit operations officer may waive the training folder requirement if corrective action or additional training is limited. The use of MAJCOM electronic means is authorized. Other electronic means may be used if certified by the MAJCOM. **Note:** Active training records will be maintained in a location readily accessible to instructors, supervisory personnel, and the individual aircrew member. (T-2)

6.3.1. The training record will consist of an AF Forms 4109, SOF/CSAR Aircrew Training Record. (T-2) A binder or multipart folder may be used in the event adequate AF Form 4109s are not on hand. The AF Form 4109 will contain the following:

6.3.1.1. Entry into upgrade documentation. Document entry into upgrade through any of the following means: MFR, a copy of the upgrade board minutes signed by the unit commander or designated representative, or an entry in the candidate’s training folder signed by either the SQ/CC, SQ/DO or squadron or operations superintendent. (T-2)

6.3.1.2. Approved waivers. (T-2)

6.3.1.3. Course Flow/Prerequisite sheet located in the syllabus/training plan. (T-2)

6.3.1.4. AF Form 4110, Comments – SOF/CSAR Training Record. (T-2)

6.3.1.5. AF Form 4111, SOF/CSAR Training Record. (T-2)

6.3.2. Training Folder Operations Review. SQ/DOs will review active training folders quarterly. (T-2) This may be delegated to the enlisted operations superintendents. Flight commanders, flight chiefs, or squadron training representatives will conduct a monthly review. (T-2) Annotate monthly and quarterly reviews on the AF Form 4110. Squadron or operations superintendents may conduct reviews for CEAs.

6.3.3. Monthly reviews will ensure training is correctly documented, instructor write-ups adequately document student performance, and the trainee’s progression is satisfactory. (T-2)

6.3.4. Quarterly reviews should consist of a sampling of training documentation. The SQ/DO or operations superintendents shall ensure instructors and students are meeting standards and the unit training program is meeting unit goals and vision. (T-3)

6.4. **AF Form 4109, SOF/CSAR Aircrew Training Record.** A multi-part folder designed as a single source reference for training documents. This folder incorporates a ground training summary, flying training summary, and trainee and course identification on the inside covers.
Additionally, the back cover contains a breakdown of performance and knowledge levels used on the AF Form 4111. Use the following guidance for documentation:

6.4.1. GROUND TRAINING SUMMARY (Inside front cover). Record ground training events identified in the training plan and SOI to include any additional training conducted outside the normal course of instruction. (T-2)

6.4.1.1. DATE. Enter the date of the training event. (T-2)

6.4.1.2. TRAINING PERIOD. Enter the event identifier as specified in the training plan and SOI. (T-2)

6.4.1.3. STATUS. Enter overall grade in accordance with standards specified in the training plan and SOI. (T-2)

6.4.1.4. INSTRUCTOR/TRAINER (QUAL). Enter name of the instructor with aircrew qualification in parentheses, i.e., Jones (IP), Smith Evaluator SMA (EF), etc. (T-2)

6.4.1.5. TRAINING TIME. Record the duration of instruction for the training event. Do not include time associated with pre-briefing or debriefing. (T-2)

6.4.2. WRITTEN EVALUATIONS. Record results of written evaluations required by the training program. (T-2)

6.4.2.1. DATE. Enter the date that the evaluation was administered. (T-2)

6.4.2.2. TYPE. Enter the evaluation identifier as specified in the training plan and SOI. (T-2)

6.4.2.3. GRADE. Enter the grade in accordance with AFMAN 11-202V2 grading criteria. (T-2)

6.4.3. FLYING TRAINING SUMMARY (Inside back cover). Record flying training events identified in the training plan and SOI to include any additional training conducted outside the normal course of instruction including “X–rides” and sorties associated with breaks-in-training.

