CAREER FIELD EDUCATION AND TRAINING PLAN AEROSPACE MEDICAL SERVICE AFSC 4N0X1X

PART I

PREFACE

1. The ever-changing Air and Space Expeditionary Force (AEF) environment requires vision, preparation, and attention to ensure people have the right skills and tools to deliver the capabilities and the support required by the war fighter in meeting the Air Force mission of today and vision of the future. Declining resources, expanding mission diversity, and new technologies in the Air Force are impacting the readiness of our most valuable resource—people. These factors will continue to exist in the future, making it essential for the workforce to be effectively and efficiently trained to perform duties within each skill level of an Air Force Specialty (AFS). To meet the challenges of tomorrow, the Air Force must place a greater emphasis on career field training today.

2. The 4N0 Career Field Education and Training Plan (CFETP) is a comprehensive core training document that identifies the legal scope of practice within the Air Force Medical Service, life-cycle education and training requirements, training support resources, and core task requirements for this specialty. The CFETP will provide personnel a defined career path to success and instills rigor in all aspects of career field training. The clear expectation is that Aerospace Medical Service personnel be utilized to the full extent of their scope of practice and responsibility.

3. The CFETP consist of two parts that must be utilized; the supervisors plan as well as management and control of training within the specialty.

3.1. Part I provides information necessary for overall management of the specialties. Air Force Career Field Manager (AFCFM) directs that a copy of Part I be maintained in every work center.

2.1.1. Section A explains how everyone will use the plan.

2.1.2. Section B identifies career field progression information, duties and responsibilities, training strategies, and career field path.

2.1.3. Section C associates each skill level with specialty qualifications (knowledge, education, experience, training).

2.1.4. Section D identifies resource constraints and impacts. Some examples are funds, manpower, equipment, facilities.

2.1.5. Section E identifies transition training guide requirements for Staff Sergeant (SSgt) through Master Sergeant (MSgt).

2.2. Part II contains six sections. At unit level, supervisors and trainers use Part II to identify, plan, and conduct training to commensurate with the overall goals of this plan.

2.2.1. Section A: contains the most current version of the STS which identifies the specialty training standard (STS) and includes duties, tasks, technical references to support training, Air Education and Training Command (AETC) courses, USAF School of Aerospace Medicine (USAFSAM) courses, tasks identified as having a QTP, core tasks, and correspondence course requirements.

2.2.2. Section B: contains the course objective list (COL) and training standards, which supervisors will use to determine if Airmen have satisfied training requirements.

2.2.3. Section C: identifies available OJT support materials such as, AF Qualification Training Packages

(QTPs), which are developed to support proficiency training.

2.2.4. Section D: contains the training course index supervisors can use to determine resources available to support training. Included here are both mandatory and optional courses.

2.2.5. Section E: identifies Major commands (MAJCOM) -unique training requirements that supervisors can use to determine additional training required for the associated qualification needs.

2.2.6. Section F: is specific to medical AFSCs providing guidance on required documentation in the Electronic Training Record (ETR). It describes the master training plan (MTP) and training documentation.

3. Use of the guidance provided in this CFETP, will ensure individuals in this specialty receive effective and efficient training at the appropriate points in their career. This plan will enable us to train today's work force for tomorrow's jobs.

To read, review, or print a copy of the current CFETP, go to <http://www.e-publishing.af.mil>.

ABBREVIATIONS/FORMS/TERMS EXPLAINED

FORMS

AF Form 623, Individual Training Record Folder

AF Form 623a, On-The-Job Training Record-Continuation Sheet

AF Form 797, Job Qualification Standard Continuation/Command JQS

AF Form 803, Report of Task Evaluations

AF Form 1098, Special Task Certification and Recurring Training

AF Form 1256, Certificate of Training

AF Form 2096, Classification On-The-Job Training Action

Advanced Training (AT). Formal course providing individuals who are qualified in one or more positions of their Air Force specialty (AFS) with additional skills and knowledge to enhance their expertise in the career field; training is for selected career Airmen at the advanced level of the AFS.

Aeromedical Evacuation (AE). Regulated patient movement on fixed wing aircraft.

Air Force Career Field Manager (AFCFM). The Air Force focal point for the designated career field within a functional community. Serves as the primary advocate for the career field, addressing issues and coordinating functional concerns across various staffs. Responsible for the career field policy and guidance.

Air Force Medical Modeling and Simulation Training (AFMMAST) Program. Entity designated as the Center for Excellence for Medical Modeling and Simulation (MM&S) and has oversight of all MM&S training throughout the Air Force Medical Service (AFMS).

AFMMAST Portal. MM&S community of practice source for the AFMS located at:
<https://intelshare.intelink.gov/sites/afmmast/SitePages/Home.aspx>

Air Reserve Components (ARC). Term is used as an overarching term when referring to both the Air National Guard (ANG) and Air Force Reserve Command (AFRC) together.

Career Development Course (CDC). Nonresident, student instruction materials (self-study correspondence course) designed to provide Airmen with the fundamental knowledge of their AFS.

Career Field Education and Training Plan (CFETP). CFETP is a comprehensive core training document that identifies: life-cycle education and training requirements; training support resources, and minimum core task requirements for a specialty. The CFETP aims to give personnel a clear path and instill a sense of industry in career field training. It is the formal training contract between the AFCFM and AETC for formal accession and life-cycle skills training. *NOTE: The 4N0X1X CFETP establishes the legal scope of practice/responsibility for Aerospace Medical Service Technicians.

Casualty Evacuation (CASEVAC). The movement of a casualty from the point of injury to medical treatment using a platform of opportunity.

Certification. A formal indication of an individual's ability to perform a task to required standards.

Core Task. Tasks the AFCFM identify as minimum qualification requirements for everyone within an AFSC.

Course Objective List (COL). A publication, derived from initial/advanced skills course training standard, identifying the tasks and knowledge requirements, and respective standards provided to achieve the initial

3-skill level and subsequent SEIs in this career field. Supervisors use the COL to assist in conducting graduate evaluations in accordance with AFI 36-2651, *Air Force Training Program*.

Exportable Training. Additional training via computer assisted, paper text, interactive video, or other necessary means to supplement training.

Functional Manager (FM). Senior leaders, designated by the appropriate functional authority who provide day-to-

day management responsibility over specific functional communities at the MAJCOM, field operating agencies (FOA), direct reporting unit (DRU), or ARC level. While they should maintain an institutional focus in regards to resource development and distribution, FMs are responsible for ensuring their specialties are trained, equipped, developed, and sustained to meet the functional community's mission as well as encourage force development opportunities to meet future needs of the Department of the Air Force mission.

Go. In On-the-Job Training (OJT), the stage at which a trainee has gained skill, knowledge, and experience to perform the tasks without supervision. ("Go" level equates to 3c in the STS proficiency code key.)

Home Station Training. Includes all training required to perform in the current duty position to include duty position tasks, core tasks, READY program tasks, contingency tasks, and additional duty tasks.

Immunization Augmentee (IA). 4N0X1s trained to assist with mass military immunizations programs administering only one vaccine at a time. The IA will work under the supervision of an Allergy/Immunization (A/I) Technician or Immunization Back-up Technician.

Immunization Back-Up Technician (IBT). 4N0X1 personnel trained to administer immunizations in the Immunizations Clinic, and other outpatient clinics, in support of mobility processing lines as determined by Medical Treatment Facility (MTF) and the Master Training Plan. IBTs may serve as NCOIC of Immunizations Clinics. IBTs **are not** qualified nor will they administer allergy and related immunotherapy treatments. **NOTE:** All IBTs will train to the knowledge level on anthrax and smallpox. Those appointed in writing will receive administration training and will be authorized to administer these vaccinations. Appropriate documentation will be made on electronic AF Form 623a.

Initial Skills Training. A formal school course that results in an AFSC 3-skill level award for enlisted or mandatory training for upgrade to qualify for officers.

Instructional System Development (ISD). A deliberate and orderly, but flexible, process for planning, developing, implementing, and managing instructional systems. ISD ensures personnel are taught, in a cost efficient way, the knowledge, skills, and attitudes essential for successful job performance.

Master Task List (MTL). A comprehensive list (100%) of all tasks performed within a work center and consisting of the current CFETP or Air Force Job Qualification Standard (AFJQS) and locally developed AF Form 797, (as a minimum). Should include tasks required for deployment and/or Unit Type Code (UTC) requirements.

Master Training Plan (MTP). Employs a strategy for ensuring the completion of all work center job requirements by using a MTL and provides milestones for task, CDC completion, and prioritizes deployment/UTC, home station training tasks, upgrade, and qualification tasks.

Medical Evacuation (MEDEVAC). The movement of a casualty from the point of injury to medical treatment using medically equipped vehicles or aircraft.

Medical Treatment Facility (MTF). Any DoD facility (area medical center, regional hospital, clinic, or other medical unit) that provides health care to active duty members and their dependents, or retired military members and their dependents. MTFs are also locations where patient care training is conducted.

MM&S. Discipline that encompasses the development and/or use of medical models and simulation.

No Go. Trainee has not gained skill, knowledge, and experience to perform task without supervision. Does not meet task standard.

Occupational Analysis Report (OAR). A detailed report showing the results of an occupational survey of tasks performed within a particular AFS.

On-the-Job Training (OJT). Hands-on, directly supervised training conducted to certify personnel in both upgrade (skill level award) and job qualification (duty position certification) training.

Phase II Training. Clinical training that is a continuation of a formal resident course that provides Airmen with realistic hands-on experience before beginning OJT at the permanent duty location.

Qualification Training (QT). Hands-on performance training designed to qualify personnel in a specific position. This training occurs both during and after upgrade training to maintain up-to-date qualifications.

Qualification Training Package (QTP). An instructional package designed for use at the unit to qualify, or aid qualification, in a duty position or program, or on a piece of equipment. It may be printed, computer-based, or in other audiovisual media.

Comprehensive Medical Readiness Program (CMRP). The readiness portion of AFSC-specific sustainment training designed to ensure all members with a fully qualified AFSC maintain the currency of skills to perform their duties in a deployed setting. **NOTE:** Refer to the following website for AFSC specific readiness skills training <https://kx.health.mil/kj/kx9/cmrrp/Pages/home.aspx>

Resource Constraints. Resource deficiencies, such as money, facilities, time, manpower, and equipment that preclude desired training from being delivered.

Scope of Practice/Responsibility. The extent or range of subject knowledge, task knowledge, and task performance that Aerospace Medical Service personnel apply in the performance of duty at the appropriate skill level. Procedures to request a Scope of Practice Waiver are outlined in AFI 44-119, *Medical Quality Operations*.

Seasoning Training Program (STP). Seasoning training is intended for members who are not in or pursuing a related civilian occupation or assigned to a unit that does not have the capability or accessibility to any facilities by which the member would acquire skill proficiency verification for 3-level and possibly 5-level upgrade may utilize this training.

Simulation. A method for implementing a model over time.

Special Experience Identifier (SEI). A three-number code that identifies special experience and training not otherwise identified in the personnel data system.

Specialty Training Standard (STS). An Air Force publication (typically inserted as Part 2 of the CFETP) describing an Air Force specialty in terms of tasks and knowledge an Airman in that specialty may be expected to perform or to know on the job. Also identifies the training provided to achieve a 3-, 5-, or 7-skill level within an enlisted AFS. It further serves as a contract between AETC and the functional user to show which of the overall training requirements for an Air Force specialty code (AFSC) are taught in formal schools and correspondence courses.

Standard. A predetermined quality or quantity, against which performance skills and knowledge is measured. An exact value, a physical entity, or an abstract concept, the appropriate authority, custom, or common consent sets up and defines to serve as a reference, model, or rule in measuring quantities or qualities, developing practices or procedures, or evaluating results. A fixed quantity or quality.

Sustainment Training. Recurring training required to maintain skills of a qualified individual to perform the duties required by the 4NOX1X AFSCs. To include but not limited to: formal training courses, TCCC, EMT, BLS, ACLS, in-service training, and readiness training/exercises.

Task. An observable and measurable unit of work activity or operation that forms a part of a duty, with one or more duties making up a job.

Task Analysis. A detailed analysis of tasks for a particular AFS to be included in the training decision process.

Third Party Certification. Is an evaluation of completed training conducted by the task certifier, and is only required when directed by the AFCFM.

Total Force. All collective Air Force components (active, reserve, guard, and civilian elements) of the United States Air Force.

Trainer. A trained and qualified person who teaches personnel to perform specific tasks through OJT methods. Also, equipment that the trainer uses to teach personnel specified tasks.

Training Capability. The ability of a unit or base to provide training. Authorities consider the availability of resources (such as equipment, reference materials, qualified trainers, etc.) when determining a unit's training capability.

Upgrade Training (UGT). Mandatory training that leads to the attainment of a higher level of proficiency.

Utilization and Training Workshop (UTW) /Specialty Training Requirements Team (STRT). Meetings, in partnership with the Air Education Training Command Training Pipeline Manager or USAF School of Aerospace Medicine, to develop and review life-cycle AF Specialty performance and training requirements. AETC or USAFSAM Training Managers attends the Specialty Training Requirements Team in an advisory capacity. Incorporates the expertise of MAJCOM functional managers (MFMs), subject matter experts (SME), AETC, 711 HPW and other training personnel to determine career ladder training requirements.

SECTION A – GENERAL INFORMATION

Purpose of the CFETP

1. The CFETP provides information necessary for the 4NXXX AF Career Field Manager (AFCFM), 4N0X1 MAJCOM Functional Managers (MFMs), Commanders (CCs), Unit Training Managers (UTMs), supervisors, and trainers to plan, develop, manage, and conduct an effective and efficient career field education and training program. The plan outlines training for 4N0X1X Airmen to develop, progress, and succeed in the career field. The plan identifies initial skills, upgrade, qualification, advanced, proficiency, and continuation training.

1.1. Initial skills training is the AFSC specific training an individual receives upon entry into the Air Force or upon retraining into this specialty for award of the 3-skill level. The 59th Training Group at Joint Base San Antonio (JBSA), Fort Sam Houston, TX and USAF School of Aerospace Medicine (USAFSAM) at Wright-Patterson AFB, OH, provides initial and advanced skills training.

1.1.1. Upgrade training (UGT) identifies the mandatory courses, task qualification requirements, and correspondence course completion requirements for award of the 5-, 7-, and 9-skill level.

1.1.2. Qualification and/or job proficiency training (along with job experience) is actual hands-on task performance training designed to qualify an Airman in a specific duty position. This training program occurs both during and after the UGT process. It provides the performance skills and knowledge required to do the job.

1.1.3. Advanced training is formal specialty training that provides individuals who are qualified in one or more position of their specialty with additional skills and knowledge to enhance their expertise in the career field. Training is for selected Career Airmen at the advanced level of their AFS.

1.1.4. Proficiency training is additional training, either in-residence or exportable advanced training courses, or OJT, provided to personnel to increase their skills and knowledge beyond the minimum required for upgrade.

1.1.5. Continuation training is additional advanced training exceeding the minimum UGT requirements with emphasis on present or future duty assignments.

1.2. The CFETP has several purposes—some are:

1.2.1. Serve as a management tool to plan, develop, manage, conduct, and evaluate a career field training program. Also, ensures that established training is provided at the appropriate point in an individual's career. **NOTE:** This CFETP is to be utilized as a credential file for all 4N0X1Xs, and is the guide to establish scope of practice/responsibility for each individual.

1.2.2. Identifies task and knowledge training requirements for each skill level in the specialty and recommends training throughout each phase of an individual's career. It describes the scope of practice/responsibility in the Aerospace Medical Service specialty.

1.2.3. List training courses available in the specialty, identifies sources of training, and the training delivery method.

1.2.4. Identify major resource constraints that impact full implementation of the desired career field training program.

2. CFETP Use. The CFETP is maintained and certified by the 4NXXX AFCFM. The AFCFM is the approval authority for the CFETP and will initiate an annual review of this document to ensure currency and accuracy. The training plan will be used by MFMs and supervisors at all levels to ensure comprehensive and cohesive training programs are available for each individual in the specialty.

2.1. AETC and USAFSAM training personnel will develop and or revise formal resident, non-resident, and exportable training based upon requirements established during Utilization and Training Workshops (U&TWs) and documented in Part II of this CFETP. They will also work with the AFCFM to develop procurement and acquisition strategies for obtaining resources needed to provide the identified training.

2.2. 4N0 MFMs will ensure their training programs complement the CFETP mandatory initial skill, upgrade, and proficiency requirements. Coordinated planning between the MAJCOMs and AFCFM enables a holistic approach to address independent and global Total Nursing Force perspectives by aligning strategy, operating concepts, and capability development for the nursing practice, readiness, sustainability, infrastructure, and modernization/recapitalization of the Total Force Nursing Services enterprise.

2.2.1. 4N0 MFMs in coordination with the MAJCOM SGN will also identify the needed AF Job Qualification Standards (AFJQS)/AFQTPs) to document unique UGT and continuation training requirements. Requirements are satisfied through OJT, resident training, contract training, or exportable courseware/courses.

2.2.2. MAJCOM-developed training to support this AFSC must be identified for inclusion into this plan. As such, MAJCOMs must ensure that no training or documentation of training is developed, when such training is satisfied by existing courses and is effectively documented as prescribed in AFI 36-2651 and this CFETP using the higher headquarters' generated Training Record (TR) Program and associated forms. (Ref. AFI 33-360, *Publications and Forms Management*)

2.2.3. MAJCOMS, AETC, and the USAFSAM training personnel will use the AFCFM's annual CFETP review to coordinate training needs and requirements; in addition to, active engagement in the UTW and STRT processes as required.

2.3. Individual 4N0X1 personnel will complete the mandatory specialty training requirements specified in this plan to include respective UGT and continuation training plus associated third party certifications. To request a waiver for required items in the CFETP, refer to AFI 36-2651, *Air Force Training Program*.

2.4. Scope of Practice/Responsibility. Total Force 4N personnel may be asked to perform tasks beyond their normal training plus scope of practice and responsibility outlined in terms of this CFETP. Scope of practice and responsibility is defined as the extent or range of subject knowledge, task knowledge, and task performance that 4N personnel apply in the performance of duty at the appropriate skill level.

2.4.1. When the leadership (MTF or Line of the AF) team validates requirements to utilize 4N0X1X Airmen, in the grades of E1-E8, to perform tasks (clinical or non-clinical) outside his/her scope of practice; the organization must request approval for scope of practice/responsibility waiver. Procedures to request a scope of practice/responsibility waiver are outlined in the following paragraphs 2.4.2. – 2.4.5.:

2.4.2. The utilization of total force 4N0X1X technicians for extended scope of practice must meet three (3) criteria:

2.4.2.1. The expanded scope of practice/responsibility of the task must be mission essential.

2.4.2.2. The member must be trained and certified for the expanded scope by a competent and certified trainer and the training must be documented. Training requirements must meet the standards established in Air Force Instruction (AFI) 36-2651, *Air Force Training Program*.

2.4.2.3. The expanded role is restricted solely to military mission performance and it requires annual review and approval.

2.4.3. The AFCFM is the final waiver authority for enlisted scope of practice/responsibility waivers. Contact the respective 4N0 MFM prior to formal coordination to ensure chain of command is aware of AF-wide mission and resource needs and changes. When requesting the scope of practice/responsibility waivers for 4N0X1X, the process starts with completing the steps outlined at the following site: 4N Scope of Practice Waiver Process Kx Link.

2.4.3.1. Members receiving a selective reenlistment bonus (SRB) must request a waiver through the MPS prior to performing duties outside of their CAFSC. In addition to guidance in AFI 36-2101, refer to AFI 36-2606, *Reenlistment in the United States Air Force*, for further guidance pertaining to SRB recipients serving outside their SRB specialty within a 360 day period.

2.4.4. All waiver requests must be resubmitted annually for re-verification and approval.

2.4.5. In all cases, training and periodic requirement, knowledge and skill certifications are formally certified on AF IMT 797, *Job Qualification Standard Continuation/Command JQS* or AF IMT 1098, *Special Task Certification and Recurring Training*, and maintained in the individual's electronic Training Record. Training references for all tasks beyond any individual's scope of practice/responsibility or the CFETP will be maintained in the duty section where these tasks are performed.

3. CFETP Coordination and Approval. The AFCFM is the approval authority for any official change(s) made to the CFETP. The 4N0X1X AFSC Training Manager officially initiates and coordinates the annual CFETP review and reports deficiencies to the AFCFM at least 45 days before the anniversary date of the CFETP IAW AFI 36-2651. MAJCOM representatives, AETC, and USAFSAM training personnel will identify and coordinate on the career field training requirements. Using the list of courses in Part II, they will eliminate duplicate training. They will submit, through proper channels, all initial and subsequent changes to the CFETP. Additionally, this document has been reviewed by the Chief, Nurse Corp.

3.1. Submit any CFETP suggestions and corrections to the USAF 4N Career Field Manager at DHHQ, Attn: AF/SG1E, Bldg 7700, Room 4NW221, Falls Church, VA 22034 or call DSN: 761-7580 COMM: (703) 681-7580. At a minimum, submissions will be reported in writing to the respective MFM and MAJCOM SGN for situational awareness and suggested course of actions or actions taken to remedy. Also consult with the CFM and/or 4N Force Manager for policy interpretations associated with any part of this CFETP.

SECTION B – CAREER PROGRESSION AND INFORMATION

1. Specialty Description.

1.1. Specialty Summary. Plans, provides, and evaluates routine patient care and treatment of beneficiaries to include flying and special operational duty personnel. Organizes, coordinates, executes, and evaluates nursing activities in the medical environment as a Licensed Practical Nurse (LPN)/Licensed Vocational Nurse (LVN). Performs and directs support activities for patient care situations, including contingency operations and disasters. Performs duty as Flight and Operational Medical Technician (FOMT), Independent Duty Medical Technician (IDMT), Aeromedical Evacuation Technician (AET), Allergy and Immunization Technician (AIT), Special Operations Command (SOC) Medic, Critical Care Technician (CCT), National Registry Paramedic (NRP), Neurodiagnostic Technologist (NDT), Dialysis Medical Technician (DMT), or Hyperbaric Medical Technician (HBMT). Related DoD Occupational Subgroup: 130000

1.2. Duties and Responsibilities.

1.2.1. Provides, supervises and manages patient care of beneficiaries to include flying and special operational duty personnel. Performs nursing tasks. Acts as Air Force Medical Home (AFMH) member or team leader. Front-line preventionist who identifies potential health risks and provides preventative counseling. Performs paraprofessional portions of preventative health assessments and physical examinations. Monitors and records physiological measurements. Orients patients to the hospital environment. Admits, discharges, and transfers patients as directed. Observes, reports, and records observations in patient progress notes and team conferences. Performs portions of medical treatment, diagnostic, and therapeutic procedures. Cares for, observes, and reports on pre/post-operative, seriously or critically ill, and injured patients. Records treatments and procedures rendered and observes effects. Performs postmortem care. Identifies patient problems and assists in developing and evaluating patient care plans. Assembles, operates, and maintains therapeutic equipment. Provides field medical care in contingency operations and disasters. Performs basic life support, tactical combat casualty care (TCCC) and triage in emergency situations. Serves as member of primary emergency medical response to in-flight emergencies and potential mass casualty scenarios for on- and off-base incidents. Operates emergency medical and other vehicles. Loads and unloads litter patients. Participates in contingency or disaster field training, exercises, and deployments. Augments search and rescue flying squadrons. Obtains and maintains linen and supplies/areas. Disposes of medical waste. Maintains inpatient and outpatient medical records. Screens medical records for deployability and other medical administrative requirements. Prepares and submits administrative reports. Manages supplies and equipment, submits and executes budgets. Coordinates medical service activities with execution and clinical management teams. Utilizes the nursing process for promoting and maintaining patient health. Provides disease and disability education, care, and evaluation of nursing care. Participates in and leads the planning, implementation, and evaluation of nursing care. Performs assessment and analysis of patient health status, identifies health goals, recognizes subtle changes in conditions, interprets these changes, and immediately determines appropriate course of action.