6.4.3.1. DATE. Enter the date that the training event was started. (T-2)

6.4.3.2. TNG PERIOD. Enter the training event identifier as specified in the training plan and SOI. (T-2)

6.4.3.3. STATUS. Enter overall grade in accordance with standards specified in the training plan and SOI. (T-2)

6.4.3.4. INSTRUCTOR/TRAINER (QUAL). Enter the name of the instructor with aircrew qualification in parentheses, i.e., Jones (IP), Smith (EF), etc. (T-2)

6.4.3.5. MISSION TIME (Training Time). Record the in-flight time that was dedicated to instruction and training for required event. (T-2)

6.4.3.6. CUM TIME (Mission Time). Record the cumulative total mission time for the scheduled event. (T-2)

6.4.4. PERFORMANCE EVALUATION SUMMARY. Record data on required evaluations including final evaluation and reevaluation (if applicable). (T-2)
6.4.4.1. DATE RECOMM. Record the date recommended for evaluation. (T-2)

6.4.4.2. TYPE EVALUATION. Enter AFMAN 11-202V2 evaluation description or identifier from the training plan and SOI. (T-2)

6.4.4.3. INSTRUCTOR/TRAINER (QUAL). Record the name of the instructor making the recommendation for the evaluation with aircrew qualification in parentheses (i.e., IP, EF, etc.). (T-2)

6.4.4.4. OPERATIONS REVIEW. SQ/CCs or SQ/DOs will accomplish a review of training prior to a flight evaluation being administered. Enter the initials of the reviewer indicating that a records review was accomplished. (T-2) Additionally, make an entry on the AF Form 4110. (T-2) May be delegated to Squadron or Operations Superintendents.

6.4.4.5. DATE EVAL. Record the date that the evaluation was completed. (T-2)

6.4.4.6. EVALUATOR. Record the name of the evaluator that administered the evaluation. (T-2)

6.4.4.7. GRADE. Record grade in accordance with AFMAN 11-202V2. (T-2)

6.4.5. Student Identification (outside edge of flying training summary). (T-2)

6.4.5.1. NAME/GRADE. Self-explanatory. (T-2)

6.4.5.2. AIRCREW POSITION. For aircrew members in a program designed to advance them to a higher crew position, enter the qualification to which they are upgrading. (T-2) For all other training, enter the crew position currently held. (T-2)

6.4.5.3. UNIT OF ASSIGNMENT. Enter unit where the training is taking place. (T-2)

6.4.5.4. TYPE OF TRAINING. Enter the training plan and SOI name. (T-2)

6.4.5.5. CLASS NUMBER/COURSE NUMBER. Not used.

6.5. Course Flow/Prerequisite. Form normally located in the MAJCOM developed syllabus and training plan and serves as a chronological record of completed training events. Use the following guidance for documentation:

6.5.1. NAME. Enter the student rank and name. (T-2)

6.5.2. DATE. Enter the date of the training event. (T-2)

6.5.3. INSTRUCTOR NAME. Enter name of the instructor with aircrew qualification in parentheses, i.e., Jones (IP), Smith (EF), etc. (T-2)

6.5.4. GRADE. Enter overall grade for the event. (T-2)

6.6. AF Form 4110. Used to record a narrative that summarizes training events, captures student performance, and administrative comments related to the training plan and SOI. Use the following guidance for documentation:

6.6.1. NAME. Enter the trainee’s rank, name, and crew position. For aircrew members in a program designed to advance them to a higher crew position, enter the qualification to which they are upgrading. For all other training, enter the crew position currently held. (T-2)

6.6.2. DATE. Self-explanatory.
6.6.3. TRAINING PERIOD. Enter the training event identifier as specified in the training plan and SOI. (T-2)

6.6.4. MISSION/PROFILE/COMMENTS/RECOMMENDATIONS. Record a narrative for each ground training event, simulator event, flying event and any additional information pertinent to the individual’s training (e.g., recommendations for proficiency advance, monthly/quarterly reviews, etc.). (T-2) Narratives for simulator and flying training events will comply with the following format:

6.6.4.1. PROFILE. List the Event ID, grade earned and event status, including reasons for incomplete training. (T-2) Include a brief description of weather, unique environmental factors and the mission profile of the sortie. (T-2) Record a summary of training completed, to include specific events, and the number of iterations where relevant. (T-2) The profile should be written so that the next instructor has no doubts of what was accomplished on the previous sortie and where to pick up remaining training. Anytime student performance does not meet event requirements document specific performance or actions that led to the grade. (T-2)

6.6.4.2. STRENGTHS. Record student’s strengths related to the documented event. (T-2) Identify useable, relevant strengths to build a picture of student progression for the next instructor. (T-2) If no strengths are identified, state “none noted.” (T-2)

6.6.4.3. WEAKNESSES. Record student’s weaknesses related to the documented event. (T-2) Identify specifics that will build a picture of the student’s proficiency level for the next instructor. (T-2) Include specific areas or performance related to a required proficiency level (RPL) in which the student must strive for improvement. (T-2) If no weaknesses are identified, state “none noted.” (T-2)

6.6.4.4. RECOMMENDATIONS. Each documented weakness will have an actionable and measurable recommendation related to not meeting a specific area or performance (e.g., “study AFMAN 11-2HH-60GV3 Chapter 6.9 – 6.14 to improve AIE knowledge”, not “study the V3”) (T-2) Instructor recommendations are designed to correct weaknesses, identify areas to concentrate on for the next training event and reinforce training received. (T-2) The last recommendation will include the next step for the student (e.g., “continue with training”, “proceed to evaluation”, “proficiency advance”). (T-2) The instructor or examiner making the entry will print their rank, name, crew position, and then sign above the entry. Include an entry below the signature block for the student’s initials and the next instructor or evaluators initials. (T-2)

6.7. AF Form 4111. These forms identify minimum events or maneuver information file (MIF) and RPL related to the training plan and SOI. Use the following guidance for documentation:

6.7.1. TRAINEE NAME. Self-explanatory.

6.7.2. CREW POSITION. For aircrew members in a program designed to advance them to a higher crew position, enter the qualification to which they are upgrading. (T-2) For all other training, enter the crew position currently held. (T-2)

6.7.3. COURSE/PHASE. Identify the course event identifier as specified in the training plan and SOI. (T-2)
6.7.4. PROGRAMMED TRAINING PROFILE NAME. List the event identifier as specified in the training plan and SOI and the syllabus-directed training time. (T-2)

6.7.5. ACTUAL TRAINING PROFILE. Record actual training time and the overall grade for the event use a slash to separate the two. (T-2)

6.7.6. TASK/TOPIC LISTING. List each MIF item number from the syllabus (if applicable) and a description of the task required (e.g., safety and judgment, lead and wing responsibilities, etc.) on a separate line. (T-2)

6.7.7. MIN EVENT. Identify the total number of occurrences an event must be completed (if applicable) before training can be considered complete; otherwise, leave blank. (T-2)

6.7.8. GR and P/K (Grade and performance/knowledge). Identify RPLs that will be attained for the listed task or topic. (T-2) Record completion by slashing through the item if the RPL is met. (T-2) If the RPL is not met or is exceeded, the actual RPL attained will be written over the preprinted number and letter. (T-2)

6.7.9. REQ PROF LEVEL. List the final RPL students must attain prior to being recommended for evaluation or certification. (T-2) One RPL should be listed for each MIF item or training event.

6.8. Training Record Close Out. Training records will be closed out upon successful completion of the training plan/SOI or when training is terminated for other reasons (failure to progress, extended DNIF, etc.). (T-2)

6.8.1. Conduct a review of the training record to verify course requirements were completed and that the trainee demonstrated satisfactory performance throughout the course. (T-2)

6.8.2. Document successful course completion by making an entry in the AF Form 4110 indicating that the training record was reviewed, the trainee met all course requirements in a satisfactory manner and certification, or qualification is awarded. (T-2) The entry will be signed by both the unit training officer and the unit ops officer. (T-2) Squadron or operations superintendents may sign the entry for CEAs.