1.2.2. Supervises personnel, conducts training, and creates duty schedules. Schedules and/or conducts in-service training on procedures, techniques, and equipment. Schedules and/or conducts periodic disaster training and evacuation procedures. Provides training to medical and non-medical personnel; training may include areas such as emergency medical technician (EMT), TCCC, and required basic life support training.

1.2.3. Performs Flight and Operational Medicine duties. Assists flight surgeon with aircraft mishap and physiological incident response, investigation, and reporting. Supports flight surgeon to develop flying safety and deployment briefings. Assists healthcare provider teams with interpretation and application of medical standards to determine medical qualifications for occupational duty, worldwide duty, special operation duty, mobility status, flying status, special duty, security clearance, professional military education (PME), retraining, commissioning, and transition to Air Force Reserves or Air National Guard. Provides administrative management of duty limiting conditions reports. Assists with oversight of waiver management utilizing the Aircrew Information Management Waiver Tracking System (AIMWTS). Maintains grounding management on all aircrew assigned utilizing the Aeromedical Services Information Management Systems (ASIMS). Performs the paraprofessional portion of initial flying class/special operational duty (SOD) physicals. Conducts clinical entries for data into the Physical Examination Processing Program (PEPP) and

manages physical until completion. Provides first point of contact for non-empanelled patients requiring physical examinations (i.e. Department of Defense Medical Examination Review Board (DoDMERB), Reserve Officer Training Corps (ROTC), and others that are an extension of the occupational exam). Performs preventive health assessment (PHA) physicals for flying status and non-flying status personnel and updates results of required tests and examinations into ASIMS.

1.2.4. Performs duty as an IDMT at home station and deployed locations, remote sites and alternate care locations. Renders medical, dental, and emergency treatment; recommends and coordinates evacuations for definitive medical treatment. Performs pharmacy, laboratory, bioenvironmental, immunizations, public health, medical logistics and medical administration duties. Establishes preceptorship and provides forward area health care IAW applicable guidelines in an austere or bare-base environment.

1.2.4.1. Special Operations Command (SOC) Medics perform special operations medical support providing initial combat point of injury care, on-going field trauma care, and Casualty Evacuation (CASEVAC) to definitive care.

1.2.4.2. SOC medics are ideally suited to Special Operations Forces (SOF) and Combat Search and Rescue (CSAR) mission support for establishing bare-base encampments.

1.2.5. Performs Aeromedical Evacuation (AE) ground and/or flight duties. Performs pre-flight/inflight patient care and documentation. Provides emergency care for patients in event of medical and/or aircraft emergencies. Functions as an aeromedical evacuation crewmember (AECM). Prepares patients, equipment and aircraft for flight. Enplanes and deplanes patients. Loads and unloads baggage. Operates specialized aircraft flight equipment, medical devices and aircraft systems related to patient care. Performs AE mission planning and management.

1.2.6. Performs allergy and/or immunization (AI) duties.

1.2.6.1. Allergy: Manages immunotherapy care and performs diagnostic tests as ordered by physician. Prepares allergenic extracts and/or specific allergy treatment extracts. Performs allergy, skin and energy testing.

1.2.6.2. Immunization: Manages computer based patient information. Performs tuberculosis skin testing. Administers vaccines IAW current guidelines. Provides emergency care for treatment of anaphylaxis. Provides patient education regarding expected reactions and proper post-vaccination care. Provides oversight of immunization processes and programs. Manages the IBT/IA program.

1.2.7. Performs Neurodiagnostic duties. Assists physician with and prepares patients for examination, treatment, and diagnostic procedures. Assembles, operates, maintains and performs routine user maintenance of electroencephalographic and electromyographic equipment. Perform with special electroencephalographic and electromyographic procedures. Ensures appropriate completion and storage of procedure logs.

1.2.8. Performs critical care duties. Prepares patient with special equipment for transfers. Performs and assists with examinations and special procedures including mechanical ventilation, cardiovascular and neurovascular procedures and dialysis.

1.2.9. Performs hyperbaric medical duties. Prepares patients and equipment for hyperbaric dive. Provides wound care and debridement. Prepares hyperbaric chamber and properly positions patients. Functions as hyperbaric dive crewmember. Assists hyperbaric nurse or provider with patient care during and post treatment. Provides emergency care for patients in event of medical or hyperbaric chamber emergencies.

1.2.10. Performs dialysis duties. Prepares patients and equipment for specialized renal acute/chronic. Performs hemodialysis machine maintenance and water treatment system component maintenance, IAW Advancement of Medical Instrumentation (AAMI) and local policy standards. Provides troubleshooting capabilities, and critical thinking skills in the event of machine/patient emergencies.

1.2.11. Nationally Registered Paramedic (NRP). Provides Advanced Emergency Medical Services (EMS) IAW with USAF Pre-Hospital Protocols. Individuals who hold a current NRP certification must maintain certification following initial certification.

2. Skill and Career Progression. Adequate training is essential to timely progression of personnel from apprentice to the superintendent skill levels and training also plays an important role in the Department of the

Air Force's ability to accomplish its mission. Everyone involved in training must do their part to plan, manage, and conduct effective training programs. The guidance provided in this part of the CFETP will ensure each individual receives viable training at appropriate points in their career.

2.1. Apprentice/3-Skill Level. Initial skills training in this specialty consist of the tasks and knowledge training provided in the 3-skill level in-resident course conducted at JBSA, Medical Education and Training Campus, Fort Sam Houston, TX. This course includes 2 days of Expeditionary Medical Readiness Course. In addition, successful completion (no more than 3 attempts) and award of the NREMT certification is mandatory. Upon graduation from the in-resident course, students will attend the 3-skill level Phase II course located at one of the Phase II training facilities. Individuals must successfully complete both the in-resident and Phase II courses to be awarded AFSC 4N031. **NOTE:** Refer to the Education and Training Course Announcements (ETCA) at <https://cs2.eis.af.mil/sites/app10-ETCA/SitePages/Home.aspx> for current course numbers.

2.2. Journeyman/5-Skill Level. Upgrade training to the 5-skill level in this specialty starts immediately after assignment to the duty position as an apprentice/3-skill level.

2.2.1. Upgrade Requirements. Specific knowledge, education, training, experience, other requirements along with, training resources plus implementation of journeyman training requirements. Training requirements are: (1) CDC 4N051A and 4N051B set completion; (2) all STS core tasks (including core task QTPs); and (3) Current certification as an NREMT is mandatory.

2.2.1.2. Approval Authority. Must be recommended by the supervisor plus approved by the commander for formal skill upgrade via AF 2096. UTMs assist the supervisor and commanders in this process as specified in AFI 36-2651.

2.3. Craftsman Level (7). Upgrade training to the 7-skill level starts on the first day of the promotion cycle once selected for promotion to the rank of SSgt. In the case of SSgt retrainees (if applicable), UGT starts upon award of the 5-skill level.

2.3.1. Upgrade Requirements. Completion of (1) CDC 4N071; (2) all STS core tasks (including core task QTPs).

2.3.2. Approval Authority. Must be recommended by the supervisor plus approved by the commander for formal skill upgrade via AF 2096, *Classification/On-The-Job-Training Action*. UTMs assist the supervisor and commanders in this process as specified in AFI 36-2651.

2.4. Superintendent Level (9). Upon promotion to SMSgt, satisfaction of requirements outlined in AFI 36-2101, and completion of an AF 2096, *Classification/On-The-Job-Training Action*, AFSC 4N091 will be awarded. Current certification as an NREMT is mandatory.

2.5. Chief Enlisted Manager Level (0). AFSC/CEM code 4N000 awarded upon selection for promotion to CMSgt. Current certification as an NREMT is mandatory when filling a 4N091 UTC requirement.

2.5.1. Enlisted Deliberate Development. Occurs through the guidance, direction and execution of Enlisted Development Teams (EDT). Through EDTs, enlisted career field leadership executes planning and succession planning to ensure Air Force specialties are effectively equipped, developed and sustained to provide the required capabilities to accomplish the mission. Succession planning is the responsibility of EDTs and entails identifying key developmental positions (KDPs) and key leadership positions (KLPs).

2.6.1. EDT. Provide vectors based on projected (or anticipated) aggregated requirements by grade, level, and position type. A vector is an EDT's collective recommendation for an experience level, training or education opportunity, or position type for an Airman's next or subsequent assignment. EDTs ensure a career field's senior leadership becomes familiar with Airmen assigned to their functional area and assesses Airmen's qualifications and potential for future opportunities. EDTs must be executed in the most cost-efficient manner possible. This includes taking full advantage of remote capabilities, conducting EDTs in conjunction with other scheduled meetings, and minimizing the need for AFPC support and resources to execute EDTs.

2.6.2. KDPs/KLPs. CAFSC specific. Identified by AFCFM and approved by MFMs (Final approval, AFCFM). Positions develop 4Ns for future leadership and strategic roles. KDPs/KLPs are reviewed annually. Below is a brief list of approved KDPs/KLPs:

AFS	Position Title	Identify KDP or KLP	Duty Location(s)	Skill Level	Req Grade	Position Requirements (if any)
4N1	Associate Career Field Manager	KDP	Falls Church, VA	4N191	SMSgt	CST Highly Desired
4N0	4N Force Manager	KDP	Falls Church, VA	4N091	SMSgt	LPN Highly Desired
4N0	AFRC 4N Force Manager	KLP	Robins AFB, GA	4N091	SMSgt	LPN Highly Desired
4N0	AMSA, Course Supervisor	KLP	Ft Sam Houston, TX	4N091	SMSgt	LPN Highly Desired
4N0	Functional Mgr, Medical Ops Assignments	KLP	JBSA-Randolph AFB, TX	4N091	SMSgt	LPN Highly Desired
4N0	AF Global Strike Cmd Functional Mgr	KLP	Barksdale AFB, LA	4N091	SMSgt	LPN Highly Desired
4N0	AF Special Operations Cmd Functional Mgr	KLP	Hurlburt Field, FL	4N091	SMSgt	SEI 455/456/496
4N0	Space Force Functional Mgr	KLP	Peterson AFB, CO	4N091	SMSgt	LPN Highly Desired
4N0	AFDW Functional Mgr	KDP	JB-Andrews, MD	4N091	SMSgt	LPN Highly Desired
4N0	AE Sq Superintendent	KDP	Scott AFB, IL Travis AFB, CA Ramstein AB, Germany Kadena AB, Japan	X4N091	SMSgt	SEI 494
4N0	AE Formal Training Unit Superintendent	KDP	Wright-Patterson AFB, OH	X4N091	SMSgt	SEI 494
4N0	Mgr, Flight Med Branch (Consultant)	KDP	Falls Church, VA	4N091	SMSgt	LPN Highly Desired
4N0	AF EMS State Director	KDP	Falls Church, VA	4N091	SMSgt	LPN Highly Desired
4N0	Supt, USAFSAM (Office of the Dean)	KDP	Wright-Patterson AFB, OH	4N091	SMSgt	LPN Highly Desired
4N0	IDMT Course Supervisor (Consultant)	KDP	Ft Sam Houston, TX	4N091	SMSgt	LPN Highly Desired/SEI 496
4N0	AMWD Superintendent	KDP	JBSA Randolph AFB, TX	4N091	SMSgt	4N0X1F/SEI 470
4N0	Flt and Operational Med Course Supervisor	KDP	Wright-Patterson AFB, OH	4N071F	MSgt	LPN Highly Desired
4N0	Mgr, Medical Modernization Division	KDP	JBSA Randolph, TX	4N071	MSgt	LPN Highly Desired/ Operational Experience
4N0	Mgr, Flt and Operational Med	KLP	HQ AMC Scott AFB, IL, HQ ACC JB Langley-Eustis, HQ AETC JBSA Randolph, TX	4N071F	MSgt	LPN Highly Desired
4N0	Command AE Eval Tech Examiner	KDP	HQ AMC Scott AFB, IL, HQ PACAF, JBPH, HI, HQ USAFE; Ramstein AB GE	X4N071	MSgt	SEI 494
4N0	USAF EMS Program Manager	KDP	Falls Church, VA	4N071	MSgt	SEI 456 Highly Desired
4N0	CDC Writer	KDP	Ft Sam Houston, TX	4N071	MSgt	LPN Highly Desired
4N0	Supt, FOMT-BOMC Development Cell	KLP	Wright-Patterson AFB, OH	4N071F	MSgt	LPN Highly Desired
4N0	Integrated Operations Support	KDP	Falls Church, VA	4N071	MSgt	LPN Highly Desired/ Operational Experience
4N0	NCOIC, Tech Mgmt and Integration	KDP	Falls Church, VA	4N071	TSgt	LPN Highly Desired

3. Training Decisions. The CFETP uses a building block approach (simple to complex) to encompass the entire spectrum of training requirements for the Aerospace Medical Service specialty. The spectrum includes a strategy for when, where, and how to meet training requirements. The strategy must be apparent and affordable to reduce duplication of training and eliminate a disjointed approach to training. Initial skills and UGT requirements were reviewed, updated, and expanded during the 4N0X1 U&TW held 12-15 March 2018 and 27-30 November 2018 at Medical Education and Training Campus, Fort Sam Houston, Texas. The decision to train specific tasks and knowledge items in the initial skills course and 4N0 non-resident medical training program is based on Occupational Survey Report (OSR) data, Training Requirements Analysis (TRA) data, and input from 4N0X1 SMEs. Task and knowledge training requirements are identified in the STS (Part II, Section A of this CFETP). The following training decisions were made during the U&TW:

3.1. The STS was reviewed and updated to include the following changes.

3.1.1. Multiple new and redundant line items were added to clean up the task descriptors, as well as task performance requirements for both the 5-skill level and 7-skill level trainees.