6.8.3. Maintain the record within the active training folder until supporting records such as AF Form 4348, AF Form 8, Letter of Certifications (Letter of X’s), and ARMS updates are completed. Once all actions related to the additional certification or qualification are complete, move the record to the career training folder. (T-2)

6.8.4. Document termination of training by making an entry in the AF Form 4110 indicating the reason for termination. (T-2) The entry will be signed by both the unit training officer and the unit ops officer. (T-2) Squadron or operations superintendents may sign the entry for CEAs.

6.9. Documenting Aircrew Certifications. Certifications will be documented on an AF Form 4324. (T-2) Maintain the AF Form 4324 in the individual crewmember’s career training folder unless directed by standardization & evaluations guidance. (T-2)

6.10. Letter of Certifications (Letter of X’s). Units will maintain a Letter of X’s that provides the SQ/CC a summary document of assigned and attached aircrew certifications and qualifications. (T-2) In the absence of MAJCOM or local guidance, the Letter of X’s will be maintained as follows:
6.10.1. Minimum Items. Assigned and attached aircrew member’s rank, name, crew position, qualifications and certifications. (T-2)

6.10.2. Updates. The Letter of X’s will only be updated after the individual’s training is complete and the appropriate qualification or certification documentation has been signed and verified by the approving authority. (T-2)

6.10.3. Signature and Posting. The Letter of X’s will be published monthly and signed by the SQ/CC (or designated representative). (T-2) Electronic signatures are authorized. Once signed, maintain the certification document in a central location so that it is readily available to squadron supervision. (T-2) This document will be considered the “Master” and any pen and ink updates will be initialed by the SQ/CC (or designated representative). (T-2)

ADRIAN L. SPAIN, Lt Gen, USAF
Deputy Chief of Staff for Operations

Terms
Aircraft Commander—The aircrew member designated by competent authority as being in command of an aircraft and responsible for its safe operation and accomplishment of the assigned mission.

Bambi Bucket—Device suspended from the cargo hook designed to carry and deploy water in support of firefighting operations.

Basic Aircraft Qualified Aircraft Commander—Aircrew member designated by competent authority as being in command of an aircraft and responsible for its safe operation during the execution of BAQ missions identified in this AFMAN.
**Basic Aircraft Qualification**—The aircrew status identifier of an individual who has satisfactorily completed training prescribed to maintain the basic skills necessary to fly the unit aircraft. BAQ crewmembers are authorized to fly transition, instruments, supervised emergency procedures (EPs) and non-tactical unit missions to depicted and surveyed helipads, airports, and landing zones.

**Basic Mission Capable**—The aircrew status identifier of an individual who has satisfactorily completed MQT and LMQT but does not fly frequently enough to maintain MR status. Such crewmembers normally accomplish only that training required to remain familiar with the primary missions of their weapon system and unit. These crewmembers may also maintain special capabilities.

**Combat Mission Ready**—The aircrew status identifier of an individual who has satisfactorily completed MQT and LMQT and flies frequently enough to be competent in all aspects of unit operational missions. Such crewmembers normally accomplish enough training to remain proficient in the primary missions of their weapon system and unit. In addition, these crewmembers normally maintain special capabilities.

**Combat Search and Rescue**—All forces committed to a specific combat search and rescue operation to search for, locate, identify, and recover isolated personnel during wartime or contingency operations. This includes those elements assigned to provide command and control and protect the recovery vehicle from enemy air or ground attack.

**Continuation Training**—Training to maintain proficiency and improve a crewmember's ability to perform unit missions. Formal training sorties (for qualification or upgrade) normally do not count as CT.

**Crew Resource Management**—Training concept that emphasizes team effectiveness by enhancing individual and crew performance in the areas of communication, situational awareness, effective leadership and management, and crew coordination.