3.1.2. Multiple line items' proficiency codes were adjusted to eliminate skill gaps and to correct instructional delivery system administrative requirements identified during site visits, gap analysis, and from U&TW SME feedback.

3.1.3. Multiple tasks' were added to meet readiness training needs and requirements based upon Defense Health Agency (DHA)-Health Affairs (HA) Joint Knowledge, Skills, and Abilities (JKSA) and AFSC CMRP skills.

3.2. Initial (3-level) Skills Training. The U&TW changed tasks and proficiency codes in the 3-level course column to reflect the career field's desire to increase the amount of hands-on training and increase on areas of weakness.

3.3. 5-skill level UGT Requirements. The U&TW revised the 5-skill level OJT and CDC columns to align and increase proficiency in the subjects and tasks introduced in initial skills training.

3.4. 7-skill level UGT Requirements. The U&TW revised the 7-skill level OJT and CDC columns to align and increase proficiency in the subjects and tasks introduced in initial skills and 5-skill level training.

3.5. Proficiency Training. The 4N AFSC must be fully capable of performing mission critical tasks in support of expeditionary operations. The 4N career field continues to need a critical skills sustainment framework that includes approved and standardized common operating practices and supports standardized proficiency training expectations in the COL. More proficiency and competency training is needed with a standard required level of performance within the constraints of competing demands for a 4Ns time. To maintain currency/qualification in special tasks and positions, the 4N AFSC will focus on central development of standardized supplement training tools that support the right balance of OJT, proficiency training, continuation training, as well as certification. Core tasks, QTPs, and other requirements for 5- and 7-levels have been established updated and reviewed. All other STSs were reviewed, updated and approved.

3.6. Tactical Combat Casualty Care (TCCC) Certification. On 16 Mar 2018, the revised Department of Defense Instruction (DoDI) 1322.24, *Medical Readiness Training*, was published mandating role-based TCCC training every 36- months for all Service members and some Expeditionary Civilians. The Defense Health Agency (DHA), in coordination with the Services, is in the process of developing four TCCC courses: All Service Members (Tier 1), Combat Lifesaver (Tier 2), Combat Medic/Hospital Corpsmen (Tier 3), and Combat Paramedic/Provider (Tier 4). Until the DHA approved TCCC curriculum is finalized, the AF/SG has directed active duty 4N0X1 and 4N1X1 personnel to complete the current National Association of Emergency Medical Technician (NAEMT) TCCC for Medical Personnel. (ref: 13 Aug 19 memo)

<https://kx.health.mil/kj/kx3/AerospaceMedicalServiceCFM/Training%20and%20Development/Forms/AllItems.aspx>. Course completion will be documented in the Medical Readiness Decision Support System.

3.6.1. All 4N0X1 personnel will complete the DHA TCCC Combat Medic (Tier 3) curriculum once finalized with training recertification every 24-months (Reg-AF) and every 36-months (ARC) unless tasked for deployment. **NOTE: TCCC does NOT need to be re-accomplished unless member is due to recertify.** If tasked to deploy, must be current within 12-months. Initial TCCC training to be accomplished at the 4N0 non-resident medical phase II program.

3.6.2. All 4N0X1C (IDMTs) and 4N NRPs will complete the DHA TCCC Combat Paramedic/Provider (Tier 4) curriculum once finalized with training recertification every 24-months (Reg-AF) and every 36-months (ARC) unless tasked for deployment. If tasked to deploy, must be current within 12-months.

3.7. USAF Emergency Medical Services (EMS) Program.

3.7.1. Responsibilities:

3.7.1.1. Approves continuing education (CE). These include any subject covered in the National EMS Educational Guidelines. Other topics must be approved by the USAF EMS Program Manager prior to the offering date.

3.7.1.2. Notifies NREMT and Emergency Medical Technician (EMT) training sites of CE approval.

3.7.1.3. Provides guidance to NREMT and course coordinators on EMS CE within Air Force Aerospace Medical Service arena.

3.7.1.4. Investigates possible breeches of program integrity.

3.7.1.5. Air Force liaison to Board of Directors NREMT. Personnel should contact the USAF EMS Program Manager or State Director on all matters prior to contacting the NREMT.

3.7.1.6. Conducts medical incident investigations and functions as the subject matter expert in malpractice cases involving enlisted personnel in the performance of EMT and/or Paramedic duties, as requested.

3.7.2. MTF.

3.7.2.1. Ensures appropriate volume of SKT study material for 4N personnel.

3.7.2.2. Ensures availability of proper equipment/supplies for NREMT Training.

3.7.2.3. Coordinates funding for NREMT recertification vouchers for all assigned 4Ns.

3.7.2.4. MTF 4N Functional. Ensure that all newly assigned 4Ns/members who have never taken the protocol test complete the USAF Pre-Hospital Protocols test within 6 months of assignment. If assigned to an EMS unit, the test must be completed within 30 days of assignment. All results must be documented into their training record.

3.7.3. Medical Director. A licensed physician responsible for the overall management, maintenance, and integrity of local program.

3.7.4. EMT Course Site Coordinator.

3.7.4.1. Acts as liaison between students, MTF executive staff, local medical community, and USAF EMS Program Manager.

3.7.4.2. Coordinates and/or conducts didactic and skills training for all assigned NREMT personnel.

3.7.4.3. Ensures all documentation on NREMT recertification application is complete and accurate by 31 January of the recertification year before signing.

3.7.4.4. Notifies MTF/Unit SGN and 4N Functional Manager if personnel are not current or miss deadline.

3.7.5. Supervisor.

3.7.5.1. Ensures each member has resources required for training and testing.

3.7.5.2. Reviews and ensures accuracy of documentation before re-registration form is submitted to EMT Course Coordinator for validation.

3.7.5.3. Works with EMT Course Coordinator and individual EMTs and NRPs ensuring no lapse in recertification.

3.7.5.4. Refers individuals to EMT Course Coordinator for remedial training when required.

3.7.5.5. Acts as liaison between EMT and Course Coordinator.

3.7.5.6. With EMT Course Coordinator approval, supervisors (that have complete the train-the-trainer course) may sign off EMT/NRP skills during unit training commensurate to their level of training.

3.7.6. EMT and Nationally Registered Paramedic (NRP).

3.7.6.1. The EMT and NRP are ultimately responsible for successful completion of all training and testing requirements.

3.7.6.2. Completes all requirements for recertification by NREMT ensuring no lapses in recertification occur.

3.7.6.3. Works with supervisor and EMT Course Coordinator to ensure access to required training.

3.7.6.4. Ensures all tasks are properly documented in electronic training record and on NREMT site.

3.7.6.5. If pre-deployment timeline permits, personnel coming due for recertification during deployment should contact the USAF EMS Program Manager as soon as the individual is notified of deployment.

3.7.6.6. Requests remedial training when needed.

3.7.6.7. Ensures required funding and documents are forwarded with NREMT recertification package.

3.7.6.8. 5-level NREMTs and NRPs assigned to Emergency Services (Emergency Department, Emergency Care Center, Urgent Care Center, etc.) or Ambulance Services are authorized to administer the medications commensurate with their certification via approved routes (IN, IV, IO, IM, Oral, SL, Buccal) as listed in the USAF EMS Protocols. Members must have completed the USAF Medication Administration course and been signed off on IV, IO, IN, IM, Oral, SL, Buccal Medication Administration tasks in their electronic training record prior to administering medications

3.7.7. Recertification documentation.

3.7.7.1. NREMT recertification application will be completed on the NREMT website by 31 January of the

recertification year. Recertification documentation must be uploaded to the NREMT website as required by National Registry.

3.7.7.2. Contingency Recertification Procedures. Personnel currently deployed in support of contingency operations should contact the USAF EMS Program Manager for guidelines on conducting training and possible recertification extension.

3.7.8. Expired Registration.

3.7.8.1. A healthcare professional who does not obtain an active, current, valid, unrestricted license/certification or other authorizing document will not practice independently.

3.7.8.2. Individuals who allow their NREMT or NRP certification to lapse will be decertified in all NREMT skills listed as an NREMT core task and will neither perform pre-hospital emergency care nor be assigned duties on ambulances or in emergency services. Once expired, individuals will have 6 months to complete all recertification requirements as mandated by the NREMT and the AF EMS State Office. These individuals are not deployable assets, and therefore, must not be assigned to a deployable UTC position.

3.7.8.3. Individuals who fail to maintain or re-obtain this mandatory certification within 6 months of expiration will have the AFSC withdrawn IAW AFI 36-2101, Classifying Military Personnel (Officers and Enlisted).

3.7.8.4. AFSC withdrawal process starts 1 October of the recertification year.

3.7.9. NREMT Exemptions. 4N0X1 personnel completing special duty assignments outside CAFSC (to include MTL, MTI, PME, etc.) are highly encouraged to maintain their certification while performing those duties (i.e. coordinate with local MTF for training or coordinate with USAF EMS Program for suitable CEU based refresher approval), and will have up to 6 months upon returning to the 4N0X1 career field to re-establish their NREMT certification.

Community College of the Air Force (CCAF).

4. CCAF Degree. CCAF is one of several federally chartered degree-granting institutions; however, it is the only 2-year institution exclusively serving military enlisted personnel. The college is regionally accredited through Air University by the Commission on Colleges of the Southern Association of Colleges and Schools to award Associate in Applied Science (AAS) degrees designed for specific Air Force occupational specialties and is the largest multi-campus community college in the world. Upon completion of basic military training and assignment to an AF career field, all enlisted personnel are registered in a CCAF degree program and are afforded the opportunity to obtain an AAS degree. In order to be awarded, degree requirements must be successfully completed before the student separates from the Air Force, retires, or is commissioned as an officer. See the CCAF website for details regarding the AAS degree programs.

4.1. Professional Certifications. Certifications assist the professional development of Airmen by broadening their knowledge and skills. Additionally, specific certifications may be awarded collegiate credit by CCAF and civilian colleges. To learn more about professional certifications and certification programs offered by CCAF, visit the CCAF website.

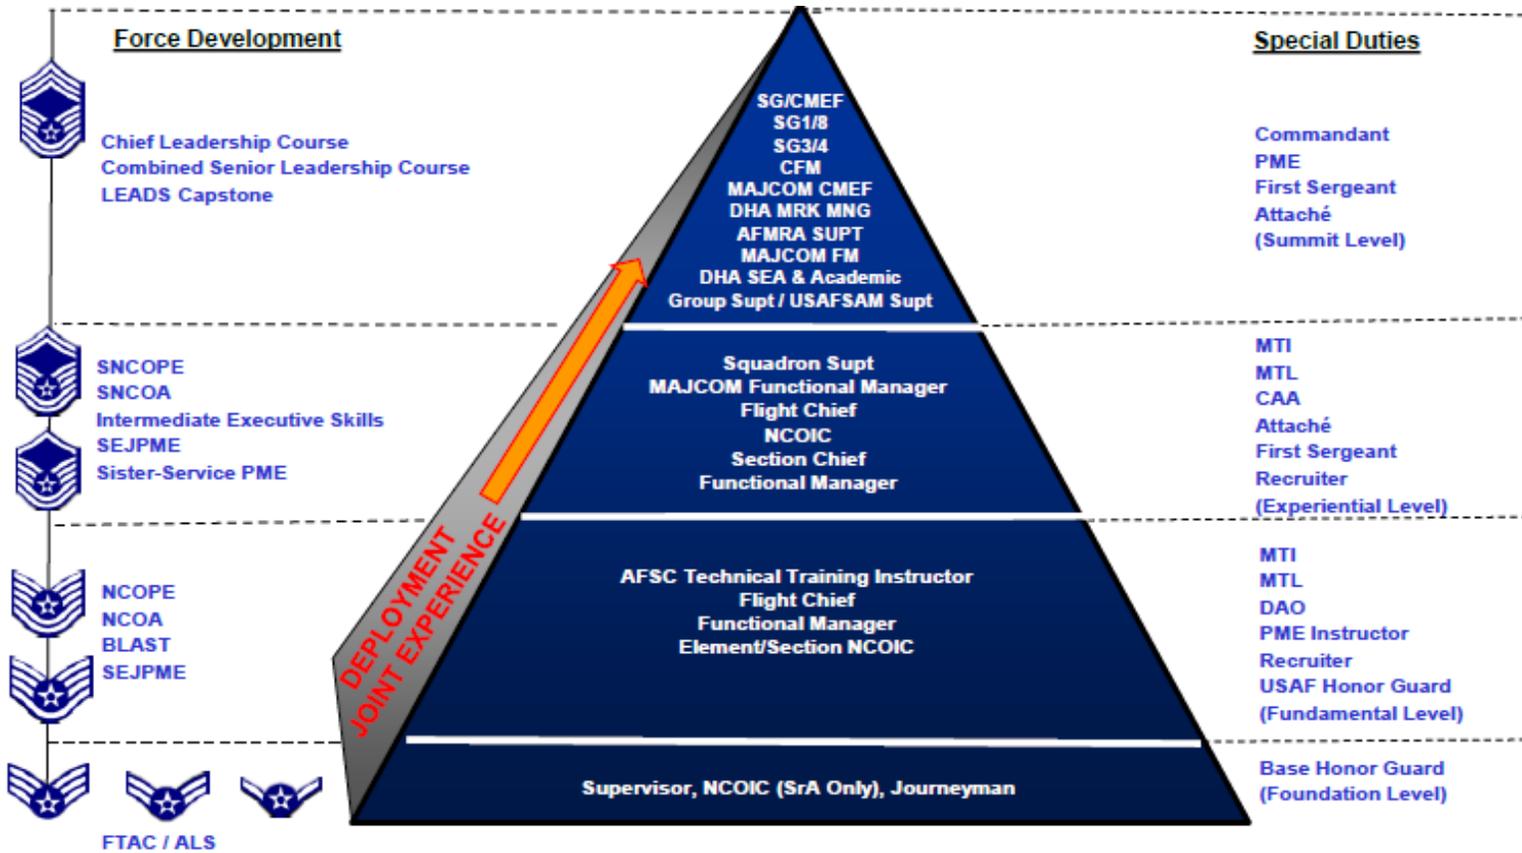

4.1.1. Certification Opportunities within the 4N0 AFSC. The programs and governing bodies listed below are certifications the 4N0 AFSC can obtain as noted in AFI 41-104, *Professional Board and National Certification Examinations*.

Governing Body/Agency	Certification/Title
National Registry of Emergency Medical Technicians	Emergency Medical Technician National Registered Paramedic
National Council of State Boards of Nursing-Licensed Practical Nurse (NCSBN-LPN)	Licensed Practical Nurse/Licensed Vocational Nurse
Certifying Board of the American Association of Medical Assistants (AAMA)	Certified Medical Assistant
American Board of Electroencephalographic (EEG) Technologists/CAAHEP-COA	EEG Technologists (R. EEG T)
University of Maryland, Baltimore County (UMBC) Emergency Health Services	Critical Care Paramedic (CCEMT-P) Pediatric & Neonatal Critical Care Transport Program (PNCCT)
Board for Critical Care Transport Paramedic Certification (BCCTPC)	Critical Care Paramedic - Certified (CCP-C) Tactical Paramedic - Certified (TP-C)
International Board of Specialty Certification (IBSC)	Certified Flight Paramedic (FP-C)
National Society of Health Coaches	Health Care Life Coach
The National Board of Diving and Hyperbaric Medical Technology	Hyperbaric Technologist Certification (CHT)
Board of Nephrology Examiners Nursing and Technology	Certified Hemodialysis Technologist/Technician

5. Career Field Education and Training Requirements/Opportunities.

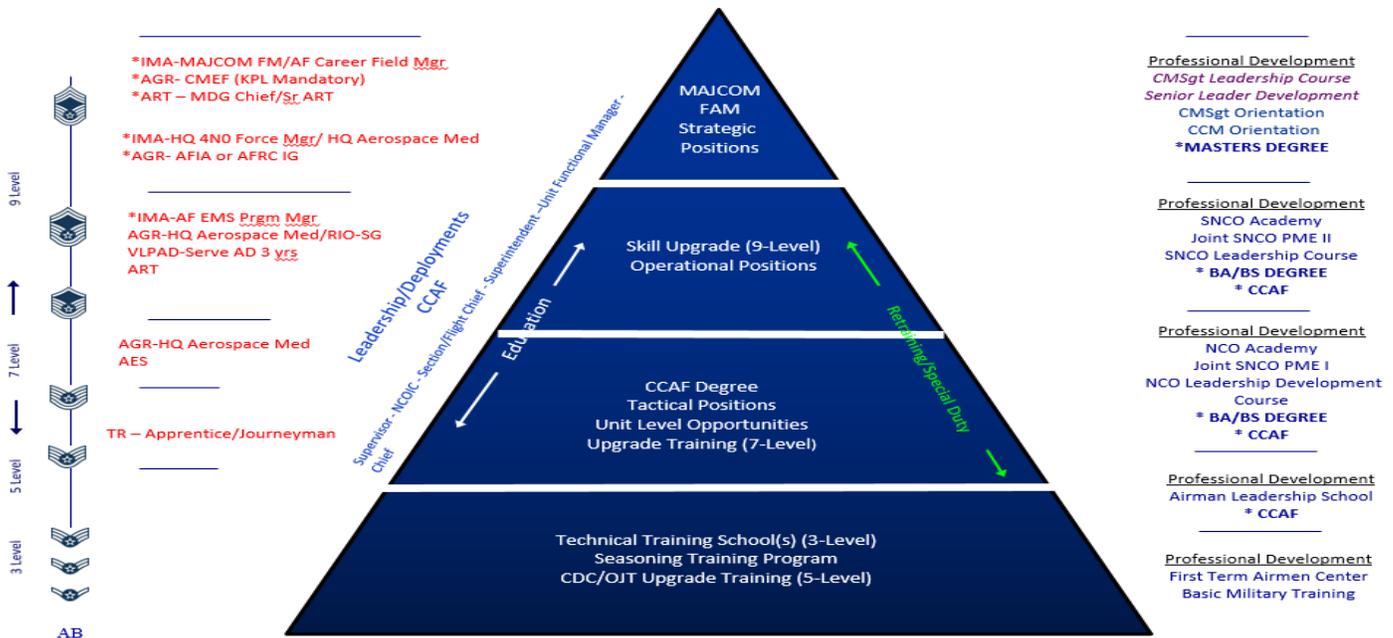

Education and Training Requirements	Rank	Careerfield Opportunities
Upgrade to Journeyman (5-Skill Level) <ul style="list-style-type: none"> • Certified in all STS Core Tasks • Minimum NREMT • Tactical Combat Casualty Course-Combat Medic or Medical Provider • Complete all duty position training • QTPs for assigned position 	A1C/SrA	<ul style="list-style-type: none"> • Flight & Operational Medicine Technician (FOMT) • Independent Duty Medical Technician (IDMT) • Aeromedical Evacuation Technician (AET) • Hyperbaric Technician (HBMT) • Neurodiagnostic Technologist (NDT) • Allergy/ Immunization Technician (A/I) • Squadron Medical Element (SME) • National Registered Paramedic (NRP) • Critical Care Technician • License Practical Nurse/License Vocational Nurse
Upgrade to Craftsman (7-Skill Level) <ul style="list-style-type: none"> • Minimum NREMT certification • QTPs for assigned position • Complete all duty position training requirements 	SSgt/TSgt	<ul style="list-style-type: none"> • Medical Development NCO • Special Operations Command Medic • Aeromedical Consultation Service • Technical Training Instructor • Phase II Training Instructor
Flight/Squadron/Division Superintendent Senior 4N0	MSgt	<ul style="list-style-type: none"> • International Health Specialist (IHS) • Key Development/Leadership Positions
Upgrade to Superintendent (9-Skill Level) <ul style="list-style-type: none"> • NREMT certification 	SMSgt	<ul style="list-style-type: none"> • Squadron Superintendent • Key Development/Leadership Positions • MAJCOM Functional Manager
Chief Enlisted Manager (CEM) (4N000) <ul style="list-style-type: none"> • CLC 	CMSgt	<ul style="list-style-type: none"> • MAJCOM level assignments • MAJCOM Functional Manager • Medical Group Superintendent • Air Force Career Field Manager (AFCFM)

Enlisted Career Pyramid

(Figure 5-1)

Reserve Career Pyramid

Both IMA and AGR positions are 3-4 years. MFM/SG will not concur with career status for AGR positions.

SECTION C – SKILL LEVEL TRAINING REQUIREMENTS

1. Purpose. Skill level training requirements in this specialty are defined in terms of tasks and knowledge requirements. This section outlines the specialty qualification requirements for each skill level in broad, general terms and establishes the mandatory requirements for entry, award, and retention of each skill level. The specific task and knowledge training requirements are identified in the STS at Part II, Sections A and B of this CFETP.

2. Specialty Qualification.

2.1. Skill Level Training.

2.1.1. Specialty Qualification.

2.1.1.1. Knowledge. The following knowledge is mandatory for award of AFSC indicated:

2.1.1.1.1. 4N0X1/X. Medical terminology, anatomy and physiology; nursing theory, techniques and procedures; nursing assessment; team nursing; patient needs; emergency medical treatment to include cardiopulmonary resuscitation; aseptic technique; medical ethics and legal aspects; prescribed drugs/immunizations and their administration; population health concepts; operating and maintaining therapeutic equipment; transportation of sick and wounded; risk management; military hygiene and sanitation; fundamentals of primary care management (PCM); preventive medicine and counseling techniques; physical examinations and standards, contingency operations, disaster preparedness and chemical warfare; flight physiology fundamentals; maintenance of the human weapon system; and operational readiness of the war fighter.

2.1.1.1.2. 4N0X1B. Neurological patient examination, treatment, and diagnostic procedures; -operation and user maintenance of electroencephalographic, electromyographic, and other neurodiagnostic equipment.

2.1.1.1.3. 4N0X1C. Medical, dental, and emergency treatment; disorders; advanced cardiac and disease management; epidemiology; and entomology. Pharmacy, laboratory, bioenvironmental, immunizations, public health, medical logistics, and medical administration.

2.1.1.1.4. 4N0X1D. Immunotherapy injection, immediate and delayed skin testing, mixing and diluting of allergen extracts, spirometry, vaccine storage and handling procedures; disease prevention through vaccinations.

2.1.1.1.5. 4N0X1F. Physical examinations procedures, aircrew medical waivers, medical standards, and duty limiting conditions.