**Currency**—The minimum frequency required to safely perform a flying event or sortie.

**Deck Landing Qualification**—Landings performed on board ships for the purpose of qualifying pilots and aircrew members for shipboard operations.

**Direct Supervision**—An aircrew member is considered under direct supervision when flying with a designated squadron supervisor current and qualified in the event. For pilots this supervisor will occupy a pilot seat with a set of controls. For other crewmembers the supervisor will be readily available to assume primary duties if required.

**Dissimilar Formation**—A formation of helicopters consisting of different MDS aircraft (e.g., HH-60, MH-47 and AH-64). Formations of different mission or series aircraft are not considered dissimilar for the purposes of this manual (e.g., HH-60G and UH-60M).

**Event**—The accomplishment of a specific training element, function, or task (e.g., hoist, night landing, total formation).

**Experienced Aircrew**—Aircrew members are considered experienced after acquiring the flight time identified in Table 1.1.

**First Pilot**—Pilots that have completed an Initial QUAL/INSTM evaluation in the HH-60G.
Flight Lead—As designated on flight orders, the individual responsible for overall conduct of the mission from preflight preparation and briefing to post flight debriefing, regardless of actual position within the formation.

Formal Training Unit Courseware—Training materials and programs developed for training aircrew members at formal schools. It includes all student study guides, workbooks, computer-based training lessons, instructor guides and applicable training records related to the specific course.

Formation—Two or more aircraft under the command of a designated mission commander or flight lead operating in close proximity with each other. The AC assumes responsibility for the aircraft’s position relative to others’ flying in the same formation.

Forward Area Refueling Point—Location where refueling and rearming are conducted, normally conducted in an austere environment with engines running. Refueling can be accomplished from a variety of fuel sources (e.g., HC-130, MC-130, pre-positioned fuel stores, another helicopter, fuel truck).

Frequency—A method of tracking currency based on the time period between completed events and sorties (usually calculated in days or months).

Functional Check Flight—A flight or flights performed to determine whether an aircraft, and/or its various components, are functioning according to predetermined specifications while subjected to the flight environment. FCFs are conducted when it is not feasible to determine safe or required operation (aerodynamic reaction, air loading, signal propagation, etc.) by means of ground or shop tests. Conditions requiring FCFs are specified in T.O. 1H-60(H)G-6CF-1 for each type of aircraft. FCF checks or maneuvers can only be accomplished by current and qualified aircrew members.

Helicopter Air-to-Air Refueling—For the purposes of this manual, airborne fuel off-load, either simulated or actual, from a tanker aircraft to a helicopter.

Hot Refueling—Fuel on-load from any fuel source with one or more aircraft engines operating. FARP operations are considered hot refueling when gas is on-loaded.

Inexperienced Aircrew—Aircrew members who do not meet Experienced Aircrew criteria (see "Experienced Aircrew").

Initial Qualification Training—Training (normally completed at the FTU) to qualify a crewmember in basic aircraft flying duties without specific regard to the unit’s operational mission. The minimum requirement for BAQ.

Instructor Certified Event—Events which require additional training (other than that received by during IQT or MQT) to certify the student’s attainment of required proficiency and knowledge levels specified in the applicable syllabus. Training is performed by an instructor in the applicable crew position and certifies student performance is within course standards. These events are documented on an AF Form 4324.

Local Mission Qualification Training—Training (normally completed in-unit) to complete a crewmember's progression to full BMC or CMR. It normally adds additional emphasis to items not adequately covered during MQT and trains the individual on unique aspects of the unit mission.
Lookback—Lookback is a tool used to ensure CMR and BMC crewmembers maintain proficiency. Each individual will fly a minimum number of sorties to remain proficient. Lookback ensures that currencies are not used to drive proficiency.

Low-Level Operations—Flight conducted below 500 feet Above Ground Level (AGL) or Above Water Level (AWL).