2.1.1.2. Education. For entry into this specialty, member must meet initial accession requirements as annotated in AFI 36-2002. Courses in general science, biology, psychology, and chemistry is desirable.

2.1.1.3. Training. The following training is mandatory for the award of the AFSC indicated:

2.1.1.3.1. 4N031. Completion of Aerospace Medical Service Apprentice (AMSA) Course Phases I and II.

2.1.1.3.2. 4N0X1B. Completion of a neurodiagnostic technician course, current NREMT certification is mandatory.

2.1.1.3.3. 4N0X1C. Completion of Independent Duty Medical Technician Course and initial certification at the host medical treatment facility is mandatory.

2.1.1.3.4. 4N0X1D. Completion of Allergy/Immunology Technician Course.

2.1.1.3.5. 4N0X1F. Completion of Flight and Operational Medical Technician course.

2.1.1.4. Experience. The following experience is mandatory for the award of AFSC indicated:

2.1.1.4.1. 4N051/4N051X. Qualification in and possession of AFSC 4N031/31X. Experience performing functions such as care and treatment of patients, operating and maintaining therapeutic equipment.

2.1.1.4.2. 4N071/4N071X. Qualification in and possession of AFSC 4N051/51X/1X. Experience performing or supervising functions such as nursing activities; care and treatment of patients; operating and maintaining therapeutic equipment; and conducting paraprofessional portions of physical examinations.

2.1.1.4.3. 4N091. Qualification in and possession of AFSC 4N071/71X. Experience managing functions such as medical and related patient care and administrative activities.

2.1.1.5. Other. The following are mandatory as indicated:

2.1.1.5.1.1. AFSCs 4N0X1/X1X:

2.1.1.5.1.2. No record of emotional instability according to the provisions of AFI 48-123.

2.1.1.5.1.3. See attachment 4 of the (AFECD) for additional other entry requirements.

2.1.1.5.1.4. Certification from the National Registry of Emergency Medical Technicians (NREMT) as an emergency medical technician is mandatory. After initial certification, continued certification is mandatory. **NOTE: Individuals who possess Nationally Registry Paramedic certification exceed the NREMT requirement and are not required to also maintain a NREMT certification.**

2.1.1.5.2. For award and retention of these AFSCs, must maintain local network access IAW AFI 17-130, *Cybersecurity Program Management* and AFMAN 17-1301, *Computer Security*.

2.1.1.5.3. For award of AFSCs 4N051/51X/4N071/71X/4N091/91X:

2.1.1.5.3.1. Must pass the National Council Licensure Examination in Practical Nursing (NCLEX-PN) and maintain Practical Nursing (LPN/LVN) credential with unrestricted practice (excludes temporary restrictions) IAW AFI 44-119, Medical Quality Operations.

2.1.1.5.3.1.2. Applicable NLT dates for credential is contained in AF/SG1E- Practical Nurse (LPN/LVN) Credential Interim Policy memo. (**ref 16 May 19 memo**)

<https://kx.health.mil/kj/kx3/AerospaceMedicalServiceCFM/Training%20and%20Development/Forms/AllItems.aspx>

2.1.1.5.3.1.3. Exception- Airmen with an approved separation or retirement date as of the LPN/LVN requirement date are not required (but highly encouraged) to complete the LPN credential.

2.1.1.5.4. For entry into 4N0X1B, prior qualification in and possession of PAFSC 4N051/71.

2.1.1.5.4.1. For award and retention of the AFSC 4N051B, certification as a Registered Electroencephalographic Technologist (R. EEG T.) or other professional recognized national certification a registration examination within the NDT field must be accomplished within one year of graduation from the NDT Program.

2.1.1.5.4.2. After initial certification, continued certification is mandatory while assigned duties as a NDT.

2.1.1.5.5. For entry, award, and retention of 4N0X1C, the following are mandatory:

2.1.1.5.5.1. Prior qualification in and possession of PAFSC 4N031/51/71.

2.1.1.5.5.2. Qualification to perform duties at an isolated location according to the provisions of AFI 48-123 and Medical Standards Directory.

2.1.1.5.6. For entry into 4N0X1D, prior qualification in and possession of PAFSC 4N031/51/71.

2.1.1.5.7. For entry into 4N0X1F, prior qualification in and possession of PAFSC 4N031/51/71.

2.2. Training Sources/Resources. Completion of the AMSA Phase I course, which is to include NREMT certification training and testing, at JBSA, Fort Sam Houston, TX, and the Aerospace Medical Service Apprentice Phase II course satisfies the knowledge and training requirements specified in para 2.1.1.1.1., for award of the 3-skill level.

2.3. Implementation. After 3-skill level graduation, job qualification training starts when individuals are assigned to their first duty positions. Thereafter, it is initiated anytime individuals are assigned duties they are not qualified to perform. QTPs will be used concurrently to obtain necessary duty position qualifications. QTPs are Air Force publications that have been developed and are mandatory for use during upgrade/qualification

training when available for a duty position, program, or piece of equipment.

2.4. Medical Modeling and Simulation (MM&S) Training

2.4.1. MM&S is an important tool to develop and maintain technical skills, enhance communication and refine critical thinking skills as a component of the overall Education and Training (E&T) program. The Air Force Medical Modeling and Simulation Training (AFMMAST) Program has been designated as the Center of Excellence for MM&S and has oversight of all MM&S training throughout the AFMS. AFMMAST supports process improvement and research initiatives related to MM&S, and works with SMEs to align E&T requirements and objectives within standardized MM&S scenarios to improve the efficiency and effectiveness of MM&S across the E&T continuum. AFMMAST is co-located with DoD (tri-service) and DHA J-7 in the Defense Medical Modeling and Simulation Office (DMMSO).

2.4.2. MM&S is a broad concept that encompasses advanced information technology solutions and diverse teaching modalities including a distributed human patient simulator network of high & low fidelity manikins, human simulator task trainers, serious medical games, integration of augmented reality/virtual reality/mixed reality, and standardized patients. To address the specific training needs of a learning objective, the optimal MM&S tool(s) must be selected. AFMMAST experts assist and mentor AFMS personnel in selecting the best MM&S tool or combination of tools that meet the requirement within any budgetary, equipment, and infrastructure constraints. AFMMAST can provide any MM&S operations, logistical, IT, curricula, and data analysis support or guidance needed.

SECTION D – RESOURCE CONSTRAINTS

1. There are currently no resource constraints. This area is reserved.

SECTION E – TRANSITIONAL TRAINING GUIDE

1. LPN Pathway. Resources can be found on link below to include 4N App (Apple iOS and Android devices)

<https://kx.health.mil/kj/kx3/AerospaceMedicalServiceCFM/Documents/LPN%20Documents/LPN%20Program%20Guide%202019%20with%20embedded%20files.xlsx>

PART II

SECTION A – SPECIALTY TRAINING STANDARD (STS) FOR AFSC 4N0X1/X AND APPLICABLE SHRED OUT/SEI

- 1. Implementation.** This STS will be used for Aerospace Medical Service Apprentice technical training provided by METC for classes beginning no earlier than October 2020. The 4N051A CDC need date (date the CDC should be available to the field) is March 2021; 4N051B CDC need date is July 2021. The 4N071 CDC need date is 1 Jan 2021. All other portions are effective immediately upon publication.
- 2. Purpose.** As prescribed in AFI 36-2651, *Air Force Training Program*, this STS:
 - 2.1.** In Column 1 (Task, Knowledge, and Technical Reference) lists the most common tasks, knowledge, and technical references (TR) necessary for airmen to perform duties in the 3-, 5-, and 7-skill level.
 - 2.2.** In Column 2 (Core Tasks) identifies the core task requirements. Core task requirements are met after individuals successfully complete the appropriate upgrade training for their skill level, the 3-skill level course (Aerospace Medical Service Apprentice Course), the entire 4N051 CDCs and the entire 4N071 CDC.
 - 2.3.** In Column 3, is used to record completion of tasks and knowledge training requirements as is the certification for OJT. Use the automated electronic training record to document technician qualifications.
 - 2.4.** In Column 4, shows formal training, correspondence course, and QTP requirements. It also shows the proficiency to be demonstrated on the job by the graduate as a result of training on the task and knowledge and the career knowledge provided by the correspondence course. For a list of QTP volume numbers and titles, refer to Part II Section C.
- 2.5. Proficiency Code Key/Qualitative Requirements** precede the specific STS listings and contains the proficiency code key used to indicate the level of training and knowledge provided by resident training and career development courses.
 - 2.5.1.** The STS serves as a JQS for OJT when placed in AF Form 623, Individual Training Record Folder, and used according to AFI 36-2651. When used as a JQS, the following requirements apply:
 - 2.5.1.2. Documentation.** Document and certify completion of training in accordance with AFI 36-2651. Identify duty position requirements by circling the subparagraph number next to the task statement. As a minimum, complete the following columns in Part 2 of the CFETP: Start Date, Training Completed, Trainee Initials, Certifier Initials (if applicable). An AFJQS may be used in lieu of Part II of the CFETP only upon approval of the AFCFM. **NOTE:** The AFCFM may supplement these minimum documentation procedures as needed or deemed necessary for their career field.
 - 2.5.2. Transcribing to new CFETP.** Transcribing documentation to a new CFETP is an administrative function, not a re-evaluation of training. Upon publication of a new CFETP, transcribe IAW AFI 36-2651.
 - 2.5.2.1.** For tasks previously certified and still required in the current duty position, enter the current date in the completion column, trainee initials in the trainee column, and the current tasks certifier or supervisor/trainer initials in the trainer column.
 - 2.5.2.2.** For tasks previously certified but not required in the current duty position, transcribe only the previous certification dates (no initials). If the task later becomes required in the duty position, recertify using current dates and initials.
 - 2.5.2.3.** Annotate the AF Form 623a, (for example, - I certify the information contained in the CFETP dated XX was transcribed to the CFETP dated XX, and the trainee was given the superseded CFETP. Signed and dated by the supervisor and trainee).
 - 2.5.3. Documenting Career Knowledge.** When a CDC is not available, the supervisor identifies STS training references the trainee requires for career knowledge and ensures, at a minimum, the trainees cover mandatory items in the Enlisted Classification Directory. For two-time CDC course exam failures, See AFI 36-2651, *Air Force Training Program*, for specific instructions. **Note:** Career knowledge must be documented prior to

submitting a CDC waiver.

2.5.4. Decertification. When an Airman is found to unqualified on a task previously certified for his or her position, the supervisor utilizes the decertification feature found in TFTR. Then appropriate remarks are entered on the AF Form 623a, documenting the reason for decertification. See AFI 36-2651 for specific instructions.

2.5.5. Training Standard. Trainees are trained, evaluated, and certified to the go/no-go level. Go means the individual can perform the task without assistance and meets requirements for accuracy, timeliness, and correct use of procedures. Supervisors and superintendents will manage this process by assessing 4N0X1 qualifications.

2.5.5.1. Trainers must be recommended by their supervisors, qualified to perform the task being trained and have completed the Air Force Training Course.

2.5.5.2. Certifiers must be at least a Staff Sergeant, capable of evaluating the task being certified, be someone other than the trainer, and complete the Air Force Training Course. Possession of at least a 7-skill level is desired, but not required.

2.6. The Training Standard is a guide for development of promotion tests used in the Weighted Airman Promotion System (WAPS). Specialty Knowledge Tests are developed at the USAF Occupational Measurement Squadron by SNCOs with extensive practical experience in their career fields. Questions are based upon study references listed in the Enlisted Promotions References and Requirements Catalog. WAPS is only applicable to AD forces.

3. Recommendations. Identify inadequacies and recommend changes to this training standard through channels at 59 TRG/TGE, 2931 Harney, JBSA, Fort Sam Houston, TX 78234. A Customer Service Information Line (CSIL) is available for the supervisor's convenience to identify graduates who may have received over or under training on task/knowledge items listed in this specialty training standard. For quick responses to problems, call our CSIL, DSN 420-1080 (commercial 210-808-1080) or email usaf.jbsa.937-trg.list.937-trg-tge@mail.mil to report your findings.

<i>Printed Name Of Trainer, Certifying Official And Written Initials</i>		
N/I	N/I	

QUALITATIVE REQUIREMENTS

Proficiency Code Key		
	Scale Value	Definition: The individual
Task Performance Levels	1	IS EXTREMELY LIMITED (Can do simple parts of the task. Needs to be told or shown how to do most of the task.)
	2	IS PARTIALLY PROFICIENT (Can do most parts of the task. Needs only help on hardest parts.)
	3	IS COMPETENT (Can do all parts of the task. Needs only a spot check of completed work.)
	4	IS HIGHLY PROFICIENT (Can do the complete task quickly and accurately. Can tell or show others how to do the task.)
Task Knowledge Levels	a	KNOWS NOMENCLATURE (Can name parts, tools, and simple facts about the task.)
	b	KNOWS PROCEDURES (Can determine step by step procedures for doing the task.)
	c	KNOWS OPERATING PRINCIPLES (Can identify why and when the task must be done and why each step is needed.)
	d	KNOWS ADVANCED THEORY (Can predict, isolate, and resolve problems about the task.)
Subject Knowledge Levels	A	KNOWS FACTS (Can identify basic facts and terms about the subject.)
	B	KNOWS PRINCIPLES (Can identify relationship of basic facts and state general principles about the subject.)
	C	KNOWS ANALYSIS (Can analyze facts and principles and draw conclusions about the subject.)
	D	KNOWS EVALUATION (Can evaluate conditions and make proper decisions about the subject.)

Explanations

A **task knowledge** scale value may be used alone or with a **task performance scale value** to define a level of knowledge for a specific task. (Examples: a and 1a, b and 2b, or c and 3c)

A **subject knowledge scale value** is always used alone to define a level of knowledge for a subject not directly related to any specific task, or for a subject common to several tasks.

- This mark is used alone instead of a scale value to show that no proficiency training is provided in the course or CDC.

X This mark is used alone in the course columns to show that training is required but not given due to limitations in resources.

/x This mark is used with a proficiency code in the course columns to show that training is required but not given due to limitations in resources.

11. SPECIAL OPERATIONS COMMAND MEDIC											
11.1. Command And Control Functions											
TR: AFDs 2-1.6, 2-4.2; AFTTP 3-42.6; USSOCOM Tactical Trauma Protocols/Tactical Medical Emergency Protocols; Recommended Drug List/Canine Tactical Combat Casualty Care											
11.1.1. Use of AFSOF OPLANS/Tactics, Techniques and Procedures (TTP)											
11.1.2. Recall doctrine, concepts of operations and policies governing SOF/CSAR medical forces											
11.2. Pre-deployment TR: AFI 41-106, AFTTP 3-42.6, AFSOC UTC Allowance Standards USSOCOM Tactical Trauma Protocols/Tactical Medical Emergency Protocol; AFSOC Blood Policy Program; Tactical Combat Casualty Care Guidelines											
11.2.1. Locate supplies in AFSOC UTC equipment sets											
11.2.2. Establish Plans And Preparation Requirements (Missions Requirements)											
11.3. Casualty Evacuation (CASEVAC) Mission TR: AFTTP 3-42.6											
11.3.1. Identify transport considerations											
11.3.2. Identify types of casualties and evacuation priority											
11.3.3. Handling of Coalition forces											
11.3.4. Handling of High-value targets											
11.3.5. Determine Transport times and enroute support requirements											
11.3.6. Determine forward staging base capabilities											
11.3.7. Coordinate patient movement through Theater Patient Movement Requirements Center (TPMRC)											
11.4. Perform responsibilities of advanced echelon (ADVON) personnel											
TR: AFI 41-106, AFTTP 3-42.6, USSOCOM Tactical Trauma Protocols/Tactical Medical Emergency Protocols; Recommended Drug List/Canine Tactical Combat Casualty Care											
11.4.1. Manage deployed medical forces											
11.4.2. Identify deployed requirement tasks											
11.4.3. Establish command and control relationships (Joint, SOF)											
11.4.4. Prepare deployment reports											
11.4.5. Prepare CASEVAC mission after action reports											
11.4.6. Prepare theatre specific casualty reporting											

ATTACHMENT 11

SECTION B – COURSE OBJECTIVE LIST

1. Course Objectives for Initial Skills Course. To obtain a copy of a course objective list, contact the AETC training manager at the 383d Training Squadron.

1.1. Each proficiency coded task or knowledge item taught at the technical school is measured using an objective. An objective is a written instruction for the students, so they know what is expected of them to successfully complete training on each task or knowledge item. Each objective is composed of a condition, behavior, and a standard. The condition is the setting in which the training takes place (type of equipment of references when required). The behavior is the observable portion of the objective (perform hand washing). The standard is the level of performance that is measured to ensure the proficiency code level is maintained (to a 70% or with no instructor assists). All objectives use progress checks (PC) or written test (W) or a combination of both to measure a student's ability (skill) or knowledge.

1.2. The minimum standard for written examinations is 70%. The standard for performance objectives (skills) vary and are indicated in the objective and the performance checklist. The instructor documents each student's progress during skills evaluations with the use of a checklist. Students must satisfactorily complete all progress checks prior to taking a written test.

2. Initial Medical Readiness Training. As directed by AFI 41-106, *Medical Readiness Program Management*, this is provided within the EMRC, conducted at 937th Training Group, JBSA, Camp Bullis, TX.

The EMRC course is conducted within the AMSA course. Completed training is documented on computer-generated student report for each AMSA course graduate. Continuing/on-going medical readiness training for the individual is the responsibility of each medical facility.

2.1. Tactical Combat Casualty Care (TCCC). Department of Defense Instruction (DoDI) 1322.24, *Medical Readiness Training*, was published mandating role-based TCCC training every 36- months for all Service members. TCCC-Combat Medic training will be accomplished at the 4N0 non-resident medical phase II program sites.

3. Advanced Skills Course. There is currently no advanced course. This area is reserved.

SECTION C – SUPPORT MATERIALS

The following list of support materials is not all-inclusive; however, it covers the most frequently referenced areas:

1. Qualification Training Packages (QTP).

1.1. QTPs must be used for training on all items identified in an individual's STS as a duty position task that have a designated QTP.

1.2. QTPs listed on the Kx have been developed and are official Air Force publications. All QTPs listed can be obtained through Elsevier- Clinical Skills Plus (<https://kx.health.mil/kj/kx8/VirtualLibrary/Pages/Clinical%20Skills%20Plus.aspx>) this is the KX Virtual Library Clinical Skills Plus page.

1.3. To assist in the standardization of training and to eliminate duplication, the QTPs listed in this section must be used when applicable to an individual's duty position.

1.4. When identified as applicable to an individual's duty position, the frequency that training must be

accomplished by using each of the QTPs listed in this section is specified next to each QTP module.

1.4. QTPs have been developed and are listed on the following pages for the following specialties:

1.4.1. Aerospace Medical Service Specialty.

1.4.2. Independent Duty Medical Technician.

1.4.3. Neurodiagnostic Technologist.

1.4.4. Allergy/Immunization Technician.

1.5.4. Critical Care Technician.

1.5.5. Gastroenterology Technician.

NOTE: CFM approval is required for all QTPs. MAJCOM coordination is required when requesting development of new QTPs. POC for QTP development is the Air Force Medical Readiness Agency (AFMRA), SGNP, JBSA Lackland-Kelly, TX.

2. Available Aerospace Medical Service Specialty (4N0X1) QTPs (POC: AFMRA/SGNP)

Number	Frequency	Title
QTP 4N0X1-Vol 1		Fundamentals of Nursing Care
Module 1	every 24 months	Disinfection Procedures for Equipment
Module 2 (a)/(b)	every 24 months	Orthostatic Vital Signs- Manual Method/Electronic Method
Module 3	every 24 months	Cardiac Monitor/Defibrillator
Module 4	every 24 months	12-lead EKG
Module 5	every 24 months	Life-Threatening Arrhythmias
Module 6	every 24 months	Pulse Oximetry Oxygen Saturation
Module 7	every 24 months	Collect and Label Blood from Venipuncture
Module 8	every 24 months	Test Urine for Sugar, Acetone, Specific Gravity, and Perform Hematest
Module 9	every 24 months	Perform Finger/Heel Sticks for Blood Sampling
Module 10	every 24 months	Use Blood Glucose Meter
Module 11	every 24 months	Medication Administration
Module 12	every 24 months	Intravenous Infusion
Module 13	every 24 months	Blood Administration
Module 14	every 24 months	Tympanometry
Module 15	every 24 months	Measure and Record Intake and Output

Number	Frequency	Title
QTP 4N0X1-Vol 2		Nursing Care of Patients with Special Needs
Module 1	every 24 months	Assist with Central Venous Line Insertion and Monitoring
Module 2	every 24 months	Assist with Chest tube Insertion/Monitor Water Seal Drainage
Module 3	every 24 months	Assist with Arterial Line Insertion
Module 4	every 24 months	Assist with Pulmonary Artery Catheter Insertion and Measurements/ Cardiac Output Measurements
Module 5(a)/(b)	every 24 months	Obtaining Radial Arterial Blood Gas Sample- Percutaneously
Module 6	every 24 months	Administering Local Anesthetic Agents
Module 7	every 24 months	Wound Closure
Module 8	every 24 months	Insert/Irrigate/Remove Nasogastric Tube
Module 9	every 24 months	Establish/Maintain/Remove Closed Urinary Drainage System
QTP 4N0X1-Vol 3		Nursing Care of Patients in Emergency Situations
Module 1	every 24 months	Field Triage
Module 2	every 24 months	Set-up Equipment for Cardioversion/Defibrillation/Pacemaker
Module 3	every 24 months	Irrigate Eyes
Module 4	every 24 months	Apply Simple Cast/Splint, Trim/Petal, Bivalve, and Remove Cast
Module 5	every 24 months	Emergency Medication Administration
QTP 4N0X1-Vol 4		Nursing Care in the Outpatient Clinic
Module 1	every 24 months	Perform Pseudofolliculitis Barbae (PFB) Treatments
Module 2	every 24 months	Perform Wart Clinic Procedures
Module 3	every 24 months	Perform Patch Skin Testing
Module 4	every 24 months	Perform Phototherapy Treatments
Module 5	every 24 months	Perform Laser Therapy Treatments
Module 6	every 24 months	Perform Battlefield Acupuncture

3. Available Independent Duty Medical Technician (4N0X1C) QTPs (POC: IDMT Consultant, JBSA-Fort Sam Houston, TX.): Note: QTPs are utilized for initial and refresher IDMT training.