Mission Design Series—The official designation for aerospace vehicles used to represent a specific category for operations, support, and documentation purposes.

Mission Profile—A mission designed to penetrate and operate within a combat or threat environment. The specific profile will be predicated on the type and level of threat.

Mission Qualified—An aircrew member who has successfully completed mission qualification training and flight evaluation.

Mission Qualification Training—Training (normally completed at the FTU) to qualify a crewmember in the unit’s primary tasked missions. LMQT is required to complete a crewmember's training and certify them as BMC or CMR.

Night Vision Goggle Sortie—Any night sortie where crewmembers wear NVGs for situational or orientation, awareness while performing duties in a primary crew position.

Operational Mission—Any mission not designated as a training mission.

Primary Authorized Aircraft—Aircraft authorized for performance of the operational mission. PAA hours are used to establish minimum flying hour requirements for upgrade to AC, instructor and flight examiner. For upgrade, PAA time includes all categories of flight time logged with the exception of “other” and “student” time.

Proficiency—Demonstrated ability to successfully accomplish tasked event not just safely, but effectively.

Profile—A combination of training events that are flown together to receive credit and logged under one ARMS entry.

Ready Aircrew Program—A CT program designed to focus training on capabilities needed to accomplish a squadron’s core-tasked missions. MAJCOMs provide appropriate guidance for receiving feedback, which allows the MAJCOM to effectively organize, train, and equip each squadron.

Required Proficiency Level—The level at which a student shall perform during a particular phase of training. RPL standards and definitions for task performance and task knowledge are defined in formal school syllabi.

Specialized Training—Training in specialized tactics, weapon systems or flight responsibilities such as flight lead, instructor, NVG water ops, etc. This training may be conducted during MQT, LMQT or during CT as required.

Squadron Supervisor—Squadron Commander, Operations or Assistant Operations Officer or Flight Commander (ANG: Air Operations Supervisor).

Syllabus of Instruction and Training Plan—Formal guidance (usually produced by AETC or the owning MAJCOM) which details procedures to complete an aircrew training program.
**Tactical Mission**—A mission designed to penetrate and operate within a combat or threat environment.

**Techniques**—Procedures that are options to the primary procedure. The reason for employment of techniques should be based on circumstances or situation not personal preference.

**Total Flying Time**—Total time for all aircraft flown in military service to include student time. Total flying time accumulated for upgrade purposes considers only the aircrew member's current crew position.

**Training Cycle**—The period of time for which aircrew CT requirements are tracked and maintained. The RTM establishes the aircrew training cycle and reporting requirements.

**Training Status**—A status in which a crewmember's training is done under the supervision of an instructor or designated flying supervisor.

**Verification Planning Exercise**—An in-depth training session normally completed by several individuals acting as a crew. It requires these crewmembers to plan a highly detailed contingency mission based upon a scenario developed by the unit weapons officer or suitable equivalent.
Attachment 2

CSAR VERIFICATION OUTLINE

A2.1. Verification Briefings: The following outline is provided for the development of verification briefings.

A2.1.1. Overview:

A2.1.1.1. Introduction (participants and briefing classification).

A2.1.1.2. Mission overview.

A2.1.1.3. Status of friendly forces (ground, air, and support).

A2.1.2. Area of Operations:

A2.1.2.1. Geography (topography, population centers, lines of communications, chokepoints and natural obstacles, major visual and radar significant identification points).

A2.1.2.2. Climatology (effects on unit operations, ground troop movements, and in-flight operations).

A2.1.2.3. Operating base (location, facilities, procedural constraints, strengths and limitations).

A2.1.3. Status of Enemy Forces:

A2.1.3.1. Ground forces and accompanying air defense threats (surface to air missiles, anti-aircraft artillery, electronic combat, and meaconing, interference, jamming and intrusion), capabilities, strengths and weaknesses.