Number	Frequency	Title
QTP 4N0X1C-Vol 5		Bioenvironmental and Public Health Procedures
Module 1	every 12 months	Perform Chlorine Residual/pH Test
Module 2	every 12 months	Perform Bacteriological Water Testing

Module 3	every 12 months	Conduct Food Safety Inspections
QTP 4N0X1C-Vol 6		Emergency Medicine Procedures
Module 1	every 12 months	Airway Management
Module 2	every 12 months	Management of the Multiple System Trauma Patient
Module 3	every 12 months	Emergency Cardiac Care; Administer Medications

4. Available Neurodiagnostic Technologist (4N0X1B) QTPs (POC: Neurodiagnostic Technologist Consultant, JBSA-Fort Sam Houston, TX.):

Number	Frequency	Title
QTP 4N0X1B-Vol 10		Neurology Specialty
Module 1	every 24 months	Routine Electroencephalogram
Module 2	every 24 months	Visual Evoked Response Testing
Module 3	every 24 months	Auditory Evoked Response Testing
Module 4	every 24 months	Somatosensory Evoked Response Testing (upper extremity)
Module 5	every 24 months	Somatosensory Evoked Response Testing (lower extremity)

5. Available Allergy/Immunization Technician 4N0X1D QTPs (POC: Allergy/Immunization Consultant):

Number	Frequency	Title
QTP 4N0X1-Vol 11		Allergy Specialty 4N0X1D
Module 1	every 24 months	Principles of Allergy
Module 2	every 24 months	Type 1 Hypersensitivity Skin Testing; Intradermal and Prick
Module 3	every 24 months	Perform Routine Spirometry
Module 4	every 24 months	Administration and management of immunotherapy injections
Module 5	every 24 months	Mixing of Serial 10 Fold Dilutions
Module 6	every 24 months	Prepare and Administer Xolair (OMALIZUMAB)
Module 7	every 24 months	Oral Challenges
Number	Frequency	Title
QTP 4N0X1-Vol 12		Immunization Specialty
Module 1	every 24 months	Principles of Immunization
Module 2	every 24 months	Active Duty Immunizations

Module 3	every 24 months	Pediatric Immunizations
Module 4	every 24 months	Identify/Treat Adverse Reactions
Module 5	every 24 months	Aeromedical Services Information Management System (ASIMS)
Module 6	every 24 months	Administered/Read Delayed Skin Tests
Module 7	every 24 months	Vaccine Storage and Handling

6. Available Critical Care Technician SEI 487 QTPs (POC: Critical Care Consultant):

Number	Frequency	Title
QTP 4N0X1-Vol 13		Critical Care
Module 1	every 24 months	Obtaining Ankle Brachial Index
Module 2	every 24 months	Performing Transurethral Bladder Pressures
Module 3	every 24 months	Set-Up and Assist With Diagnostic Peritoneal Lavage
Module 4	every 24 months	Assisting with Ice-Water Caloric Testing
Module 5	every 24 months	Assist with Ventriculostomy Placement
Module 6	every 24 months	Fiber-Optic Intracranial Pressure Monitoring
Module 7	every 24 months	Synchronized Cardioversion
Module 8	every 24 months	Set-Up and Assist with Transcutaneous Pacing
Module 9	every 24 months	Set-Up and assist with Transvenous Pacing
Module 10	every 24 months	Assist with Intraaortic Balloon Pump Monitoring
Module 11	every 24 months	Drawing Mixed Venous Blood Samples
Module 12	every 24 months	Set-Up and Assist with Intubation/Extubation
Module 13	every 24 months	Endotracheal/Tracheostomy Suctioning
Module 14	every 24 months	Monitor Patient on Mechanical Ventilation
Module 15	every 24 months	Assist with Percutaneous (Bedside) Tracheostomy Placement
Module 16	every 24 months	Set-Up and Assist with Pericardiocentesis
Module 17	every 24 months	Set-Up and Assist with Paracentesis
Module 18	every 24 months	Set-Up and Assist with Lumbar Puncture
Module 19	every 24 months	Set-Up and Assist with Esophagogastric Tamponade Tube Placement
Module 20	every 24 months	Set-Up and Assist with Continuous Tonometric Gastric Sump Placement/Operation
Module 21	every 24 months	Hemodynamics Waveform Recognition

7. Available Gastroenterology Technician (4N0X1) QTPs (POC: JBSA-Fort Sam Houston, TX):

Number	Frequency	Title
QTP 4N0X1-Vol 14		Gastroenterology
Module 1	every 24 months	Assisting with Colonoscopy/Assist with Hot Biopsy or Snare Polypectomy
Module 2	every 24 months	Assist with Rigid Sigmoidoscopy/Assist with Flexible Sigmoidoscopy
Module 3	every 24 months	Performing Manual Precleaning of Endoscope
Module 4	every 24 months	Assist with Upper Endoscopy Exam (EGD)
Module 5	every 24 months	Perform Cold Sterilization of Endoscope/Perform Mechanical Sterilization of Endoscope (Steris II Processor) /Olympus/ETC

SECTION D – TRAINING COURSE INDEX

1. Resident Courses.

1.1. Refer to the Education and Training Announcements (ETCA), <https://etca.randolph.af.mil>, for complete information on the courses listed in this section.

1.2. Resident courses applicable to AFSC 4N0XX.

Course Number	Course Title	Location
L8AQJ4N031 01AA	Aerospace Medical Service Apprentice Program	Fort Sam Houston, TX
AEIQ AE	Aeromedical Evacuation Initial Qualification	Wright-Patterson AFB, OH
L3ALJ4N051C00AB	Independent Duty Medical Technician (IDMT)	Fort Sam Houston, TX
L5ABO4N031 02AA	Aerospace Medical Service Apprentice – Phase II	Designated MTFs
L9AZA4N051 00AA	Allergy/Immunization Technician	Bethesda, MD
J5ALN4N031B00AA	Neurodiagnostic Technologist (NDT)	Fort Sam Houston, TX
B3AZYBLMD XXXX	Survival Evasion Resistance and Escape (B)	Fairchild, WA
B3AZY4F0X1 0A1A	Hearing Conservation Certification (ARC only)	Wright-Patterson AFB, OH
B3AZY4F0X1 0R1A	Hearing Conservation Recertification (ARC only)	Wright-Patterson AFB, OH
B3ABY4N0X1 0A0A	Aeromedical Evacuation Technician (AET) (Full)	Wright-Patterson AFB, OH
B3ALY4N051F 0A1A	Flight and Operational Medicine Technician (FOMT)	Wright-Patterson AFB, OH

NOTE: Reference the ETCA for current course numbers.

2. Career Development Courses (CDC).

2.1. Refer to the Air Force Institute for Advanced Distributed Learning (AFIADL) catalog, <http://www.au.af.mil/au/afiadl/>, for complete information on the courses listed in this section.

2.2. CDCs applicable to AFSC 4N0XX:

Course Number	Course Title
CDC 4N051A	Aerospace Medical Service Journeyman
CDC 4N051B	Aerospace Medical Service Journeyman
CDC 4N071	Aerospace Medical Service Craftsman

NOTE: Successful completion of CDC 4N051A is mandatory before enrolling in CDC 4N051B.

SECTION E – MAJCOM UNIQUE REQUIREMENTS

1. Air Force Reserve.

1.1. Purpose. This section applies to all Aerospace Medical Services specialty personnel assigned to all Air Force Reserve medical units.

1.2. Seasoning Training Program (STP) requirements. Reference AFRCI 36-2204, Air Force Reserve Seasoning Training Program (STP), for details regarding STP roles and responsibilities.

1.3. Occupational Audio Testing. 4N0XXs assigned to physical exams packages at ARC units are authorized to conduct audio testing. These 4N0XXs will complete, maintain, and display certification in hearing conservation by attending the appropriate resident courses (B3AZY4FOX1 0A1A5 or B3AZY4FOX1 0R1A).

1.4. Technical school for AFRC 4N011 can be waived with the proof of NREMT, a nursing license (Registered Nurse or Licensed Practical Nurse/Licensed Vocational Nurse) or other equivalent school. Waiver packages will be submitted IAW AFRC waiver process. (AFRC/A1KE Sharepoint: <https://afrc.eim.us.af.mil/sites/A1/a1k/a1ke/SitePages/Home.aspx>) The waiver authority is AFRC MFM, in coordination with the CFM.

1.5. OPR: AFRC/SGN, 549 Pine Street, Robins AFB, GA 31098, DSN: 497-1893/2000 or Comm 478-327-1893/2000.

2. Air National Guard (ANG).

2.1. Purpose. This section applies to all Aerospace Medical Service specialty personnel assigned to all Air National Guard units.

2.1. Proficiency Training.

2.1.1. Proficiency Training (Mission Essential Skills Training (MEST)) will be accomplished IAW current Fiscal Year NGB/A1D Workday Guidance.

2.2.2. Mission Essential Skills Training (MEST):

2.2.2.1. MEST resources are provided upon completion of an AFSC awarding course. The maximum MEST length is determined by Career Field Managers to provide Combat Mission Ready (CMR) Airman.

2.2.2.2. The most current annual Fiscal Year (FY) MEST plan is developed by NGB/A1D and intended to maximize training effectiveness. All FY MEST resources are sent to the Wings for applicable FY requirements. Recommendation is for the Medical Group leadership to communicate MEST needs to the Force Development Superintendent and Wing CC. The current recommended MEST days for the 4N is 40 days. A 30 day extension can be requested as well. Proficiency training must be accomplished at an active duty treatment facility or an approved civilian facility. During MEST, the member will be assigned to an active duty/civilian supervisor who will ensure that the appropriate experiences and supervision is provided to assist the member achieve the required proficiencies.

2.3. NREMT Certification.

2.3.1. All ANG 4N0XX personnel (E-1 thru E-8) will maintain NREMT.

2.3.2. Individuals who hold NRP certification meet the intent of the NREMT.

2.3.3. Occupational Audio Testing. 4N0XXs assigned to physical exams packages at ARC units are authorized to conduct audio testing. These 4N0XXs will complete and maintain certification in hearing conservation by attending the appropriate AFMC courses (B3AZY4FOX1 005 or B3AZY4E4F). OPR. ANGRC/SGOK, Conaway Hall 3500 Fetchet Ave., Andrews AFB, MD, 20762-515

SECTION F – DOCUMENTATION OF TRAINING

1. The Electronic Training Record is an enterprise-wide application designed to streamline and standardize training management. Currently, the Total Force Training Record (TFTR) serves as the single, automated repository for all medical enlisted specialty training.

2. TFTR components managed by the supervisor are:

2.1. Master Training Plan (MTP). The MTP employs a strategy for ensuring the completion of all work center job requirements by using a MTL and serves as a guide for supervisors, trainers, and certifiers to ensure that personnel are trained in an effective and efficient manner to meet training and mission requirements. The MTP will include when tasks on the MTL should be trained (priority/milestones), how they will be trained (resources/method), and approximately how long it should take to train on individual tasks or set of tasks. Refer to AFI 36-2651, *Air Force Training Program* for guidance in developing the MTP.

2.2. Duty Task List (DTL). The DTL is a list of all tasks required for a given duty position. The supervisor creates the DTL by selecting tasks from the MTL.

2.3. Training Record. All training is documented in the training record by way of TFTR. This is the electronic version of the former Enlisted Training and Competency Folder. The training record is made up of the AF Form 623 Parts I, II and III; AF Forms 623a, 797, 803 and 1098; and the Job Qualification Standard (JQS). Refer to AFI 36-2651 for guidance in documenting training on the various forms contained within

the training record. **NOTE:** All enlisted personnel (MSgt and below) with a medical AFSC will have an active training record within TFTR.

3. TFTR provides the capability to upload training-related documents into a training record. The following documents (as applicable) will be uploaded into every 4N0X1X training record:

3.1. Current NREMT, TCCC card (for SMSgts and below and CMSgts assigned to 4N0 positions on standard UTCs).

3.1.1. If NRP, current NRP Card, Advanced Life Support Card, and Pediatric Advanced Life Support Card.

3.2. Current Basic Life Support Card.

3.3. Current AF Form 2096 or Military Personnel Data System (MILPDS) product with current skill level and special experience identifier.

3.4. CDC Answer Score Sheets, if enrolled in CDCs. (Maintain until completion of UGT).

3.5. Current IDMT certification letter signed by the MTF SGH.

3.6. Current NDT Registry certificate obtained from ABRET

3.7. Hyperbaric Technicians, current CHT certification and ACLS Card

3.8. Critical Care Technicians currently assigned to a Critical Care position, current ACLS card

MEMORANDUM FOR 383 TRS/TRR

FROM: AFMRA/SG1E (CMSgt Wilkerson)
7700 Arlington Blvd
Falls Church, VA 22042-5157

SUBJECT: 4N0X1 Career Field Education and Training Plan (CFETP) Phase I and Phase II curriculum development

1. The 4N0X1 CFETP published on 24 July 20 utilizing the new Total Force Training Record (TFTR) format. TFTR does not separate Phase I and Phase II training requirements within its current format which both Medical Education and Training Campus (METC) and the 383 TRS/TRR uses to develop curriculum.
2. To alleviate any further confusion and for the development of Phase I and Phase II training requirements, the 4N CFM has approved the use of the Specialty Training Status (STS) 4N0X1 (Pre-publication) finalized on 15 January 20. This is "ONLY" approved for METC and 383 TRS/TRR use for curriculum development.
3. For further information on this subject, SMSgt Ernest Winston, 4N Force Manager, at DSN 761-7580 or via email: ernest.c.winston.mil@mail.mil.