A2.1.3.2. Airborne forces (numbers, locations, capabilities and tactics).

A2.1.4. Mission Employment Briefing:

A2.1.4.1. Ground operations.

A2.1.4.2. Departure (weather contingencies, options).

A2.1.4.3. Route of flight (threat analysis, alternatives, fuel requirements, decision points, supporting blue force assets objectives and routing).

A2.1.4.4. Ingress.

A2.1.4.5. Terminal area tactics

A2.1.4.6. Weapons employment (target data, attack parameters, suitability, delivery modes/backups).

A2.1.4.7. Egress plan (route, mutual support agreements).

A2.1.4.8. Downed crewmember/wounded bird plan.

A2.1.4.9. Recovery (safe corridor procedures, IFF procedures, alternate and emergency airfields).

A2.1.5. Escape and Evasion:

A2.1.5.1. Selected Areas for Evasion.
A2.1.5.2. Search and Rescue procedures.

A2.1.6. Essential Elements of Information/Reports:

A2.1.6.1. Essential elements of information.

A2.1.6.2. Required reports and reporting procedures.
## SAMPLE SMT APPROVAL FORMAT

### Figure A3.1. Sample SMT Waiver Format.

#### SECTION I: REQUESTING UNIT ACTIONS

1. COMMANDER OR CIVILIAN LEADER OF UNIT REQUESTING WAIVER
2. RANK/GRADE
3. UNIT
4. DATE

5. TIER WAIVER NUMBER/AUTHORITY: (See DAFMAN 90-161, Publishing Processes and Procedures, for more detailed guidance.)
   - **NONE.** Non-Tiered Requirements are processed and approved as directed in the specific publication.
   - **TIER 0:** Requirement external to DAF: Requests for waivers are sent through command to HAF functional/OPR for submission consideration to non-DAF authority.
   - **TIER 1:** MAJCOM or FLDCOM/CC or equivalent (may delegate no lower than MAJCOM/FLDCOM or equivalent Director) with coordination of the publication’s Approving Official.
   - **TIER 2:** MAJCOM or FLDCOM/CC or equivalent (delegable no lower than the first General Officer in the chain of command or personnel meeting T-1 delegation authorization).
   - **TIER 3:** Wing/Certa/Garrison/CC, Equivalent or higher echelon if applicable (delegable no lower than Squadron/Unit/CC or equivalent).

6. PUBLICATION NUMBER AND TITLE:
   - AFMAN 11-2HH-60G V1

7. DATE PUBLISHED

8. REQUIREMENT/COMPLIANCE ITEM: (Identify the specific paragraph number and text for which the commander/director is requesting a waiver)

9. RATIONALE: Explain how complying with the requirement/compliance item impacts mission accomplishment; cost of compliance creates unacceptable risk and/or cost of compliance outweighs benefit and/or personnel cannot comply due to lack of resources.

   BRIEFLY EXPLAIN WHY AIRCREW CAN NOT ATTEND FORMAL TRAINING/ENTER AIRCREWS NAME, CREW CODE, AND HOURS.

10. TIME PERIOD OR CIRCUMSTANCES FOR WHICH THE WAIVER WILL BE REQUIRED:

INPUT DATES WHEN SMT WILL BE ACCOMPLISHED

11. RISK MITIGATION MEASURE:

   "TRAINING CONDUCTED IAW FTU COURSEWARE UTILIZING THE FOLLOWING UNIT INSTRUCTORS"

   FILL IN NAMES OF INSTRUCTORS THAT REQUIRE ACCESS TO COURSEWARE...RECOMMENDED LISTING ALL INSTRUCTORS THAT WOULD BE AVAILABLE DURING BLOCK 10 DATES.

12. IMPACT OF DISAPPROVAL:

   EXPLAIN IMPACT OF NOT WAITING UNTIL A FORMAL TRAINING SLOT IS AVAILABLE.

#### SECTION II: COORDINATION ACTIONS
